And the proper personal proper 2d on all sorts of wheat, but 1d decline on corn during the week; and markets during last week seem to have been commarkets to-day seemed to be still tending upwards.

Markets during last week seem to have been commarkets and rye straw in sheaves; loose wheat straw sold at \$4 per ton.

nad risen to 1,950,000 quarters, against 1,-326,000 on the 26th ult., and 1,572,000 quarters at the corresponding date last year. The pproximate quantity of grain on passage for the United Kingdom for orders, expected to arrive turing the four weeks from Sept. 25 to Oct. 23, is:-Wheat, 334,000 quarters, comprising 18,000 quarters from the Danube and Black Sea; 126,000 quarters from Atlantic ports; 100,000 quarters from California, and 90,000 quarters from Chili and Ausstralia, along with 151,900 quarters of corn, all from American Atlantic ports. Further cable advices state that in the week ending on the 6th inst., narvesting had been carried on in a very iesultary manner, in consequence of continued cains; much of the grain in various parts of the Kingdom remained unstacked, the greater part of the wheat and barley recently cut being in such a lamp state that sprouting or heating in the stackwould inevitably ensue. In the South of England many fields were cleared, but the results upon rashing were most disappointing as to the con lition, quality and yield. Judging from the few amples shown, the wheat was thought to be light, iamp and sprouted; the barley was in many in stances discoloured and unfit for malting. Trade was firm but with diminished excitement. Continental advices to the 29th ult. are rather meagre. France as well as England complained of unseasonable rains, desultory harvesting, bad results on threshing and new grain selling at lower prices than last year. Country markets were being better supplied and all sound wheat was bringing 49s to 53s per qr, in the ports foreign wheat continued to imp and red winter at Havre was quoted at 54s 3d to 55s per 480 lbs. At the Paris weekly market home-grown wheat was held at an advance of 1f to 1f 50c on the week, whilst foreign was scantly offered and held 2f 50e to 2f nigher. The quantity of American wheat on passage to France by sailers, up to latest postal dates as increased to 640,800 qrs, against 426,800 qrs in action from the previous high prices; but imports on a large scale at Antwerp. In Germany the trade was rather lively, in sympathy with the rise abroad,

Government official circular, in regard to sian cereal crops, has recently been issued Russian Government. The cereal harvest, ig to this report, will be fairly good. Some small advancing prices. The demand is still maintained, and these prices we believe would be repeated to day; but he market is quiet, with offerings small and holders apparently inclined to hold out for higher prices, which buyers refuse to pay. English advices to the 25th the tendency do accumulate stocks there. Iveries of wheat at seaboard ports for kending on the 4th inst. were 5,662,210 5,137,904 bush the previous week, and bush the corresponding week in 1873. Cable advices to Montreal report a good enquiry, but a quiet market. On the street receipts have been small and prices firmer, but others under the corresponding week in 1873. PORK—Nothing doing in round lots; but small lots fairly active and firmer, at \$13.50. lots fairly active and firmer, at \$13.50.

Bacox—Stocks have run so very low that there is scarcely any to sell. Cumberland is not in the market. Long-clear has sold in cases at \$1c. Short ribbed has been going at \$1c. to \$1c. in cases, and various so ts of breakfast bacon at \$2 to \$1c. with stocks of all sourts very small

Hars—Have been in rather improved demand at steady prices; small lots of smoked or canvassed have sold at \$11\tilde{t}\$ to \$1c. but lots of 100 or more could be had at \$11c. Pickled are unchanged at \$10\tilde{c}\$.

Hors—Some few bales of new have been on the market, but they have been held so high, from 30 to 40c being asked, that buyers have held aloof.

There is no movement reported.

Markets during last week seem to have been comparatively quiet, with high prices checking the demand in the country, offerings of home-grown wheat small and of the very poorest quality; but floating cargoes firm with a good business. The total supply of wheat and flour from all sources in the week ending on the 4th inst. seem to have been from 20,000 to 30,000 quarters in excess of the average consumption. The great mass of this supply, however, consists of imports; home deliveries in the first six weeks of the season seem to have been only 362,000 quarters against 1,376,000 quarters in the first six weeks last year. There can be doubt, however, that home deliveries must increase very soon, and when they do a reaction on the late advance seems by no means improbable, particularly as the supplies in transit for the United Kingdom on the 9th inst., and risen to 1,950,000 quarters, against 1,700 quarters, against 1,700 quarters, against 1,700 quarters, and risen to 1,950,000 quarters, against 1,700 quarters, against 1,700 quarters, and risen to 1,950,000 quarters, against 1,700 quarters against 1,700 quarters and risen to 1,950,000 quarters, against 1,700 quarters, and risen to 1,950,000 quarters, against 1,700 qu

CATTLE. TRADE—Has been generally quiet since our last. TRADS—Has been generally quiet since our last.

Breves—Receipts have been on the increase, but have consisted almost entirely of the lower grades.

Of really first-class cattle, that is steers averaging 1,200 lbs and upwards, there have been none offered, and there has been nothing doing either in lots for export or for Montreal; prices of first-class have been purely nominal, but if offered they would have brought \$4.25 to \$4.50. Second-class, that is light steers and heifers and heavy oxen and bulls, have been abundant and selling slowly for the local market at from \$3.25 to \$3.75, with a fewf ploked taken at \$4 in default of first-class. Third-class have been abundant and very slow of sale, with prices weak_at \$2.25 to \$2.75.

SHEEP-The market has shown no improvement since our last; no demand has been heard for ship-ment, and very few only have been wanted for the local market; prices are sgain lower, with sales of first-class at \$4 to \$4.50 and no other grade wanted at any price.

LAMES—Receipts have fallen off, and the rush of the last fortnight seems to have come to an end; all offering have been wanted and selling at a slight advance. First-class, dressing from 40 to 48 lbs, have recovered the late decline, or possibly something more, and have been bringing \$3.25 to \$3.75, but the latter for top-weight and top quality only. Second-class, also, are firmer, ranging from \$2.56 to \$3.

\$3.

CALVES—Have shown no change; really choice have been wanted, and all others neglected. First-class, dressing from 120 lbs upwards, have found a steady sale at 6 to 7c per lb, or from \$7 to \$9 each. But second-class, dressing from 75 to 110 lbs, have been slow of sale and easier at \$4 to \$5 each. Third-class have not been wanted at any price, and may be set down as unsalable.

Woot.—Has been more active at advancing prices. Several lots of fieece have sold at 22 to 23c, some lots of 10,000 lbs, or thereabouts, having changed hands at the latter figure; we understand that for one large lot of choice quality 23c has been bid and refused. Super also has been selling at 22 to 23c; and extra is scarce and wanted at 23c.

and extra is scarce and wanted at 28c.

Tallow—Has been offering abundantly, and selling readily at before at 51c, with all readily taken at this price when of good quality.

Quotations stand as follows:—No. 1 inspected, choice, \$8.50; No.3 2 inspected, \$7.00; No. 3 inspected, \$6.00; Calfakins, green, 13c; Calfakins, cured, 13t to 14c; addistins, green, 13c; Calfakins, 50 to 70c; Wool, "fleece, 22 to 23c; Wool, pulled super, 22 to 23c; extra super, 26 to 27c; Wool, pickings, 6 to 7c; Tallow, rough, \$4c; rendered, 5 to 52c.

Trade has been active at advancing prices. The tendency has been in my with sales of selections at 13 to 14c, the latter for very choice only; and of good round lots with white thrown out at 10 to 11c. Some small sales of inferior have also been made about 5c. The demand is still maintained, and these prices we believe would be repeated to-day; but the market is quiet, with offerings small and holders apparently inclined to hold out for higher prices, which buyers refuse to pay.
