TWO CHOICE INDIVIDUALS OF THAT POPULAR BREED THE PERCHERON

Authorities agree that the heavy horse is the class most profitable for the average man to breed. Such horses are sure of a ready market. They present no special difficulties in rearing or training and they always command top prices. The Percheron is one of our recognized draught breeds. It is becoming popular, owing to its many favorable characteristics which cause it to fit in well with the uses to which individuals of the breed may be put. The stallions illustrated are owned and travelled by Mr. Jacob Brown, of Peterboro, Ontario.
