CAUTION
 The bearing of a station from the chart is to be regarded as a general indication only and should not be relied upon for a precise bearing.
CAUTION
 None of the information on this chart is a representation of the actual conditions and should not be used for navigation.
PROPERTIES OF CHART PROJECTION
 Accuracy of Bearings and Distances
 While the bearings of all straight lines shown on this chart are true bearings, the distances of straight lines are not true distances but are distances measured on the chart.
 Conversion of Distances
 Conversion of distances may be made by using the scale of the chart.
PLOTTING COURSES AND BEARINGS ON CONIC PROJECTION CHARTS
 Courses with the instrument oriented on the meridian nearest the mid-point of the course.
 Bearings with the instrument oriented on the meridian nearest the observer.
