

Seven Cool Things about WIN 4.5

As you can see, the new WIN 4.5 has a new look and several new features that were suggested by users. The following list summarizes the seven big new features.

Cool Thing #1: It loads faster

Load time has been dramatically reduced and is now measured in seconds instead of minutes. Benchmarks in one US mission showed a 95% reduction!

Cool Thing #2: Quick Search is more forgiving

Now when you enter text in the "Search for" field, you don't have to worry about spaces, punctuation, hyphens, ampersands...

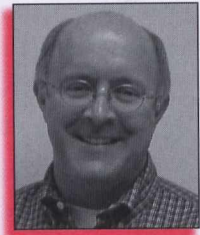

Cool Thing #3: Recent services are displayed on the business card

Missions that have recorded services or results over the last twelve months are listed on the business card. Post Support Unit (PSU) notifications are also displayed prominently.

Cool Thing #4: You're one click away from recording a service

Just click on the new Add Tracking button to bring up

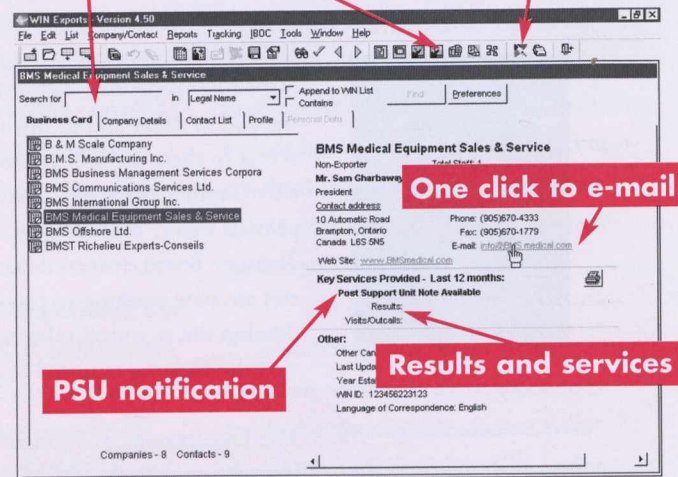

by Kevin Roberts

One click to record service

Free spelling

One click to mail merge

the new service entry screen and you can enter everything including Notes and Results on the same form.

Cool Thing #5: You're one click away from sending e-mail

On the business card, you can click on the company's e-mail address to bring up a pre-addressed Outlook e-mail form.

Cool Thing #6: Performing a mail merge is easy

All you have to do is click on the new WP Merge button, and then specify the scope (addresses to include), and name of the form file.

Cool Thing #7: You can use e-mail instead of fax

You now have the option of sending messages as either fax or e-mail. You can even send a single message as both, and specify the preferred method to use when a contact can be reached by either method.
