BRYAN T. YOUNG.

ART. L.—THE IRISH IMMIGRANT FEVER.

By FRs. BADGLEY, Esq., M.D.

(Continued from No. IV, page 92.)

It now only remains, in concluding my remarks upon this fatal disease, that I should submit to your readers an outline of the plan of treatment adopted by myself and those of my professional friends in this city, who entertained the same opinions which I did, as to its pathology. The happy or infelicitous result observed from the employment of any remedy, or class of remedies,

in the treatment of a disease, is generally considered a pretty safe and certain criterion of the correctness of the pathological views adopted by the practitioner in regard to it; and although it may be urged, with reference to this disease, as it has been, and ever will be in the case of many other anomalous conditions of the body, that opposite systems of treatment have been found to be equally efficacious, and have been followed by an equal amount of cures, yet, it appears to me, that in all such instances, it will be discovered, after a rigorous and can-
