

FROST & WOOD BINDERS GET ALL THE WHEAT

Do you lose lodged crop?
Does your binder thresh
your wheat out while
binding?

THE famous Frost & Wood is so perfect in balance that when down grain is encountered the table can be readily tilted and the reel thrown forward to pick up lodged crop. The operator does not have to strain or stretch to make the adjustments—every lever is convenient and easily adjusted.

No matter how tangled the straw, it is elevated smoothly and swiftly. This is because the canvasses automatically adjust themselves to heavy or light crop.

And on the deck the straw is sent to the packers steadily—no bunching or crowding, so ripe grain is not threshed out of the heads. From the standing crop to the sheaf, Frost & Wood Binders do not waste any grain.

GET OUR BOOK

SEND to-day for our "Binder" Book, and learn every detail of the Frost & Wood machine. The roller bearings mean speed and light draft. The eccentric sprocket means a tightly-bound sheaf without strain on machine or team. The perfect elevator design prevents threshing or choking. The steel framework is braced to withstand rough land.

This is as near an ideal binder as you can buy. It has 70 years of skill and knowledge behind it.
