

ATTENTION, MASTER CAR BUILDERS!

The M. C. B. rules of interchange provide for the use of THE STEEL BACK BRAKE SHOE on your freight equipment.

The use of OUR STEEL BACK SHOE will mean a saving in brake shoe maintenance, brake heads and brake beams.

THE STEEL BACK BRAKE SHOE is an economy on all railway equipment.

LET US PROVE IT TO YOU

American Brake Shoe and Foundry Company

NEW YORK

MAHWAH, N.J.

CHICAGO, ILL.

THE HOLDEN CO., Limited, Agents, 354 St. James St., MONTREAL

Ramapo Automatic Safety Switch Stands

No. 20

Branches: WINNIPEG, 320 Donald St. MONTREAL, 506 E. T. Bank Bldg.

This style is especially adapted for use in yards. The throw is parallel. There are no gears. The handle is lifted at an angle at which it can be most quickly grasped, and the stand can be operated with the greatest ease and speed.

This stand measures 10 $\frac{5}{8}$ " from top of tie to top of base fixtures and is furnished preferably with our standard enameled target at such height and of such shape as may be desired. The target is cut out and reinforced at the top to admit lamp tip, so that the only projection above the target is the fit for the lamp socket.

**CANADIAN RAMAPO
