

PROFESSOR FESER'S

Patent Lactoscope Milk Test.

This is a new and simple instrument, a recent German invention, which indicates the

Per Centage of Fat or Butter

In milk in an extraordinary short time, and in conformity with chemical analysis. The construction of the apparatus is based upon the

Measurement of the Degree of Transparency of Milk

Which depends upon the contents of fat. Should be in the hands of every person who keeps cows for

DAIRY PURPOSES

In order to test the milk, and reject all such cows whose milk does not come up to the required standard to be the most profitable. Will be invaluable to the dairymen, and must come into general use when its

Efficiency and Utility

Are properly understood. The undersigned has been appointed

SOLE AGENT FOR CANADA,

And will be in a position to supply orders as they may be required.

C. E. CHADWICK,

Sole Agent for the Dominion of Canada.

Office over Post Office,

Ingersoll, Ont.
