1. The first of these is the fact that the majority of the population of the United States is now living in urban areas. This is a result of the process of urbanization, which has been going on since the beginning of the 20th century. The population of the United States has increased from about 100 million in 1900 to over 200 million in 1950. At the same time, the population of rural areas has decreased from about 100 million in 1900 to about 50 million in 1950. This has led to a concentration of the population in urban areas, which has had a number of important consequences. One of the most important is that it has led to the development of a new type of urban organization, which is based on the concentration of population in a few large cities. This has led to the development of a new type of urban organization, which is based on the concentration of population in a few large cities. This has led to the development of a new type of urban organization, which is based on the concentration of population in a few large cities.

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.
