

SUPPLEMENT TO BULLETIN No. 227 FERTILIZERS 1911.

CORRECTIONS.

Bulletin No. 227, page 11, sample No. 36942. This sample is found to contain 20.1 per cent. of phosphoric acid. It is identical with sample No. 46637 on page 5 of the same Bulletin, and the percentage of phosphoric acid there given as 12.25 should read 20.1—Sample 46637 is therefore up to its guarantee in phosphoric acid. The mistake was due to confusion of a license number with a registration number, by the Analyst.
