

— THE —
SIMONSON **LOG TURNER**
 — AND —
LOG LOADER

Peculiarly adapted to work in large logs handling them without danger of breaking mill frame or head-blocks. By moving one lever the machine is made to load log on carriage or roll log on to skids and push on carriage.

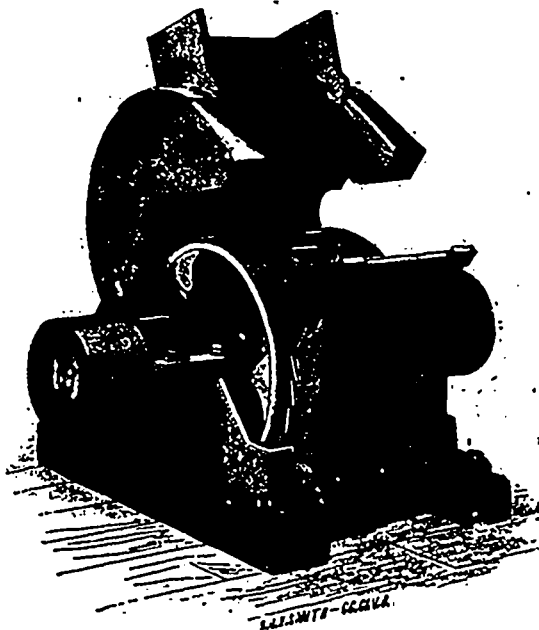

Requires no space below floor timbers. Is adapted to a mill sitting on the ground or otherwise. Does not injure the timber.

PATENT EDGING GRINDER

USED BY:

Saw Mills ▽ Shingle Mills ▽ Hoop Mills ▽ Planing Mills ▽ Box Factories

It cuts any kind of wood into coarse or fine chips suitable to be handled by a Chain Conveyor or Blower; made in three sizes to suit kind of wood to be cut and the way chips are to be handled.

In Sawmills it cuts Slabs, Edgings, Trimmer Ends and Bark. In Shingle Mills it grinds Blocks, Spatts, Waste Shingles, Splints and Sawdust. In Planing Mills it grinds Blocks, Long Edgings, and Ends of Boards.
