How Zam-Buk Saved My Leg!

"For years I could hardly walk," writes Mrs. Jeffrey, of 31, French St., Methuen, Mass. "I was treated by doctors for an ulceration which started in my ankle and extended to the knee. Though sceptical when I read of other legs being healed by Zam-Buk, I gave the balm a trial. Whilst Zam-Buk didn't put my leg right in a day or two, it did ease pain and inflammation wonderfully. Persistence soon convinced me that thanks to Zam-Buk, I was at last on the sure road to recovery, and in time the terrible sore thoroughly healed. For three years now, I've had no leg trouble." In obstinate sores, old wounds and ulceration where destruction of the tissues has occurred, Zam-Buk displays extraordinary healing power. Sufferers marvel at the way it soothes pain and inflammation, purifies diseased parts and stimulates the growth of new healthy tissue. Whereas ordinary ointments simply cover over surface trouble, Zam-Buk healing is permanent for it leaves no trace of disease to break out. Zam-Buk proves equally effective in eczema, ringworm, salt rheum, piles, poisoned sores, abscesses, burns, scalds, etc. All chemists and dealers O.C.

Safeguard Your Valuables before it is too late

It is not wise to leave money, securities, jewelry, or other valuables unprotected in your home.

A Quick Relief for Headache

A headache is frequently caused by badly digested food; the gases and acids resulting therefrom are absorbed by the blood which in turn irritates the nerves and causes painful symptoms called headache, neuralgia, rheumatism, etc. 15 to 30 drops of Mother Seigel's Syrup will correct faulty digestion and afford relief.

"Cascarets" for Constipation

Just think! A pleasant, harmless Cascaret works while you sleep and has your liver active, head clear, stomach sweet and bowels moving as regular as a clock by morning. No griping or inconvenience. 10, 25 or 50 cent boxes. Children love this candy cathartic too.

Backache—Rheumatism

For over 50 years Minard's Liniment has been a household word in thousands of homes all over Canada. It quickly relieves rheumatism, backache, neuralgia, sciatica, sprains or bruises and pain of any kind. None give better satisfaction.

St. Stephen Smallpox Of Very Worst Type

St. Stephen, N. B., March 7.—Dr. Wade, district medical health officer, arrived in town today in connection with the smallpox case which was reported in today's paper. Dr. Wade said tonight that it was genuine smallpox and of the very worst kind. He will be in town for a day or two and every precaution will be taken to stamp out the dreaded disease. Every one that has come in contact with the occupants of the Barger home has been vaccinated.

Flax Disease

Flax is one of those plants which fortunately is not very seriously affected by diseases producing fungi and bacteria, although it is subject to a number of diseases which may, under certain conditions, cause considerable loss through reduction of the yield and quality. The most important of these diseases in Canada is the flax wilt. The fungus causing flax wilt lives in the soil, and attacks young plants chiefly, causing them to wilt and die. It may also attack older plants which turn yellow and die slowly. If flax is continuously grown in an infected field the fungus spreads to such an extent as to make the crop almost worthless. This fungus not only lives over in the soil but is spread by its spores clinging to the seed from diseased plants.

This disease can be successfully controlled by adopting three precautionary measures.

First, by the use of clean plump seed, grown in a field which has shown no sign of the disease, and treated before seeding with a solution of formalin, 1 pound in 40 gallons of water. It takes about one-half gallon of this solution to treat a bushel of seed, and it is most advantageously applied by spraying it on the seed as it is being shovelled over seed should then be frequently raked until the entire surface is damp. The seed should then be frequently raked over to aid in thorough drying.

Second, by adopting a system of rotation which would eliminate the growing of flax on the same land in successive years.

Third, by growing those varieties of flax which have been shown to be resistant to the flax wilt in that neighborhood.

The flax is also attacked by a rust which in the early part of the season can be recognized by small, yellow or orange masses of spores which serve to spread the disease in the field. At that stage of its development the rust lives over the winter and becomes the source of infection the following spring. This disease is not usually severe in Canada and can be prevented by a proper rotation and the destruction of waste straw and flax refuse that may harbour the disease.

Thus to protect flax from disease the following measures should be adopted.

1. Use clean plump seed from uninfected fields, and treat it with formalin solution before planting.

2. Do not grow flax in the same field for two successive seasons.

3. Destroy all waste flax straw and refuse.

4. If wilt is very bad, grow only the varieties which have proved to be resistant to the disease in that district.

Grade IV.—Cecilia Willette 1; Addie Gould 2; Georgina Gould 3.

Grade III.—Frank Blackmore 1; Janet McAndrew 2; Leslie Muzzereall 3.

Grade I. (Div. I)—Ray McFarlane 1; Mary McCoombs 2; Myles Wilson 3.

Grade I. (Div. II)—Evelyn Thercault 1; Eugene Furlotte 2; Justus White 3.

A.A. Dysart, Kent, Speaker, New House

The address at the opening of the New Brunswick legislature, on Thursday, March 17, will be moved by Dr. L. A. Curren, M. P. for St. John county, one of the new members of the House, and will be seconded by A. J. Boudage, M. P. for Kent.

A. A. Dysart, Kent, a resident of Pictou, has been selected for the Speakership as successor to Hon. Dr. Hetherington, who has been elevated to the cabinet. Mr. Dysart will be nominated on the opening day of the session by Premier Foster.

MAN WANTED

Wanted A man for hard work and rapid promotion: A man who can find things to be done without the help of a manager and three assistants.

A man who gets to work on time in the morning and does not imperil the lives of others in an attempt to be first out of the office or store at night.

A man who is neat in appearance and does not sulk for an hour over time in emergencies.

A man who listens carefully when he is spoken to and asks only enough questions to insure the accurate carrying out of instructions.

A man who moves quickly and makes as little noise as possible about it.

A man who looks straight in the eye and tells the truth every time.

A man who, when he does not know says "I don't know" and when he is asked to do anything says "I'll try."

A man who does not make the same mistake twice, who is not goody goody, a prig or a cod, but who does the very best he knows how with every task entrusted to him.

This man is wanted everywhere.

Age or lack of experience do not count. There isn't any limit except his own ambition. To the number or size of the jobs he can get. He is wanted in every big business throughout the country.

If you are such a man. Watch the advertisements. They tell of most of the big opportunities.

WILD GESE SEEN

A flock of wild geese were seen over the town one day last week. It is said their appearance predict an early spring.

Your grocer will tell you frankly that he makes less profit on Red Rose Tea than on other teas. The only object he has in recommending it is to see that you get the best quality possible.

WRIGLEY'S

"After Every Meal"

Next time you want to concentrate on a piece of work just slip a stick of WRIGLEY'S between your teeth.

It's a wonderful help in daily tasks—and sports as well.

The Flavor Lasts

Hazards disappear and hard places come easy, for WRIGLEY'S gives you comfort and poise—it adds the zest that means success.
