

## MONTREAL PORT HAS SPLENDID FUTURE

### TRADE RELATIONS WITH EVERY COUNTRY.

#### Twelve of World's Greatest Shipping Lines Used Port as Terminal During 1921.

The closing of the port of Montreal with the termination of navigation on the St. Lawrence brought to a conclusion the most remarkable season in the export history of that port. Shipments of agricultural produce, not only of Canadian but also of United States origin, exceeded by a very wide margin all previous records, taxing the large capacity of the harbor to the limit and creating a scene of unprecedented activity. The gratifying feature of this phenomenal activity is that it is not brought about by purely temporary or transient conditions, but is occasioned by circumstances which should ensure in the future a yet greater volume of trade. Indications in other phases of activity than the export of merchandise, are not wanting to forecast this prospect.

The prime cause of this unusual movement rests in the passing of the Emergency Tariff by the United States, virtually cutting off the export of Canadian agricultural produce by way of the border, and diverting the voluminous products of the western prairies to the Atlantic for shipment overseas. Whilst this diversion has only been effected and experienced within the past few months, it is safe to say that in seasons to come an ever greater volume of trade will pass out of Canada by the Atlantic outlets.

The grand total of grain by boat and rail into the port of Montreal from May 1st to December 1st, 1921, reported by the secretary of the Montreal Board of Trade, reached 140,936,445 bushels, a volume in excess of all other Atlantic ports combined from Halifax to Philadelphia and Newport News including the port of New York. A total of 64,539,360 bushels of grain arrived by lake boats and 75,557,069 by rail. Total wheat accounted for 56,652,609 bushels; corn 45,593,443 bushels; and oats 22,389,567 bushels. Shipments of wheat to Montreal from the United States rose from 11,648,250 in 1920 to 27,526,000 in 1921, and corn from 55,816 bushels to 25,178,581.

**Increasing Export of Grain.**  
The total export of grain of all kinds from Montreal in the season was 119,602,183 bushels, the significance of which is realized when compared with the previous year's total of 53,143,305 and the previous record of the port of 75,361,829 in 1914. Though wheat showed a substantial increase the most remarkable development was in corn, which from shipments of about half a million bushels in 1920 jumped to more than forty-three million bushels in 1921.

The shipment of cattle to the overseas market did not commence aggressively until the season was well advanced, and yet in the course of the seven months of open navigation, 35,000 head left for Liverpool and Glasgow, whereas shipments via the St. Lawrence in the previous years have been negligible.

There are other developments, assured and projected, in the port of Montreal, deeply significant of the general appreciation of the importance of its future. Many shipping companies, for instance, are reported to be seeking for docking rights in the harbor, and the coming spring on the St. Lawrence should see a movement of unparalleled activity. According to the plans of the steamship companies, nearly twenty additional trans-Atlantic passenger steamers will be using Montreal as their western terminal in Atlantic traffic. An increase in cargo vessels is naturally forecasted. Already the St. Lawrence river carries more than one third of Canada's national trade to and from the Port of Montreal, the annual volume of which exceeds \$750,000,000, and prospects are that both the volume and the proportion will increase.

#### The Continent's Second Port.

Montreal is already the second port of the American continent, its fifth city in respect of population, and the greatest inland port. It is the principal point on the American continent for the export of grain and other agricultural produce, and now the greater part of the enormous harvest of the western prairies is finding its outlet by way of the St. Lawrence instead of across the International border. The work of developing the accommodation and capacity of the harbor is a continuous work, progressing unceasingly. To date at a cost of more than \$30,000,000, the harbor provides one hundred steamships berths from 350 to 750 feet in length, with a depth of water from 25 to 35 feet. There are two large elevators at which nine vessels can be loaded with grain simultaneously, sixty miles of harbor railway, and a total wharfage of about twelve miles. Montreal has trade relations with every country of the globe. During 1921, twelve of the world's greatest shipping lines used the port as a terminal whilst the number of vessels arriving yearly approximates one thousand.

An arrow may fly through the air and leave no trace, but an ill thought always leaves a trail like a serpent.

## WHAT DOES YOUR MIRROR REVEAL?

### Does it Tell You That Your Blood is Thin and Watery?

When a growing girl becomes pale, complains of exhaustion, dizzy spells, headache and stomach trouble, she should know that these things are evidences of anaemia or bloodlessness. A glance in the mirror will tell the story. There is immediate need for a tonic, a system builder that will completely restore the missing qualities to the blood that every part of the body will share in the benefit.

A good example of the result of wise treatment in cases of this kind is given by Mrs. George R. Smith, of Queensport, N.S., who says: "I cannot praise Dr. Williams' Pink Pills too highly for what they have done for me, three daughters. My eldest daughter, Eena, at the age of 14, became run down, and I got her three boxes of the pills, and by the time she had taken them she was in good health, and is now a healthy married woman. My second daughter, Martha, at the age of 16, was awfully run down and pale. In fact she had always been a delicate child, but gradually became worse. At last the could not get up stairs without having to sit down and rest, and could not even do any kind of light work without being greatly fatigued. Finally I gave her Dr. Williams' Pink Pills, and after taking them we found they did her more good than all the other medicine she had taken, and she is now in good health. Then my younger daughter, Greta, now 15, became so run down that she had to stop going to school. But after taking eight boxes of the pills she is now a big, healthy girl. I feel that after what Dr. Williams' Pink Pills have done in my home there can be no doubt of their value, and I hope someone else will benefit from our experience."

You can get these pills through any dealer in medicine or by mail post-paid at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

#### Birds Rob Chickens.

Any observant person may notice that sparrows are no longer numerous in the streets of our cities. It is because food is lacking. The sparrows, thus driven from their urban haunts, have sought to pick up a living in the suburbs and outlying farming districts. They have become a very serious nuisance to poultry raisers, especially in winter, when they invade chicken yards in flocks, and even make themselves at home in poultry houses, devouring the feed provided for the fowls.

It is no trifling matter, for fifty sparrows will eat a quart of grain per day and will spoil three times as much as they consume. But the chief trouble is that they spread disease, particularly the dreaded chickenpox.

Poultry keepers find themselves obliged to make their chicken houses arrow-proof with wire net. Many of them have resorted to systematic trapping. Sparrows are easily trapped and can be skinned with a mere twist of the fingers. Thus dealt with, and with the wings and legs pulled off, they make, when boiled, most excellent food for chickens.

#### Planes Hunt Fish.

The airplane service of the United States Fisheries Bureau has proved especially useful in locating, for the benefit of fishermen, the menhaden, which travel about in schools numbering millions at the surface of the sea, their presence being indicated by a widespread rippling. Menhaden are not good to eat, but their oil has high commercial value, and, after it has been pressed out, the residue makes an excellent fertilizer. During the last year the production of menhaden oil in the United States was 5,676,453 gallons. This was more than the output of whale oil, which was 5,073,574 gallons. The production of herring oil was 380,379 gallons, and of cod-liver oil 196,108 gallons. Other oils of marine origin, including that derived from sharks' livers (commonly sold as cod-liver oil), totalled 1,060,322 gallons.

#### Unreasonable.

Angry Customer—"See here, you overcharged me for that suit and it was full of moths."

Tailor—"What do you expect for fifteen dollars, hummingbirds?"

#### A Love Feast.

Better is a dinner of herbs where love is, than a stalled ox and hatred therewith.

The first key which opens the door of success is the trading instinct, the knowledge and sense of the real value of any article.

The annual report of the Chief Inspector of Stock of Western Australia shows that there are no fewer than 5,995 camels in that section of the Commonwealth.

Think this over. The Great War lasted from August, 1914, to November, 1918. The estimated cost (not including loss of property) was \$186,000,000,000. A total of 12,800,000 men were killed and 20,800,000 men were wounded. And still some men refuse to believe in limitation of armament.

Minard's Liniment prevents Spanish Flu.

## Surnames and Their Origin

**MacKINLEY**  
Variations—Mackinlay, MacInally, MacInally, MacNally, MacGinley.  
Racial Origin—Scottish and Irish.  
Source—A given name.

The origin of these family names is more or less confused, concerning the clans from which the various forms come, so that the following explanation must be accepted as general, and allowances made for the fact that there are numerous individual exceptions.

For the most part, then, these names are founded on the Gaelic given name of "Fionla" or "Fionnladh," which has given rise to the Scottish family names of Finlay, Finley, Finlayson, and the like.

In fact, Mackinlay is but another form of "MacFinlay" (which spelling is not to be met with, the Gaelic form being "MacFionnladh.")

Such forms as Mackinley, Mackinlay and MacInally are to be found mostly among descendants of the Buchanan, but there was also a small sept of this name in the Clan MacFarlane. Sometimes, too, these names are changed spellings of "Mac-an-Leigh," an entirely different name, which is found principally among the Stewarts of Appin. But this name should more properly be rendered in English by MacLay or MacLay.

The forms MacGinley and MacNally (occasionally) are also derivatives of the foregoing Scottish sept names, and in transplanted into Ireland in many cases, though there are other chances through which similar names have been developed in Ireland.

#### A Doll That Swims.

Altogether a novelty is a swimming doll which owes its invention to an Illinois man. It can dive, and cut all sorts of capers in the water.

In the body of the manikin (which is made of wood) is a hollow chamber that extends up into the head. Similar chambers are provided in the upper arms, the forearms, the thighs and the lower limbs. In these cavities small quantities of lead shot are placed.

The arms are pivoted at the shoulders and elbows; the legs likewise at the hips and knees. Thus the doll is jointed, and the limbs may be made to assume any position desired. They have, however, a frictional grip sufficient to hold the joints fixed when set.

If the manikin is to dive, the arms and legs are adjusted suitable for that action. Then, when it is plunged into water, the shot in the body-and-head chamber gravitate to the upper end thereof, and it sinks head foremost until, as it assumes the horizontal, the head rises; the shot presently falling into the lower part of the body cavity and causing the doll to ascend on a slant to the surface like a real diver.

#### Marvels of the Tongue.

When we speak of the "sense of taste" we think at once of the tongue, for here is the seat of the principal nerves of taste, transmitting the sensation which we call "taste" directly to the brain and registering an impression there precisely as sound or pain register.

But, in order to be apparent, the object tasted must be at least partially dissolved, either in water or in the natural fluid—saliva—secreted by the glands of the mouth, for even substances with marked tastes, such as salt or quinine, will not make the "taste impression" upon the brain unless applied in the form of solution to the nerves of the tongue or throat. These nerves are not regularly distributed through the mouth, but are closer together at the tip of the tongue and at the back than they are at the centre and the sides.

The difference in tastes noticeable in different kinds of substances is due to the effect which these solutions have upon the brain cells which control our nerve-reactions, just as sounds have varying intensities and the nerves of feeling indicate different degrees of pain or pleasure.

The Christian indeed is allowed to rejoice where other men rejoice; but he is also bound to rejoice where others cannot.—Leroy M. Vernon.

## DANDERINE

Stops Hair Coming Out;  
Thickens, Beautifies.

35-cents buys a bottle of "Danderine" as any drug store. After one application you can not find a particle of dandruff or a falling hair. Besides, every hair shows new life, vigor, brightness, more color and abundance.

#### DRUMMOND

Racial Origin—Scottish.  
Source—A locality.

Ask the average person the nationality of the family name of Drummond and he is likely to opine that it is English. The Scot knows better, as does anybody familiar with the names of the principal Highland clans.

Still, if you want to be unusually particular, and trace the name back to its real origin, when it was first used as a descriptive surname, you'll find that it is neither English nor Scottish, but Hungarian.

"Dryman" was the form in which it was brought into England from Hungary prior to the advent of the Normans to that island.

Do you wonder what Hungarians were doing in Anglo-Saxon England? Royal marriage has established the connection between the two countries. The mother of Edgar Atheling, the fugitive Anglo-Saxon successor to the English Crown at the time of the Norman invasion, was Agatha, daughter of the King of Hungary. With Edgar in his flight to Scotland and the court of King Malcolm III. Malcolm Canaan was one "Married to Dryman," a Hungarian nobleman. Do Dryman won favor with the Scottish monarch and received from him grants of land in the Highlands. From his first followers there was formed the clan which bears the name of a place in Hungary under the changed spelling of Drummond. This clan played a prominent part in the battle of Bannockburn under Robert the Bruce, and in the rebellions of "15" and "45," losing their lands and their chiefs, who fled to France until the restoration of the rights of the Scottish nobles.

## WINTER HARD ON BABY

The winter season is a hard one on the baby. He is more or less confined to stuffy, badly ventilated rooms. It is so often stormy that the mother does not get him out in the fresh air as often as she should. He catches colds which rack his little system; his stomach and bowels get out of order and he becomes peevish and cross. To guard against this the mother should keep a box of Baby's Own Tablets in the house. They regulate the stomach and bowels, and break up colds. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

**Blockhead.**  
Sergeant—"Now, then, don't you know how to hold a rifle?"

Recruit—"I've run a splinter in my finger."

Sergeant (exasperated)—"Oh, you 'ave, 'ave you? Been scratchin' your 'ead, I suppose!"

#### Minard's Liniment for Coughs and Colds

Grazing on Dominion Forest Reserves  
About one hundred thousand head of stock—cattle, horses and sheep—graze every season on the Dominion forest reserves in Western Canada. This grazing keeps down the fire hazard and at the same time is of great value to the farmers and ranchers in the vicinity of the reserves.

#### MONEY ORDERS.

Pay your out-of-town accounts by Dominion Express Money Order. Five Dollars costs three cents.

#### A Great Feat.

Robert—"Mother, was Robinson Crusoe an acrobat?"

Mother—"I don't know. Why?"

Robert—"Well, this book says that after he had finished his day's work he sat down on his chest."

#### Pensions are being paid to three

and a half million men, women, and children by the British Ministry of Pensions.

#### USE SLOAN'S TO EASE LAME BACKS

YOU can't do your best when your back and every muscle aches with fatigue.

Apply Sloan's Liniment freely, without rubbing, and enjoy a penetrating glow of warmth and comfort.

Good for rheumatism, neuralgia, sprains and strains, aches and pains, sciatica, sore muscles, stiff joints and the after effects of weather exposure.

For forty years pain's enemy. Ask your neighbor. Keep Sloan's handy. At all druggists—35c, 70c, \$1.40. Made in Canada.

#### Sloan's Liniment (Pain's Enemy)

## PILES

Don't suffer with this complaint any longer. Write and I will tell you FREE how I rid myself of Piles by an old family remedy, after years of suffering.

W. F. ALLEN  
Box 30WL Yarmouth, N.S.

ISSUE No. 3-22

#### Quite True.

"I see that Marconi has invented a device by which you can see through brick walls."

"Somebody invented that long ago." "Who was it?"

"The man who first thought of putting windows in 'em."

Unique.  
"The way to run this country," said Knowlton, "is to put thoroughly wise, capable, alert and honest men in control of affairs."

"Yes," answered Miss Keen, "but what are we to do—there is only one of you?"

Still Missing.  
Johnny—"Say, paw, I can't get these 'rithmetic examples. Teacher said somethin' 'bout findin' the great common divisor."

Paw (in disgust)—"Great Scott! Haven't they found that thing yet? Why, they were huntin' for it when I was a boy."

A Guess.  
A leading citizen of an Ohio town was stricken with appendicitis and an operation was deemed necessary. The editor of the local paper, a pessimistic sort, heard of this and printed this "personal" about it:

"Our esteemed fellow citizen, Rufus G. Gethem, will enter the hospital tomorrow to be operated upon for the removal of his appendix by Dr. Smithers. He will leave a wife and two children."

Her Good Idea.  
A little girl in a poor family has to wash a great many dishes. Someone began sympathizing with her one day, remarking what "dudgery" it must be.

"No," she replied. "It's great fun. I have given each dish a name, and they are all my children—my dolls. I talk to them while I am washing them and drying them. I pretend that I am dressing them. I like to have them all nice and clean. And I'm sure they like me for looking after them so well. It's lots of fun."

The man who is not afraid of failure seldom has to face it.

**Mother! Move Child's Bowels With California Fig Syrup**

Hurry mother! Even a sick child loves the "fruit" taste of "California Fig Syrup" and it never fails to open the bowels. A teaspoonful to-day may prevent a sick child to-morrow. If constipated, bilious, feverish, fretful, has cold, colic, or if stomach is sour, tongue coated, breath bad, remember a good cleansing of the little bowels is often all that is necessary.

Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.

#### Cuticura Complexions Are Usually Healthy

The daily use of the Soap prevents clogging and irritation of the pores, the usual cause of pimples and blackheads, while the Ointment soothes and heals. Cuticura Talcum is delicate, delightful, distinguishes. Soap 25c, Ointment 25c, Talcum 25c. Sold throughout the Dominion. Canadian Depot: Yarmouth, N.S. Cuticura Soap shaves without razor.

## MRS. CLARE WILSON GAINED 20 POUNDS

### NEIGHBORS ARE AMAZED BY HER WONDERFUL RECOVERY.

#### Many Friends of Tankville Resident Are Taking Tanlac After Seeing What it Did For Her.

"My recovery by taking Tanlac was so remarkable that my neighbors were all amazed and many of them started taking it," said Mrs. Clare Wilson, Tankville, West Co., N.B.

"My health began to fall five years ago and I grew gradually worse right along. To make bad matters worse I was stricken with influenza and that left me in a truly deplorable condition. It was certainly a lucky day for me when my husband persuaded me to try Tanlac, and it was no easy task, either, for I was so thoroughly discouraged that I didn't believe anything could help me. I am like a different person in every way, my digestion is perfect, I have gained twenty pounds in weight and I am in the best of health and spirits now."

Tanlac is sold by all good druggists. —Adv.

Character is what you are; reputation is what you try to make people think you are.
