Alcis guttata Hulst. 20 June, 1894, (Fletcher). This specimen was so named by Mr. Grossbeck. In reporting upon it he says: "The species which I am quite certain is the one described by Hulst as *Alcis guttata* is very interesting. I was never quite certain that the two specimens on which the name was based really came from New York and Pennsylvania as Hulst said. They had a decidedly European aspect. The receipt of your specimen now seems to indicate, however, that the types were caught in this country."
