**DO YOU SEE THAT HUMP ?**

Not on "The Page," it never has 'em, but on that DEAD WIRE fence. It was caused by an animal running into it. The animal "didn't mean to." The fence "couldn't help it," but the hump is there, and it is an eye sore to the owner. He looks across the road to his neighbor's non-humpable, anti-sagable Page Fence, and admits that elasticity "is in it" after all.
