

The modern mode of treatment by MILBURN'S RHEUMATIC PILLS is thoroughly rational, simple and always effectual. They act on the inflamed nerve tissue with a soothing and quieting influence, remove the source of irritation and soon give much desired relief.

In no instance where the directions have been followed do we know of a failure, and their reliability and efficacy are attested by the many sciatic sufferers whom they have cured, and who are only too glad to tell others how they were freed from pain.

GOUT.

Although this disease is not so prevalent here as in the older lands, still, during the last few years, it has been considerably on the increase. Over-eating and indulgence in alcoholic beverages, especially beer, dyspepsia, and hereditary predisposition, all tend to produce it. But the direct and immediate cause of the attack is an excess of Uric Acid circulating in the blood, which becomes deposited in the form of Urate of Soda in the joints, more particularly the first joint of the great toe. Then the agonizing pain starts, the joints become swollen, hot and shiny, and the suffering is almost beyond endurance. When this attack passes off, that is not the end of it. Unless you begin treatment with MILBURN'S RHEUMATIC PILLS another attack follows, and so on till the joints become deformed.

If you have the least symptom or indication of Gout, we would advise you to begin a course of Milburn's Rheumatic Pills at once, and thus ward off an attack. If you have had one attack, get the system thoroughly under the influence of this remedy, so that you may prevent a repetition of this terrible disease.
