

UNITED STATES DEPARTMENT OF THE INTERIOR

Washington, D.C. 20500

OFFICE OF THE ASSISTANT SECRETARY

Division of Land Management

Department of the Interior, Washington, D.C. 20500

MEMORANDUM FOR THE RECORD

1. The purpose of this memorandum is to report on the results of the study conducted by the Bureau of Land Management (BLM) regarding the impact of the proposed project on the public lands of the State of California.

2. The study was conducted by the BLM in cooperation with the State of California and the local communities affected by the project. The study was completed in the month of [Month] 19[Year].

3. The results of the study indicate that the proposed project will have a significant impact on the public lands of the State of California. The impact is expected to be both direct and indirect, and will affect the natural resources, the economy, and the social conditions of the area.

4. The direct impact of the project is expected to be the loss of approximately [Number] acres of public land. This loss is expected to result from the construction and operation of the project. The indirect impact is expected to be the loss of approximately [Number] acres of public land. This loss is expected to result from the displacement of the population of the area.

5. The impact of the project is expected to be both direct and indirect, and will affect the natural resources, the economy, and the social conditions of the area. The natural resources of the area are expected to be affected by the loss of public land and the displacement of the population. The economy of the area is expected to be affected by the loss of public land and the displacement of the population. The social conditions of the area are expected to be affected by the loss of public land and the displacement of the population.

6. The impact of the project is expected to be both direct and indirect, and will affect the natural resources, the economy, and the social conditions of the area. The natural resources of the area are expected to be affected by the loss of public land and the displacement of the population. The economy of the area is expected to be affected by the loss of public land and the displacement of the population. The social conditions of the area are expected to be affected by the loss of public land and the displacement of the population.

7. The impact of the project is expected to be both direct and indirect, and will affect the natural resources, the economy, and the social conditions of the area. The natural resources of the area are expected to be affected by the loss of public land and the displacement of the population. The economy of the area is expected to be affected by the loss of public land and the displacement of the population. The social conditions of the area are expected to be affected by the loss of public land and the displacement of the population.

8. The impact of the project is expected to be both direct and indirect, and will affect the natural resources, the economy, and the social conditions of the area. The natural resources of the area are expected to be affected by the loss of public land and the displacement of the population. The economy of the area is expected to be affected by the loss of public land and the displacement of the population. The social conditions of the area are expected to be affected by the loss of public land and the displacement of the population.

9. The impact of the project is expected to be both direct and indirect, and will affect the natural resources, the economy, and the social conditions of the area. The natural resources of the area are expected to be affected by the loss of public land and the displacement of the population. The economy of the area is expected to be affected by the loss of public land and the displacement of the population. The social conditions of the area are expected to be affected by the loss of public land and the displacement of the population.

10. The impact of the project is expected to be both direct and indirect, and will affect the natural resources, the economy, and the social conditions of the area. The natural resources of the area are expected to be affected by the loss of public land and the displacement of the population. The economy of the area is expected to be affected by the loss of public land and the displacement of the population. The social conditions of the area are expected to be affected by the loss of public land and the displacement of the population.
