os. Brookfield, of Halifax, has re-d the contract for the erection of the refinery works in that city, the sum \$83,000.

steamer Prince Alfred has been conntly making trips all winter from iarton to Owen Sound, an unprecedent-event in the navigation of that part of

There are rumours of a proposed amal-mation of the Windsor and Annapolis d Western Counties railway lines under e management, but nothing definite has t transpired.

Mr. Logan, who for the past few years as been publishing the New Glasgow astern Chronicle, leaves the management that paper, and takes a position on the aff of the Montreal Witness.

an of the Montreal Witness. Mr. George Leadston, of the township Anderson, shot, on Saturday last, a rge white owl on the farm of Peter owan, measuring four feet seven inches om tip to tip. The shot was made with

A Truro lady presented her husband rith twins this week. The *Guardian*, oticing the event, says :- "Two years month and 1 day previously a similar atastrophe occurred in Mr. L.'s usually eacoful household."

Fish breeding, says the Dundas Banner, a new industry in these parts, and it is . John Kievill, of West Flamboro', who about to engage in it. He is going into e breeding of speckled trout on a large ale, and is fitting up his ponds for the

The Peterborough *Review* says :--" We are glad to learn that the lumbermen in our northern districts are well satisfied with the winter's work, though in seme cases the logs have had to be left over, awaiting Vennor's snow storm in March. This success, combined with the advance in the price of lumber, should be of advan-tors to this important industry." to this important industry.

age to this important industry." An accident of a very severe character courred to Messra. MoVicar and Adams, it the Sarnia Canadian. On their way te Brigden they had a break-down. The cornes became unmanagable, when both nen were thrown out heavily into the litch. McAdams escaped with alight in-uries, but McVicar was rendered insensi-ble. He was taken to a farm honne and a He was taken to a farm house, and a tor sent for. He remained unconscious ing the night. Hopes are entertained f his recovery.

A grand tes meeting, in aid of the build-A grand tes meeting, in aid of the build g fund of the Methodist church, was old in Utterson last Wednesday evening, obt. Scarlet, J. P., was chairman, and ated that were it not that an individual t collected over \$300 and never ac-nted for it, the present effort would be required. A most enjoyable evenwas spent, and \$81 realized.-Forester. Mr. Thomas Scott Elhott, of Guelph, s received the medal awarded for the has received the indust awards for the best washing machine exhibited at the aris Exhibition in 1878. Messrs, Hamil-on, Dunlop & Co., of the Pelee Island rineyard, who have their warehouses at ord and Montreal, have received a ilar medal for their wines. The workmanship on the medals is very superior, and they are handsome trophies.

Mr. John Watt, of the 4th line, Sarnia, Mr. John Watt, of the 4th line, Sarnia, tely imported into the county a span of ares which good judges pronounce to be e best draught team in Lambton. The imals are from imported Clydesdale ock on both sides; and though only three rs old, bring down the scale at 2 800 They were purchased for Mr. Watt m Mr. Robert Allan, of the township of nley, by Mr. R. Whitmarsh, of Sarnia, Stanley, by Mr. R. Whitmarsh, of Sarna. In the death of Col. John V. Thurgar, which took place on Sunday, St. John loses one of her oldest and most respected citizens. The deceased, who had reached his 83rd year, had been for nearly sixty years closely identified with the active militia of this country, entering the service as a compare in the voluncer artillery and as a gunner in the volunteer artillery, and rising step by ster until some few years ago he retired from the active service with the rank of Colonel. On Saturday, the 28th ult., Mezsrs. Richard Wiles and Robert Birch, of An-derson, cut one cord of stove-wood in the hort time of eleven and a half minutes, stopping to take a short rest but once dur-ing the time. The tree was fel ed for them, and they started at the butt and cut off twelve lengths before resting. It was nches through. The work was performed in the farm of Mr. John Wiles, on the ownline between Fullarton and Blan-We have heard many instances recorded lately of the early arrival of summer birds in this section of the country, but the strangest thing we have heard in this con-nection is vouched for by Mr. John Dul-bridge, of Usborne. He says he was walk-ing through his pasture field on the 5th of March, and was surprised to see a common grey bird fly up before him in an excited way. On looking near his feet he dis-covered a nest in the old grass containing five eggs, upon which the grey bird had been sitting. He wants to know what other farmer can breed grey birds as early in the spring as this.—*Exceter Times*. The Kingston News says :—"We have been informed that an article known sas ' chemical butter, is being palmed off in this city on retail purchasers as genuine butter, and also that sev-eral carloads of it have lately arrived here by the Grand Trunk. That the arti-ole is a fraud we have no deubt, judging We have heard many instances recorded cle is a fraud we have no deubt, judging by the specimen shown us. We have flour and pork inspectors, but for that valuable and much-used commedity we have none. Knowingly selling such an article sheald be made a misdemeanour, and punished with fine or imprisonment—or both. Numerous complaints have been made about this spurious imitation, and the sooner the remedy is applied the better." The most cheering reports come to us, says the Cape Breton Advocate, from the copper mines of Eagle Head, Garbarus Bay, and French Road. At the first-named place a shaft is being sunk to a depth of 100 feet, and we understand that operations will commence at the latter ere long. It has been proven that at both these places there is an abundance of cop-per of an exceedingly rich character—in fact, from what we can learn, that portion of the Island now being developed, is one cle is a fraud we have no deubt, judging by the specimen shown us. We have flour per of an exceedingly rich character—in fact, from what we can learn, that portion of the Island now being developed, is one unending mass of ore, analysis of which shows as great, if not greater, percentage of copper than the best Newfoundland ore. Under these circumstances, we can with confidence hold out the hope of good times coming. We also have good reason to be-lieve that eventually these mines will take first rank amongst the best on the conti-nent, and will be entitled to as prominent a place amongst the country's industries as our coal mines do at the present day. The Newmarket *Reformer* records the death of another of the old settlers of North York. Through the medium of a letter from one of the family it learns that Mrs. Samuel Rose departed this life at her home in Michigan on the 16th of February last surrounded by sorrowing friends. In the year 1877 she had a paralytic stroke, from which she never fully rallied, and from the effects of which she expired at the time and place above mentioned, being in her S3rd year. Deceased was the eldest sister of Mr. Samuel Johnson, of this village, and daughter of the late Jacob Johnson of East Gwillimbury. Her husband, the late Samuel Rose, died some two years ago, shortly after their removal to Michigan. The family are perhaps as widely known as any of the old settlers in the county, and were highly respected by every one with whom they came in contact. Mr. Rose was one of the vesterans in the war of 1812. Mrs. Rose came to Canada in company with her parents from Pennsylvania, in 1801, when they settled on the farm in East Gwillim-bury, at a time when all was a dense forest, and Canada was in its infancy. bury, at a time when all was a dense forest, and Canada was in its infanoy. The husband and wife were for man years faithful and consistent members the regular Baptist church, Mr. Re-occupying the position of descon in the church at Burchard town until his remo-
