

As for the rate of increase, we should not consider it to be very great—probably not over 2½ per cent., which rate gives 77,541 as the population of Newfoundland at the close of 1833. We believe the Legislature of last Session authorized a census during the present year.

Having gone through the official information with which we have been able to meet, and corrected the whole for the close of the last year, we are now able to give our readers a Table of the Population of the whole of the British American Provinces for the year 1833.

Table of the Population of the British American Colonies, giving the latest Census of each, and the estimated Population of the last Year.
