Learn How to Get Back Your Strength

(By A. Wellman)

"Those are the worst symptoms of weakness," said Dr. Soakem, after I had told him of my condition.

I came to his office hoping to get something that would relieve me of the suffering which took all pleasure out of my life. My back was weak and painful, my head ached. I was nervous and had no energy or ambition. The loss of power was sapping my vitality, and I knew that I was getting worse every day.

"Here is some medicine that will 'fix you up,'" said Dr. Soakem. "This stimulant will give you energy and take away that tired, debilitated feeling of which you complain. The other is for your nerves; it will stupify them, so you can't feel any pain.

"You will find directions on the bottles, and after you have used all the medicine you can have the bottles refilled at the drug store."

Needless to say, I made many trips to the drug store getting those bottles refilled. But the medicine "fixed me up" all right. The first thing it did was to put my stomach out of gear, and food wouldn't digest properly. Even the smell of dope was nauseating, and the horrible taste it left in my mouth was worse than most any pain.

The stimulant gave me energy for a while, but after I had used it for a few days I had to double the dose to get the same effect, and it soon failed to do even that.

The nerve medicine relieved all pain for a time, but, like the stimulant, it, too, lost its power. I found myself growing more nervous each day and every dose called for another, as the pain came back each time.

I had become disgusted with drugs and was determined to try something else before I gave up.

While reading a paper one day I came upon an advertisement of a cure by electricity—nature's way. This was the Electro-Vigor Co. of Vancouver, B. C. I wrote for their free book explaining this method of treatment.

This book is one of the most interesting works I have ever read, and deals with human ills in a sensible way. It is written in plain language, and the information it contains is worth a great deal to any sufferer.

After reading the book I called on the company, whose manager I found only too willing to give me all the information desired.

He showed me letters of praise from all classes of people whom he had cured with Electro-Vigor. Some were from men I had known for years. Some read as follows:

Dear Sirs—Fifteen months ago I purchased Electro-Vigor for muscular rheumatism. After five days, a two years' siege of pain disappeared completely. I now consider myself perfectly cured. Never a twitch of pain has returned, although I have worked in cold water up to my knees for months. For my age, 67 years, your appliance has proven a great invigorator, as I am able to work six days every week and feel fine afterward.

I value health more than money and my investment in Electro-Vigor has proven invaluable. I cheerfully take the time, a year after my cure, to recommend your appliance.

Yours sincerely,
Kerrisdale, B. C. F. BUTTOMER.

Electro-Vigor Co.

Dear Sirs—I have been wearing your Electro-Vigor nearly every day for the last month, and am much stronger and greatly improved in every way.

Yours truly,
LOUIS MILLER.
1019 3rd St. E., Calgary, Alta.

I used Electro-Vigor just thirty days and followed the rules closely for diet and exercise, when my strength returned and I found myself free from all pain and weakness. My nerves grew stronger and my power increased from the first day under the strengthening, invigorating influence of electricity. I want to say right here that Electro-Vigor is not to be confounded with electric belts. It is entirely different. It is a body battery of dry cells and makes its own power continuously. It never has to be charged. The current enters the nerves in a mild, soothing stream. It does not shock and never burns or blisters. Electro-Vigor is applied at night while you sleep, and the use of it does not interfere with work or business.

100 Page Book Get It Free

I would advise all sufferers to call or send for the Electro-Vigor free 100-page book, which explains all about this treatment. The book is illustrated with pictures of fully developed men and women, showing how Electro-Vigor is applied. It tells in plain language many things you want to know, and contains a lot of good, wholesome advice for men. They will send this book in plain wrapper, closely sealed and prepaid, free, if you will mail this coupon. Cut it out now.

THE ELECTRO-VIGOR CO., Dept. 36-P
Room 20, Hastings Street West, Vancouver, B. C.

Please send me, prepaid, your free 100-page illustrated book. 6-21-13

THE NINETY-EIGHTH ANNIVERSARY OF WATERLOO

Battle Was Fought on Sunday, June 18, 1815; Celebration In Calgary Church

On Sunday, June 18, 1815, just ninety-eight years ago, the great battle which was the final stand of the great Emperor Napoleon was fought in the vicinity of Brussels, in Belgium, which is the battleground of Europe.

This circumstance will be celebrated in Calgary by a special service which will be held in Central Methodist church in the evening, and at which a large number of militiamen of Alberta now in camp near the city will be in attendance.

The sermon for the occasion will be a martial one, and will be preached by their astor, Rev. S. E. Marshall, who will take for his subject the battle of Waterloo, and its lessons. All the men now in camp and the others who are to go into camp on Monday have been invited by Lieut.-Col. Cruickshank, D.C.O., to attend the service in uniform, and places will be reserved for them up to 7.15. There will be no compulsion on the men to be present, and all who attend will do so voluntarily.

The pastor of the church also extends an invitation to the general public to attend and they will be given seats in the church outside of those which are reserved for the militia. It is expected that there will be a large attendance of officers and men on this occasion.

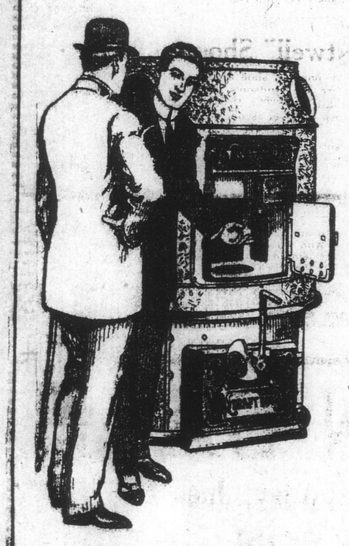
The circumstances of the battle of Waterloo are such that the first guns were fired just at the time of going to church at 11 in the morning, and the battle was at its height at the time of the evening service at 7 at night.

Big Mason Visits Calgary.

Benjamin Allen, past grand master of the Grand Lodge of Ontario A. F. & A. M., stopped off in Calgary yesterday on his way to the coast.

"This is my first visit to Calgary, of which I have heard much, and I must say that everything I have seen today justifies all that I have heard or read about your wonderful city," was Mr. Allen's statement after a tour of the city in the company of W. J. Macleod, master of Ashlar lodge, and W. F. U. Lentz, potentate of Al Azhar temple.

Mr. Burns Makes A Call



One day, just a short time ago, a keen business man, we'll call him Mr. Burns, though that wasn't his name, called on a McClary agent.

He said he was convinced that McClary's Sunshine Furnace was an economical furnace, because a Sunshine had cut one of his neighbor's coal bills by one-third. But he wanted to know more about the durability of it.

So the McClary agent told him how careful McClary's were to use the very best materials. That nothing was considered too good for the Sunshine.

He told about the fine quality of the steel used in the dome and radiator. He explained how the cup-joint construction provided ample room for the contraction and expansion of the fire-pot.

He told him about the fire-pot made of smooth close-grained semi-steel—a material that destructive sulphur fumes cannot penetrate.

He showed him how, by changing around the sides of the three-sided grate bars every day or two, the life of the grates was made three-fold.

He showed him the large feed and ash pit doors, convenient water pan, ample ash pan, and, in short, everything about the Sunshine.

When the agent was through, Mr. Burns shook him cordially by the hand, thanked him for his frankness—and walked out, without giving the agent a chance to close the sale.

But next day, Mr. Burns' architect 'phoned the McClary agent and told him he had an order for him to install a Sunshine Furnace in a new house.

If you want to know full particulars about a remarkable, durable, heavy furnace, call on the McClary agent in your locality. If you would like to read the latest Sunshine furnace booklet, write our nearest office.

ITALIAN DETECTIVE RIDICULES BLACK HAND YARN

Says There Is Not Even a Suggestion of Secret Societies Among Lethbridge Miners; Formerly an Officer of the United Mine Workers

RAN DOWN BLACKHANDERS FOR STATES GOVERNMENT

Says There Are Only Three or Four Cities In All Canada Where the Black Hand Might Operate; No Mafia in the Smaller Places

Lethbridge, June 20.—"Black Hand in Lethbridge!"

The mention of such a thing is enough to make Charles Vernetti laugh. Mr. Vernetti, as his name implies, is an Italian. He comes from the north of sunny Italy. He is also organizer for the United Mine Workers of America. He has been sent out by the international board from Indianapolis to organize foreign speaking miners, especially the Italians, and get them within the fold of the union. And furthermore, he knows what he is talking about when he mentions Black Hand. He knows it from the ground up. He ought to, for he spent eighteen strenuous months as a detective in the employ of Uncle Sam, running down the Blackhanders south of the line. He knows their ways, where they work, and knows, too, that they are about as slippery an aggregation of blackmail artists known to the world.

So when anyone mentions the presence of Black Hand in Lethbridge, even though it may be a son of Italy who makes the assertion, Mr. Vernetti smiles.

No Blackhanders in Lethbridge.

"The Italian who is alleged to have made the remarks about Black Hand in Lethbridge, after the shooting affair last Sunday afternoon, is either ignorant, or else he said what he did for a purpose. For he knows, and every Italian knows, that there is not a semblance of the Black Hand art in this city. Indeed, there are not more than three or four cities in the whole of Canada where Black Hand might be found at work. These are Montreal, Quebec, Toronto, and probably Vancouver. They are the large cities. The Black Hander steers clear of the small."

Mr. Vernetti did not care to comment on the statements alleged to have been made by Lombard, who was sent up for trial yesterday, on the charge of attempting to murder Latella, as the case is now sub judice. He dismissed Lombard's statement by the word "ignorance."

But the history of Black Hand, as explained by Mr. Vernetti, is interesting. Mention Black Hand, and one at once thinks of Sunny Italy. But, strange to say, there is no Black Hand in Italy. It is all in America.

The Black Hand exponents are the victims of circumstances. They are bad, but reason for their art must be looked for beneath the surface. Blame it all on the Camorra.

Who They Are.

Who are the Camorra? According to Mr. Vernetti, they are the wealthy Italian crooks who prey, and make a fat living off the blackmailing of their less fortunate brothers. They are the gentlemen crooks of the nation. They thrive in Italy, where they bleed the Italians of the lower class. The north of Italy knows little of them. They are the product of the sunnier south of the province, where living by one's wits comes more natural.

The Camorra come to America, and keep up their shady transactions. Italians not of this society also come over. They are new to the country, and easily led, because of their ignorance of American ways. The Camorra know this, and prey on their ignorance. They extract money from them. They work in with the railways and steamship companies to bring their brethren across to the country of milk and honey, extracting toll both ways in doing so.

When the Italian begins to learn American ways and finds he has been "flim-flammed," he seeks for a revenge. It is the most natural thing in the world for an Italian from Southern Italy to seek revenge. The Camorra, being fairly well off, the upper ten of the Italian colony, they naturally have money. The poor Italian having been robbed, he sets to work to get back some of his money.

The Unseen.

Then comes the unseen hand—Black Hand, it is called, because the hand is unseen. The exponent of Camorra receives a letter requesting a few thousands in lieu of his life.

The little Italian has seen the Camorra man getting easy money. He has learned, and wants some of the same. The Italians of a settlement who have been "skinned" band together and work together, and they are clever rascals. They are no less rascals because they are trying to get even with other rascals. Their methods are just as sharp as those of the Camorra. They are seldom caught. Mr. Vernetti says occasionally one of the Black Hand gang is caught, but he never "peaches" on his pals. It would do him no good, and would do his brothers harm. So he does, if they find anything against him, which is seldom.

Only in Big Cities.

The Black Hand and the Camorra are found only in the larger cities on this continent. New York and Philadelphia are the cities where Mr. Vernetti has worked. St. Louis, Chicago, Pittsburg are other cities where they are to be found in force. They are the Jesse James and Bill Miners of the Italian race. But they do not work in the small towns, because the Italians in those places are not wealthy enough to be bothered. If an isolated case of Black Hand is found in one of these smaller places, it can generally be put down to the attempt of an amateur to prey on the superstition of a countryman. It is not the attempt of one of the societies.

The Mafia is the third secret society of the Italians. They are found only in Italy, and are now nearly stamped out. They are the real brigands who struck terror into Southern Italy, until Garibaldi, in 1861, went down from the north with a thousand soldiers, and put them practically out of business as an organized gang.

But Black Hand in Lethbridge? "No," says Mr. Vernetti.

Figures on Living Cost.

Ottawa, Ont., June 20.—The labor department's index number of wholesale prices which indicates the cost of living stood at 137.0 for May as compared with 133.3 in April and 136.3 in May, 1912. The numbers are percentages of the price level during the decade 1890-1899. The chief advances of the past month occurred in animals and meats, fish, fruits and vegetables with considerable decreases in dairy products and fuel. Western grain was upward but paints and oils were lower. In retail prices, dairy products, fish, sugar, potatoes and coal were lower, while meats and rentals tended upwards.
