\* Given for comparison only.

**To find Fares.**—Ascertain the regular first-class single trip Summer fare between the two stations where passenger desires to travel, and opposite the corresponding figure in the first column, headed "One way, 1st class," the fares for Commutation and Season tickets are given.

**Example.**—If regular first class single-trip Summer fare is \$1.00, the Commutation ticket fares are \$6.75, \$13.00, \$17.35 for 10, 26 and 52 trips respectively, and the Season-ticket fares, 1st month \$11.90, 2nd month \$10.50, etc., etc. Commutation ticket fares between stations where regular first class single trip Summer fare is more than \$1.30, but not exceeding \$2.60 (see rules following), will be found thus: If single-trip fare is \$2.30, add the fares shown opposite \$1.30 and \$1. Example: 10 trip-ticket \$8.75 + \$6.75 = \$15.50.

Commutation and season-ticket fares will be based all the year round on the regular first-class single trip Summer fares,
