He died, December 6th, 1895, a day or two before the great Miramichi fire. When people were fleeing for their lives to the river and other places of safety, the remains of James Bagge were lying undisturbed in his late home. Strange to say every house in Douglastown, except the one that contained his body was a victim of that conflagration. The Chatham Advance said last week:—

"The case of the editor of the Newcastle Advocate is probably not so serious as that of Messrs. Scott and Stewart, but his publication of the allegation that Dr. Philip Cox of Chatham got a caribou on Bartholomew plains on Saturday, 15th inst, will no doubt lead to serious complications. The inference to be drawn is that the doctor shot the caribou, whereas that could hardly be, as he knows the law and would not kill such game without having a license, which he had not. If, as is probable, some person who had a license killed the animal and Dr. Cox 'got' it from him, it would be all right. Still, as the matter stands, the item published by the editor of the Advocate is practically a charge that Dr. Cox has joined the poaching fraternity, and it is one that a gentleman of his standing can hardly be expected to overlook." As yet we have not heard of any serious complications and do not anticipate any as the item concerning Dr. Cox and the caribou was secured by us from a reliable source. However, we cannot believe that an experienced hunter like Dr. Cox would kill game without a license. So we think the editor of the Advance must have been troubled with mental arrangement when he penned the above lines caused by the Printer and Publisher which accused him of editing the World.
