APPLES GOING TO WASTE IN DISTRICT; SHOULD BE CANNED AS AT PARKHILL

Nearly Two Tons of Jelly Made There From Windfalls.

Reports received by the district representative of the Canada food board indicate that there appears to be an abundance of early apples going to waste between Ridgetown and London. addition to this, it is stated that Oxford County has plenty of apples, and that there is a fair crop of apples in Essex County. Meanwhile, canners and other buyers do not seem to be aware of Concerning the use that can be made of the early apples, the Middlesex Red Cross and Women's Institute community canning centre at Parkhil has already made enough apple jelly for the hos-pitals overseas to fill more than thirteen ndred three-pound cans, using windfall apples for the purpose.

The purposes of food conservation in that case have been further served by feeding to pigs the pulp from which the uice has been pressed. It is said that which small boys wait round with pails to be filled with fruit pulp for the pigs when jellymaking is under way at the

CREEKS OF CITY MENACE PROPERTY: PROBLEM BAD FOR CITY TO DEAL WITH

Trouble From Three Points Now Under city is experiencing a great deal

of trouble at the present time with storm water and creeks. damage and trouble to the residents of the wide area affected. The Hyman firm has a smaller one. At the joint of the two a block occurs, and the C. P. R. property floods. Last spring the water became so high that Waterloo street was flooded and other C. P. R. has written the city about the matter, and the ciy has re-ferred the letter to the Hyman Conpany.
Ald. Charles Moorhead has added to the troubles. He declares that a storm sewer should be constructed on English street, from Princess avenue to Lorne. This is the upper end of the Carling Creek, which floods the C. P. R. property at Waterloo street. The creek is tiled and this has become blocked. The residents of the district claim that it is a menace to health. Engineer Brazier will try and remedy this situation by

SIGNALLERS, ENGINEERS WANTED FOR SIBERIA

connecting the creek with the Lorn

avenue storm sewer.

Engineers and signaliers are now required for the Siberian expeditionary force. For the engineers, the Engineers' Depot at Carling Heights, of which Capt. Canfield is officer commanding, is asking for recruits from the following trades: Carpenters, plumbers, electricians, machinists, tinsmiths, blacksteamfitters, etc. The men required for signallers are telegraph operators, telephone linesmen, cable men, motorcyclists, switchboard operators, and others of good education.

Men for these branches must be in category A2. This is the first opportun-Engineers' Depot here, and sent St. Johns, Quebec, in drafts, where they

launched yesterday afternoon along the line of the Arras-Douai Railway, forcing our troops back a few hundred yards to the old German trenches on Greenland Hill, where the enemy attack broke down under our fire.

"British troops carried out a successful local operation yesterday astride the Neuf Berquin-Estaires road, advancing our line on a front of about four miles and taking a number of prisoners."

FRENCH REACH CHAULNES.

With the French Army in France, Aug. 27.—Activity behind tendance the German lines on the Aisne and the Avre fronts has increased greatly since the French successes around Roye and on the plateau north of Soissons. In the region east of Roye the Germans seem to be preparing for an eventual retirement. The French pushed on today and reached the edge of Chaul-

nes, after taking Chaulnes Wood by assault. On the south they reached Amy, two miles southeast of Roye.

GERMAN COUNTER-ATTACKS HAVE BROUGHT DISASTER TO ENEMY

With the British Forces in France, Aug. 28.—While intermittent fighting continues virtually everywhere along the British front the battle begins to show signs of slowing up. Heavy rain, and these, at least for the moment, have had the effect of retarding operations.

German resistance this morning seems to have stiffened considerably.

The Germans have delivered many counter-attacks along the line, but none of them really has gained anything. In virtually every case the counter-attacks have finally had disastrous results for the Germans, for when the British did retire at two or three places it was only for a brief period.

When reattacked the Germans not only lost the ground which they thought they had regained, but they also suffered many casualties.

The principal activity has been in the region of the Scarpe River, in which sector the British have g. ed a little more ground. Some of it has not been in possession of the Entente allied troops since 1914.

This is the case at Vis-en-Artols and

ALLIES DON'T NEED MUCH BARBED WIRE FOR DEFENCES NOW

Demand Drops Since Foch's Offensive Began.

STEEL SUPPLIES SHORT

Canadian Manufacturers Are Handicapped in Their

In its summary of the iron, steel, metal and machinery markets for week ending August 29, Canadian Machinery and Manufacturing News, Toronto, makes the following observations:

There seems to be small chance for Canadian business talking of expansion, if such expansion depends in the first place upon chances of going into the steel markets for increased supplies. The fact is that there is no chance of increased steel supplies coming to Canada. Taking that as the starting point, the only thing is to make the available supplies go to the points where the most essential work is being carried on from the viewpoint of the war officials. It has been a hard matter for the Canadian makes the following observations the viewpoint of the war officials. It has been a hard matter for the Canadian allotment of steel to be sustained week by week. In fact, there have been times when there has been a falling off.

Conferences have been held between jobbers and the war trade board and in many stable lines prices are now recogni many staple lines prices are now recog-nized as standard, but there are a few lines that are not settled, the authori-ties holding that the warehousemen were doing huisteen were doing business at too high a figure. The latter base their contention, in part at least, on the fact that their export trade is largely gone for the present, and that, with this revenue cut off, their experts of their experts and their experts have not decreased at verhead charges have not decreased at

all.

The big problem for dealers in machine tools just now is not the securing of new business, but the filling of orders they already have on their books, and partial delivery of which has been made partial delivery of which has been made in a good many cases.

The situation in this regard is not all that could be desired by any means. This is not common to this country, but practically all over United States the same story is heard. There are going to be some delays in deliveries on new shell contracts. Contractors do not favor the plan of going ahead and working on one or two operations in a shell plant, waiting for the rest of the work to be done when the machines arrive. The shop gets clogged at this one stage.

The shop gets clogged at this one stage. The only way is to get a steady flow through the shop on all operations, and the non-delivery of certain machines is An interesting little sidelight is brought to notice in a dispatch from the big steel centres of the United high ground protecting Peronne on the States.
