#### HAS NO FEAR FOR ENGLAND.

Editor Macdonald Before Canadian Club Last Night.

Drink and the Land Question Two Great Problems.

British Commercial Honor-A Lesson For Canada.

It is a matter of conjecture if the members of the Hamilton Canadian Club have ever listened to a more impassioned and inspiring address than that given last night by Mr. J. A. Macdonald, editor of the Globe, at an informal lunchof the club held at the Royal Ho-

umber that have attended a similar

function.

Mr. W. M. McClemont, president of
the well-chosen words, inthe club, in a few well-chosen words, in-troduced the speaker of the evening. "What a Press Man Saw in Great Bri-tain" was the title of the address.

The speaker thanked the president and members of the club for the kind and members of the club for the kind invitation extended to him to speak to them and said he was going to speak frankly.

them and said he was going to speak frankly.

He first referred to the many sights and incidents he had seen in the old land. In speaking of the convention of newspaper men in London, Eng., he said every detail was well attended to. 'In the matter of managing a great convention, England can put it all over us.' Speaking of Lord Rosebery, Mr. Macdonald said "there is no one like Rosebery, for he voices the views of the Empire, and one wishes he had the staying nower. He has not done what he should have done for a man of his ability.' The speaker then touched upon the benefits derived from meeting editors from the dominions over the seas; then of the stately homes of England, of the men at work and at play; and of the great army review at Aldershot, and then said:

In what I have said I tried to set

in what I have said I tried to set forth, only in outline, what we saw in our various experiences in Britain. But what did these things signify? Did they suggest strength and prosperity and progress? Or were there serious reflections as the delegates went from grave to gay and from city to from grave to gay, and from city to country? What was the general im-

Let it be said quite frankly that no ne impression reflects adequately such a variety of experiences. Certainly I, for one, had no serious apprehension, either for the commercial standing or for the national security of Britain. Neither in London nor in the provinces, neither in talking with the statesmen nor in signing up multic opinion among nor in sizing up public opinion among the people, could I find reason for alarm. A crisis? Yes, this is a time of crisis. What time is not critical in such a country or such an empire? But alertness, not alarm is the proper temper alike for the leaders and for the

in the various centres impressed us—I speak for all the overseas delegates—with the amazing vitality and resource-fulness of Britain's industrial life. Havruness of Britain's industrial life. Having regard to all the circumstances, the British manufacturer beats us all. He can hold his own against the world. He makes a success under conditions and on margins that would discourage the average Canadian or American. He may be too conservative in his methods. He may be slow, too, in the commercial slow, too, in the commercial But once he strikes his gait

may be slow, too, in the commercial "uptake." But once he strikes his gait he leads the way. In common markets he holds his own against Germany and America, and again and again we saw the goods being shipped to countries in the face of apparently prohibitive tariffs. (Cheers.)

Now, that does not mean that Britain has no industrial problems. Her broblems are serious. She is only beginning to appreciate the change that has been wrought by industrial education and training of her people. Great Britain is behind, far behind. Germany. But Canada lags behind Britain. The manufacturing classes in Germany are not only more scientifically trained than in Britain, but their working forces are better marshalled and untilized. There is less industrial waste, because there is less personal liberty. The Englishman's right to liberty means the privilege of being a parasite either of the genteel or the vulgar type.

But Britain is learning. The representatives of her great industries are now abroad studying conditions and needs. Her manufacturers are making goods to suit purchasers. If people prefer an American-shaped shoe to a British style, that shape is introduced, and the British-made shoe undersells all competitors. So with other lines of industry. Just as soon as he shakes limself out of his old-time security, the Englishman will catch the new industrial idea and work it out with his old-

Englishman will catch the new indus-trial idea and work it out with his oldpluck and resource and staying

power.
But in Britain, as elsewhere, the industrial problem evolves the social problem. The social condition of the people in the end determines their capacity for work or for trade or for war. On this question I said some things in an article in the Globe a few weeks ago that attracted attention. things in an article in the Globe a few weeks ago that attracted attention which to me was surprising. It was republished extensively both in Canada and in Britain. It was approved or questioned or scorned according to the point of view. Some people took it as descriptive of general conditions or of the working classes, although in very definite terms it confined itself to "that Britain which is out of work, and which has long forgotten how to play."

Gentlemen, with the latest statistics reporting a million people on public re-

reporting a million people on public re-

ilef, and with attendant millions more on the ragged edge—
"No, not millions," said Mr. Sheffield, sitting opposite the speaker.
"Yes; millions, or there would not be a million on public relief," quickly retorted Mr. Macdonaid (cheers), the words I used fell short of the whole sad, distressing truth of the poverty and despair seen almost everywhere in London and Liverpool and Manchester and Sheffield and Gasgow and Edinburgh. We saw it with our own eyes. It made its appeal to our own hearts. The vivid realism of it still haunts us as a nightmare that will not down when daylight breaks.

It is wholly false to say that the problem of drunkenness is not serious almost to the point of alarm. Not mong men alone, but far more among somen, in the poorer districts of British cities the drunken habits of the people make social and industrial re-

form almost impossible. Whole generations of children are bred and born in gin-soaked poverty and hereditary disease. To say that it is not so is to belie both personal observation and certified statistics. To shut one's eyes to the facts, to say "Peace, peace, when there is no peace," as some of the British newspapers affect to do, is to play the foolish ostrich part. To allow the open shame and festering sore of those diseased social conditions to continue would be to mortgage the virility and worth of the nation. The time was when Britain could maintain her supremacy at home and abroad in spite of the inhuman life of her "submerged tenth." That time is past. Democracy has broken down the old walls and safeguards. The tenement is now in touch with the castle. The gravest national perils are involved in the problem of the city slum.

slum.

But the city slum is not the only serious aspect of the situation. Almost more depressing is the condition in the country. No one can see great areas of good land in England and Scotland almost uninhabited without serious reflections as to its significance alike for trade, for social reform, and for national defence. The basis of Britain's prosperity is the land and the uses made of the land. That is true for Canada also, and will be felt more acutely when our population crowds this country as Britain is crowded. With a comparatively small area, and with enormous districts of that available area held idle or devoted, not to work, but to pleasure, the land problem in Britain is vexed almost to the point of revolution. It involves all other problems. Social reform, industrial reform, every other reform, will uninhabited without serious reflections trial reform, every other reform, will lag and fail until a solution is found for the land problem. It is no use spinning fine theories about vested rights Entailed and idle land from which the ning fine theories about vested rights. Entailed and idle land from which the people have been driven is a menace to the State. It is injustice run mad that nearly one-half of all the land of Scotland is owned by twelve men. It is worse than injustice, it is a national crime that in the south as well as in the north grouse and pheasants and deer hold the lands from which were driven the people who bred British leaders in education, in industry, and in war.

Think for one moment, gentlemen, what this depletion of rural population means for a country's trade. The great industries of this city, of all cities, thrive mainly on the people who live and work on the land. Compare the land-working population of Britain with that of other countries. The latest statistics show that of all the people reported as "employed in occupations" in the United States there are

tain with that of other countries. The latest statistics show that of all the people reported as "employed in occupations" in the United States there are "employed on the land" 37 per cent.; in Denmark, 32 per cent.; in Belgium, 35 per cent.; in Germany, 39 per cent.; in France, 44 per cent. What is the percentage in Britain? It is just 10.4 per cent. Is it any wonder British manufacturers are handicapped because they lack home markets? And they never can have their rightful possible home markets until the land of Britain is delivered from the hoary incubus of entailed landlordism and opened for the life and labor of the people. And 'this movement of the people from the country to the city not only accentuates the problem of unemployment and lowers the standard of living, but it makes still more acute the land question as applied to city conditions. This is the crux of the question now before the British public. Its solution will be one of the first steps in social and industrial reform.

But the forced growth of the cities

be one of the first steps in social and industrial reform.

But the forced growth of the cities at the expense of the country has its reflex influence on the standard of national character. For a hundred years the cities of Britain have been saved from decay, their professions have been recruited, and their industries have been manued by the contest influence of the property of great pairs and blood. have been recruited, and their industries have been manued by the constant influx of good brains, and blood, and nerve, and muscle from the homes and schools of the country districts. Three generations of city degeneration and they are in the slums and new brain, and blood, and nerve, and muscle come up to carry on the burdens. The city is a hungry devourer of human life. The country breeds and grows the fresh recruits. But what will happen to the city, to its universities, and industries, and professions, if the breeding places of them are the best stock of the British race, the energetic and resourceful, are sent overseast to Canada, or to Australia, or to South Africa? If the glen school is colsed and the "lad o' pairts' from the country parish is no longer the pride of Scotland, will the glory abide that made Scotland great? And who will tale the places of the men from the downs of Devon, and the moors of Yorkshire, and the glens of Scotland when the call of battle comes? Will the enervated sons of the slums stand as of old stood the Buffs and the Black Watch? Or, as Kipling has it:

"Will your rabbits war with your foe-

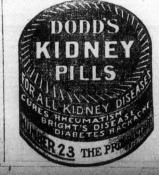

"Will your rabbits war with your foe Will your red deer horn them for hire?"

No, gentlemen, it will not do for us as Canadians to be ignorant of the forces and movements making either forces and movements making either for strength or for weakness in the Mother Country. And it will not do for us to be careless or neglectful of the same tendencies of life in our own country. We have in our Canadian cities the germs of the slum conditions the same tendencies of life in our own country. We have in our Canadian cities the germs of the slum conditions of Britain. Worse than slum conditions is the slum spirit. Canada must profit by the experiences of older equatries. Clean civic life and robust and prosperous life in the country are as needful for our social, industrial and national salvation as for the redemption of Britain. Unless the new nations of the Empire are warned the sufferings of the motherland will have been in vain.

A hearty vote of thanks was proposed to the speaker by Mr. Adam Brown who did so in very appropriate word Mr. J. H. Smith seconded.

Real Thing.

"And this," said the hostess, who was showing some relies, "is the trunk one of my ancestors brought over on the Mayflower."
"In other words," rejoined the guest, "it is the trunk of your family tree."

### TIMES PATTERNS.

CLOTHES FOR TEDDY BEAR.

No. 5982.—Dame fashion has decreed that Teddy Bear must have an outfit as well as Miss Dolly. The two cunning little suits here pictured are not at all difficult to make and will prove fascinating work for nimble little fingers. The Rough Rider suit is made of khaki and will require ½ yard of 36-inch material for the 15-inch size. The overalls are of denim and will need ¾ of a yard. The patterns are cut in 3 sizes; 12, 15 and 18 inches.

12, 15 and 16 inches.

A pattern of this illustration will be mailed to any address on receipt of 10 cents in silver or stamps. Pattern here illustrated will be mailed to any address upon receipt

Address "Pattern Department," Times Office, Hamilton.

It will take several days before you can get pattern.

BRIGHT, BRIEF, BREEZY GOSSIP OF INTEREST TO THE SOLDIERS

and 91st Regiments have been working hard to be in good shape for the inspec the parades have been well attended, and the drift so well gone that the officers are quite pleased with the result.
The 91st inspection will take place on
Wednesday night, and the 13th on Friday night.
At the manocuyres on Thanksgiving
Day the A. M. C. will be represented,
and a couple of ambulances will also be
in the neighborhood of the sham fight.

The board of officers elected to exam-The board of officers elected to examine the candidates for tactical fitness for command, M. O. 256, are: President, Major-General Sir Percy N. Lake, K. C., N. G. C. B.; Col. W. G. Gwatkin, D. of O. and S. D.; Lieutt-Col. H. E. Burstall, R. C. H. A.; secretary, Major D. I. V. Eaton, R. C. A. The following officers were permitted to present themselves for examination as laid down in K. R. and O. 1964, pagagraph 25a, for rank and O., 1904, paragraph 25a, fo and O., 1904, paragraph 25a, for rains of colonel; Lieut. Col. Logic, LWh In-fantry Brigade; Lieut. Col. D. MacL. Ince, 13th Infantry Brigade; Lieut, Col. J. P. Landry, 1th Infantry Brigade; Lieut. Col. Hughes, 6th Infantry Brigade.

A military staff course will be com-menced at Toronto, Montreal and Hali-fax or elsewhere, in December of this year, if sufficient men can be obtained to take up the work.

Sergt.-Major Hill, of the A. M. C. Sergt. Major Hill, of the A. M. C., has resigned from the corps and gone to Vancouver. As he had served for 22 years in the local garrison his comrades regretted deeply that business compelled him to give up his position.

Liout.-Col. G. S. Jones, Director-Gen eral of medical services for the Canad-ian Militia was in Washington, D. C., last week representing the Canadian Medical Services at the convention of Association of Military Surgeons of the

United States.

The Canadian Arbitration and Peace Society explain that their aim is to show that peace promotes prosperity and advancement and that the people are the ones who control peace; that the time is near for the establishment of an International Court of Justice and that the approaching close of an unbroken century of peace between Canada and the United States is a fitting occasion for directing the eyes of the world to the happy results of so prolonged an interval of relief from the disasters and horrors of war. Such a scheme which would benefit the world in general should, and no doubt would, receive the support of all, and every one would welcome an International Arbitration Court, but if it advocated disarmament before the establishment of an International Court, then it would meet with considerable opposition. Nearly every soldier would welcome such a scheme as there are very few who are craving for war, as is generally supposed.

The militia authorities are now considering the matter of a well-defined policy in regard to armories. General Lake speaks of it in his report, which

"To begin with, there is always a certain amount of soreness felt by rural corps at the large sums of money spent on armories for city corps, when they themselves can get no accommodation. Some inequality is, no doubt, unavoidable, but, even between rural corps themselves graye contrasts exist. Sometion. Some inequality is, no doubt, unavoidable, but, even between rural corps themselves, grave contrasts exist, Sometimes, in a single regiment, one squadron or company will have a good armory, with caretaker provided, which it instead of wooden planks, for the deck

During the past few weeks the 13th seldom uses, while another will have no accommodation of any sort, and its commander has to pay out of his own pocket far more than the Government allowance for care of arms. This is es pecially the case in the west, where suit pecially the case in the west, where sur-abuc buildings are searce, and rents and labor high. If arms, saddlery, uni-forms and equipment are to be kept in good condition, it is necessary to pro-vide suitable accommodation, which, in

Last night the Thirteenth Regiment had another record attendance at parade, there being 438 men in line. The practice was sharp and good, and the men are in fine form for the inspection tice was sharp and good, and the men are in fine form for the inspection which takes place next week. The parade state was as follows: Ljeut.-Col. Moore, Majors Mewburn and Ross; Capt, Domville, adjutant; Capt. Herring, paymaster: Lieut.-Col. Griffin, surgeon; Capt. Lester, quartermaster; Capt. Forneret, chaplain; staff sergeants 10, A 25, B 48, C 43, D 50, E 49, F 28, G 32, H 57, buglers 30, brass band 38, bearers 15, signallers 5, making a total of 438. signallers 5, making a total of 438.

D. Lamb; next for duty, Col.-Sergt

By order, J. W. Bell, Captain and Adjutant, 91st Regiment.

The leaps and bounds by which airships and flying machines are coming to the front is evidenced by the enthusiasm of the aviators gathered together at Rheims, where over forty acraplanes have been assembled for the races, which have now become an annual event in France. On this side of the flying the same and the same are same and the same and the same are same as the same are same and the same are same as the same are same are same as the same are have now become an annual event in France. On this side of the Channel we have Mr. F. S. Cody declaring he has a machine that can take a journey of a hundred miles without descending, and he has already shown that his machine will accommodate a passenger as well as himself. But the most startling news is from Germany, which is shortly to be in possession of a fleet of sixteen Dreadnoughts of the air, all of which can be used for war purposes. Guns have likewise been made for these war machines that can throw 1.9-inch shells at the rate of sixty shots per minute. Unless the airships are very large it will not be possible to carry a big supply of ammunition for these guns, and a rate of fire which releases nearly a hundred pounds of dead weight from an airship's car in one minute should accounts. of fire which releases nearly a hundred pounds of dead weight from an airship's car in one minute should seriously affect the management of the vessel, unless this difficulty has been met. Those who talk about this fire being fatal to a battleship are speaking without the book, however, for all the men in a modern battleship would fight behind the armor of casemate, a turret or conning tower, if attacked by an airship; and off these structures 1.9-inch shells would glance like peas off a turtle's back,

## Given Up to Die

No. 100 George st., Sorel, Quebec.
"I suffered from womb disease for seven years, with dreadful pains over the front of the body, over the back and down the legs. I had indigestion and chronic constipation and the constipation was so bad that I went sometimes for ten to fifteen days without any action of the bowels. I was ill in \(\text{cd}\) for one whole year. At one time I was so low that everyone thought I was going to die, and the last Rites of the Church were administered to me. I was treated by six different doctors without any ben-

MADAME JOSEPH LIRETTE efit. Then I got a sample of "Fruit-a-tives," but I had no faith in them at all, tives," but I had no faith in them at all, and I would not have taken them only my husband begged so hard for me to try them. As soon as I began to take "Fruit-a-tives" I grew better, the bloating was relieved, the sleeplessness was cured, my stomach acted, and the bowels were moved, but above all the fearful womb pains were made easier.

I have taken eighteen boxes in all and I am now perfectly well again."

fitself would be sufficient protection against the light guns that airships are likely to carry for many years yet.

From too recent experiments in Germany, at Juterbog and Darmstadt, it would appear that the gun is the only effective weapon against balloons. On both occasions the target was supplied by small captive balloons of the German dragon type, floating at an elevation of 400 or 500 metres. At Juterbog 4.800 rounds were fired by infantry and 2,700 rounds by machine guns, without 2,700 rounds by machine guns, without bringing the balloon to earth, though 70 were subsequently counted. In the Dryssydd experiments two dummics were placed in the car. The infantry company fired 5,000 rounds, followed by 4,000 rounds from machine guns, without aparent result. Finally a light how-live the car was a superior of the car was a superior for the car was a superi nt aparent result. Finally a light now-tizer battery brought down the balloon in the second round, when 20 hits were ound from rifle bullets, one of them brough the leg of one of the dummies. -United Service Gazette.

### **USED PIGEONS.**

#### They Carried Smuggled Cocaine Into Penitentiary at Pittsburg.

Pittsburg, Pa., Oct. 15 .- Warden John Francies, of the Western Penitentiary nere, has discovered that it is impossible here, has discovered that it is impossible to stop the smuggling of drugs by convicts, and he made the discovery all by accident. Connected with the big penitentiary is an immense flock of pigeons, and last Sunday the warden decided that he would have pigeon pot pie. He sent a servant into the pigeon cote to capture the birds. When the cook was cleaning two of them, both of which happened to be homers, he came across two goose quills tied beneath the wings of the pigeons. Upon examination it was found that these quills contained cocaine.

After a rigid examination, the warder the prison had an accomplice on the out side. This accomplice would capture sev side. This accomplice would capture several of the pigeons when they flew into the street outside the big prison walls to feed. He would attach the goose quills containing the drugs beneath the wings of the captured pigeons, after which they would be released and would return to the prison dove cote. The trusty then would go to the cote, examine the pigeons and collect the drug, after which he would sell it to his fellow-convicts.

warden Francies declares there is but one way he can stop the traffic in drugs—to kill every pigeon in the place.

As the result of the sting of a wasp Mary Jame Charteris, 26, who lived at Rosehall Johnstone. Dumfries-shire, has died. She was going into church on Sunday when a wasp stung a finger of her left hand through the glove. She felt the pain during the service, and afterward became faint, and had to be assisted to a doctor's house. Bloodpoisoning set in, and she expired after several days' serious illness.

Spent Two Days and Nights Looking For Husbands.

Teronto Motorman Took Them in and Cared For Them.

Toronto, Oct. 16 .- The story of how Mrs. Charles Chaplin and Mrs. Augusta Wray, of Belleville, lost their husbands in Toronto and finally found them, after two nights and days of earnest and uneasy search, is of more than ordinary interest, even in a great city where in-teresting things are occurring all the time. The story includes an incident of rare kindness on the part of Mr. and Mrs. George Garlich, 14 Belmont street, and ends very happily for all concerned.

Mrs. George Garlich, 14 Belmont street, and ends very happily for all concerned. The story begins at the Union Station Wednesday night, when Mrs. Chaplin and Mrs. Wray arrived in this city from Belleville. The former was accompanied by five children, and the latter by one child. The women had come to Toronto in pesponse to a request from Mr. Chaplin that his wife should come at sace, as he had found employment at his trade, plumbing. He did not state when he would expect her, but she got the children ready and left Belleville on the 5 p. m. train. Mrs. Wray's busband was also in Toronto 'coking for work, and as Mrs. Wray and Mrs. Chaplin were friends the two youen agreed to come together.

They were disappointed not to find either husband waiting to receive them on their arrival at Union Station. They waited there some time,

them on their arrival at Union Sta-tion. They waited there some time, then realizing that the husbands had not expected them so soon they start-ed out to try to find an acquaintance of Mrs. Chaplin's on Belmont street. In this they failed, and, as they had not sufficient money to pay their way at a hotel they were in a sad quandary. They stood at the intersec-tion of Belmont street and Yonge

street, wondering where they should go, as it was almost midnight. For-tunately for them Mr. Garlich hap-pened along. He is a motorman on a Yonge street car, and he had ob-served the two families on their way to Belmont street.

to Belmont street.

Although Mr. and Mrs. Garlich have nine children of their own, Mr. Garlich escorted the two Belleville women and their families to his home, where they were given supper and provided with lodgings for the night. Thursday was spent in a fruitless search for the two husbands, whose address had not been sent to Belleville, and again vesterday the search search for the two husbands, whose address had not been sent to Belleville, and again yesterday the search was continued. The good offices of the City Relief Officer were called into requisition, but it was not until last night that the men were located. While Mrs. Chaplin and family remained at Mrs. Garlich's, Mrs. Wray went to the Salvation Army Shelter on Wilton avenue, where she found Mr. Chaplin and Mr. Wray. They had just registered for the night, quite unconscious that their wives and children were in this city. The reunion was a happy one.
