RAILWAYS AND NAVIGATION.

ELECTRIC ROADS OF THE WORLD.—It is estimated that there are not less than 325 electric railways in the United States, England, Germany, Italy, Austria, and Japan, requiring 400 to 700 motors, with 2,600 miles of track, with a daily mileage of not less than 400,000 miles, and carrying 750,000,000 passengers annually. Grades of 13 and 14 per cent., distances of 6 miles or more from the central stations, speeds as high as from 25 to 35 miles per hour for single cars and trains of two to one cars. Not less than 10,000 persons the number employed on these lines; \$50,000,000 of capital invested in the United States alone, and at present annual business not less than \$8,000,000 to \$10,000,000 on the part of the manufacturing and contracting electrical companies, show the present standing of the electric railway works.
