ST. JOHN, N. B., SATURDAY, SEPTEMBER 7, 1918.

"We are fighting for a worthy purpose, and we shall not lay down our arms until that purpose has been fully achieved."—H. M. The King.
 TO THE PEOPLE OF THE EMPIRE—Every fighting unit we can send to the front means one step nearer peace.

FOSTERITE JOCKEYING.

Although the Foster government at its sessions in this city on Thursday and yesterday did not find time to deal conclusively with several matters of public importance it did make one appointment in which there is more than ordinary interest.

It provided that Frank C. Robinson, of Moncton, should be the third member of the Workmen's Compensation Act Board and thereby averted a serious split certain to come in Westmorland County.

The whole story may as well be told now. Hon. Clifford W. Robinson, a brother of the Frank C. Robinson previously referred to, is a member of the Foster administration. It is true he has no portfolio but that does not alter the fact that he was for an unhappy space the prime minister of this province, and that he is today the master of precedent and parliamentary procedure upon whom Premier Foster and his colleagues most frequently depend for assistance. More than a year ago the Hon. Clifford opined that his services at the Foster altar were more than sufficient to entitle his brother, Frank C., to a position in the public service. The job of registrar of deeds and probates in Westmorland County appeared most tempting, but it was generally understood that C. M. Leger, M. P. E. also of Westmorland, had the inside track and Mr. Robinson was informed nothing could be done for his brother in this regard. Mr. Leger had the support of Hon. L. A. Dugal, J. E. Michaud, A. J. Boudage, Philias M. Melanson, and other French-Canadian members of the Foster party, and was assured that if the position did not come to him there would be such a "rumpus" as would shake the Foster administration to its foundations.

Thus we have upon one side Hon. Clifford W. Robinson, the premier's confidential adviser, and on the other four of his leading French-Canadian supporters, by whose votes alone he is retained in power at Fredericton. It was a nasty situation, well calculated to try the mettle of even a more experienced politician than even our "accidental premier." If he yielded to the importunities of Hon. C. W. Robinson he would lose the support of the French-Canadians represented by Hon. Mr. Dugal and who favored the appointment of C. M. Leger. If on the other hand he ignored Mr. Robinson he was certain that his political guide and mentor would be much displeased.

A happy thought came to this heaven-born statesman who now, ostensibly at least, dominates New Brunswick's affairs. He would appoint Mr. Robinson to the Compensation Board, to which he had already named two of his select henchmen, Messrs. Sinclair and Surgen, give Mr. Leger the Westmorland County position and thus by one action placate both factions of his party. It was a Machiavellian stroke that would have done credit to a much brighter mind than that of the leader of the Fosterite clan. Mr. Robinson goes to the Compensation Act Board and the Hon. Clifford is soothed; the Westmorland appointment is open for Mr. Leger and thus the Dugal faction is placated. Good business. Mr. Foster is to be congratulated upon the political acumen with which he grappled with a troublesome situation. But what is to happen in Westmorland when the vacancy created by Mr. Leger's appointment to an office carrying with it a huge emolument, is to be filled? Can the Fosterites again fool the people of Westmorland as they did in the last Dominion campaign? We do not believe so. Mr. Foster may think he has selected the best course out of a troublesome situation but he may receive a reawakening when the necessary by-election is called.

THE ECONOMIC WEAPON.

Save from pro-Germans, extreme pacifists and ultra-free trade sentimentalists there will be hearty response to the declaration of Sir Robert Borden that economic war should be waged against Germany until the democratic commonwealths are convinced that there is a thoroughly repentant Germany, a Germany which will not repeat this outrage against the world.

The Germans undertook this war to secure, through world domination, control of world resources and thereby a commercial and industrial supremacy, which would brook no rival. This war would be fought in vain if Germany, still imbued with that spirit, were allowed every economic advantage with the Allies. It would mean that Germany would be prepared for another attempt to regain supremacy.

Speaking in England shortly before he left of the necessity for Great Britain and the United States through their control of natural resources to

place restrictions upon Germany against which she would struggle in vain Sir Robert declared:

"Germany must be made clearly to understand that this tremendous world-wide power of these two nations will be exercised relentlessly and mercilessly, not against a regenerate Germany (if even Germany may become regenerate), but against Germany as she is today. Let her prove herself regenerate by works and not by words alone; let her cast out the unclean spirit of militarism and the sordid lust of world domination. Let her make such poor compensation as is humanly possible for all the horror and suffering and evil that she has wrought. Then shall we listen to her. Until then, let her name be anathema."

Rt. Hon. David Lloyd George has already given utterance to similar sentiments which would indicate that there will be no weakness in dealing with Germany on the part of the war leaders.

THE ANNIVERSARY OF THE MARNE.

Four years ago today the first Battle of the Marne was developing prominently under General (now Marshal) Joffre, whose rejuvenated forces eventually succeeded in driving the German legions back from their positions at the most before the gates of Paris to the points in the rear of the line they now occupy. The French capital had been removed to Bordeaux and up to the turn of the tide on that fateful September morn the French nation was in dire peril. This year the Teuton high tide again threatened Paris. How wonderfully and how well it was turned again by the valiant armies of the Allies is too well known to need relating again at this time. The process of rolling back the shattered and decimated ranks of the German host is still continuing with as much effectiveness as ever, and who knows but that the shell torn and battle scarred soil of France will be freed of the invader entirely within a few short weeks?

Tomorrow will be the 1,500th day of the great world war, and the people of every Allied nation can well rejoice.

Yesterday the British, French and Americans drove back the invaders all along the 150 mile front, the French again reaching the Hindenburg line, this time at Petit Baris, on the eastern side of the lower forest of Concy. The most significant news of all undoubtedly is the announcement from Paris that General Petain's men have captured Couchy-Le-Chateau, making the enemy positions on the Chemin-des-Dames, the great German base, precarious and practically untenable. General Debeney's army has turned the Ham-Guiscard line at Dampcourt, west of Chauny, and the Germans are retreating rapidly all along the front south of the Somme.

The British forces advanced yesterday aside the Amiens-St. Quentin line on a front of twelve miles to a depth of three miles. The British are at the western edge of Templeux-le-Fosse, three and one-half miles north-east of Peronne, and have also gained ground elsewhere. East of the Somme their advance was seven miles. The Americans have extended their line on the Aisne front, and altogether the war news was never better.

The truth is that the retreat of the Boche army has become a rout at a number of points. As he falls back the enemy is applying the torch indiscriminately, burning the war material he cannot carry off and destroying all the villages and forests in order to leave that part of La Belle France a blackened ruin as a grim reminder of where the foot of the modern Hun has trod.

A NEW C. N. R. BOARD.

Announcement that the Canadian Northern Board is to be reorganized and that Sir William Mackenzie and Sir Donald Mann will go in the process is not surprising. The outstanding ability of Messrs. Mackenzie and Mann combined with their great knowledge and experience of the Canadian Northern organization would undoubtedly have been of great service in piloting the railway over the difficult years that are before it. But their continued presence in the organization seemed to be prohibited by a strong public feeling that the road should be completely freed of all Mackenzie and Mann influence. The soundness of this judgment remains to be seen.

An unofficial statement says that the new board will be comprised of the best business and railway brains the country can produce. That, certainly, is most desirable. In assuming active control of the operation of the Canadian Northern, incorporating it with the Intercolonial and the National Transcontinental as a great

system of Government Railways, Canada launches upon her first real great experiment with state-ownership of railways, and it would be a great pity to leave undone anything calculated to make the venture a success.

GERMAN THOUGHT

(Vancouver World.)

By the way, have you seen that interesting little book, "Gems of German Thought," compiled by William Archer?

Here is one gem which discloses the German mind:

German freedom is not a natural human right, but an elevation of humanity above the despotism of its own personal inclinations.

The German.... MUST conquer, and when once he has conquered—today or in a hundred years—no duty is more urgent than that of forcing the German people to expand upon the world.... Men must come to realize that whoever can't speak German is a pariah.... It is clearly our CRAVING for expansion that drives us into the paths of conquest, and in all of which all chatter about peace and humanity can and must be thrown to the winds.... Let us bravely organize great FORCED MIGRATIONS of the inferior peoples. Potentially we will be grateful. We must coerce them! This is one of the tasks of the war; the means must be superfluous of armed forces, but the German people must be made to grow, and where necessary the penning up of inconvenient peoples in narrow "reserves" may appear hard; but it is the only solution of the race question that is worthy of humanity.... Thus alone can the over-population of the earth be controlled; the efficient peoples must secure themselves show room by means of war, and the inefficient must be hemmed in and at last driven into "reserves" where they have no room to grow, and where discouraged and rendered indifferent to the future of the spectacle of the superior energy of their conquerors, they may crawl slowly toward the peaceful death of weary and helpless senility.

Sweet, is it not? We must give them a taste of their own medicine, get them and keep them within their own "reserves."

A BIT OF VERSE

THE UNSTAINED SHIELD.

With unstained shield and sharp sword we stand... ready to strike and God with us.

—Crown Prince Frederick William.

A shield of dark corruption, By one redeeming ray wrought; Of shield of lies and falsehood, Of lust and sinful thought, Of cruelty and hatred, Of death and blood and tears, Of broken faith and ruthlessness, Of treachery and fears.

Upon its dreadful surface, The ghastly colors lay, Unbrightened and unbroken, When it gets beyond a certain pick, Its one redeeming ray, Of chivalry or justice, Or truth's revealing light, Or reverence or moral code, Or equity or right.

Across its grisly shadows No stain of fairness fell To mar its utter evil, Conscience and foresight in hell, Barbarity and baseness, Its frowning face revealed, God help the innocents who face The stainless German shield.

—Kenneth L. Roberts.

ST. STEPHEN EXCURSION PARTY FOG BOUND

St. Stephen, Sept. 6.—This afternoon the steamer Grand Manan conveyed a large excursion party to St. Andrews under the auspices of Miriam Lodge I. O. O. F. The steamer was to have returned this evening but fog set in so thick that the captain would not venture up the river at night and the party is remaining at St. Andrews until morning.

FREQUENT HEADACHES

People with thin blood are much more subject to headaches than full-blooded persons, and the form of anemia that afflicts growing girls is almost always accompanied by headaches, together with disturbance of the digestive organs.

Whenever you have constant or recurring headaches and pallor of the face, they show that the blood is thin and your efforts should be directed toward building up your blood. A fair treatment with Dr. Williams' Pink Pills will remove the headache.

More disturbances to the health are caused by their blood than most people have any idea of. When your blood is impoverished, the nerves suffer from lack of nourishment, and you may be troubled with insomnia, neuritis, neuralgia or sciatica. Muscles subject to strain are under-nourished and you may have muscular rheumatism or lumbago. If your blood is thin and you begin to show symptoms of any of these disorders, try building up the blood with Dr. Williams' Pink Pills, and as the blood is restored to its normal condition every symptom of the trouble will disappear. There are more people who owe their present state of good health to Dr. Williams' Pink Pills than to any other medicine, and most of them do not hesitate to say so.

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 from Dr. Williams' Medicine Co., Brockville, Ont.

GERMANY'S DEFEAT

(Argonaut.)

Germany has shot her military bolt in the west, and it has failed. She has been worsted in two great trials of strength, and the inferiority of her armaments has been established. She has been outwitted by French generals, and she is now under no misapprehensions as to the ability of American soldiers to cross the Atlantic, and to destroy twice their weight of German soldiers after they have crossed the sea.

She may make a desperate effort to retrieve her position—or to seem to do so—and to regain the initiative, but she has no longer the slightest hopes of victory. It is a matter of mathematics that of conjecture. If she was not able to hold her place in the Marne salient, if she cannot now hold her place in the Picardy salient, she has no real hopes of a military success anywhere. She has prodigally consumed her reserves, and she can not replace them. She has retired in fairly good order from the salients that she has lost, but she has now no army with which she can fight a battle of the first magnitude unless it be a battle of extended retreat.

A BIT OF FUN

PAGE MR. HOOVER.

Wife (reading)—Bachelor hangs himself in a clothes closet.

Husband—If he had only been married he couldn't have squeezed into it.

Digested His Remarks.

A young minister just out of the seminary was preaching his trial sermon in a village church. He was

very positive, repeating several times: "I am correct, though all the commentators disagree with me." That evening, just as the young preacher arose to read the Scriptures, an old lady entered the door and looking up into the young minister's face as she handed him a market basket carefully covered, said: "Brother, I heard you say this morning that all common sators disagree with you. I have brought you a basket of yellow yams, which I hope you can eat without getting sick."—Ladies Home Journal.

CAUSES SORROW

IN ST. STEPHEN

St. Stephen, Sept. 6.—Announcement at the death in St. John this morning of Frank H. Belyea was received here with surprise and sorrow. Mr. Belyea was employed for some years as foreman of the paper box shop connected with Ganong Brothers' candy factory and was widely known and esteemed.

The funeral will be held from the P. R. train Saturday at noon under the auspices of the local lodges of Odd Fellows and Independent Foresters.

2 KILLED, 45 HURT

Chickasha, Okla., Sept. 5.—Two men were killed and forty-five were reported injured when three coaches of southbound Rock Island train number 11 left the rails and went into a ditch today between Duncan and Comanche, Okla., south of this city.

The doll booth and shark will appeal to the children. This is their afternoon at the Big Fair.

ACCUSES EX-MAYOR

Boston, Sept. 5.—Congressman Jas. A. Gallivan, who is being opposed for renomination by former Mayor James M. Curley, charges that Curley has been a spy suspect, and that he split Former Ambassador Von Bernstorff's \$50,000 fund with another city official before the country went to war with Germany.

They Still Joke in England.

"Just ask Dr. Jones to run round to my place right away. Our cook's fallen downstairs, broke her leg; the housemaid's got chicken pox and my two boys have been knocked down by a taxi."

"Im sorry, sir, but the doctor was blown up in yesterday's air raid and he won't be down for a week." —Punch.

Reminiscent.

"Remember, Jack, when you and I were boys together and we sat down one day in some safe cement?"

"Sure, old top; it will always be a soft spot in my memory." —Florida Times-Union.

Women! Here Is A Dandy Thing

Few drops on corn or callus stop pain, then they lift off.

Your high heels have put corns on your toes and calluses on the bottom of your feet, but why care now?

This tiny bottle holds an almost magic fluid. A genius in Cincinnati discovered this ether compound and named it Freezone. Small bottles of freezone can be had at any drug store for a few cents. Don't limp or twist your face in agony and spoil your beauty, but get a little bottle of freezone and apply a few drops on your tender, aching corn or callus. Instantly the soreness disappears and shortly you will find the corn or callus so shriveled and loose that you can lift it off with the fingers.

Just think! You get rid of a hard corn, soft corn or a corn between the toes, as well as hardened calluses, without suffering one particle. Millions of women keep a tiny bottle on the dresser and never let corns ache twice.

Just think! You get rid of a hard corn, soft corn or a corn between the toes, as well as hardened calluses, without suffering one particle. Millions of women keep a tiny bottle on the dresser and never let corns ache twice.

Just think! You get rid of a hard corn, soft corn or a corn between the toes, as well as hardened calluses, without suffering one particle. Millions of women keep a tiny bottle on the dresser and never let corns ache twice.
