If a farmer wishes to sell any of his stock or implements; if he has a pure-bred animal to part with, fact, any wants the farmer may have, when made known in print, World, in its special farm and

benefit of the urban population. The farmers are primarily affected. The knowledge of prices, the latest methods of putting their wares in shape, the coming demand ought all to be studied by the agricultural class as assiduously as the merchant strives to secure the cheapest terms on that produce.

the expense of the beef industry. Never in the history of the Toronto market have there been as many ill-bred dollars per head for the ewes and \$25 for the ram. This represents a capital invested of \$275, which at usual bank interest would yield an income of \$7.25 a year. Mr. McPherson shows that this flock nets him \$143 a year profit, or twenty times as much as his money would bring him from the bank.

Milch Cows.

The actual worth of the flock is five dollars per head for the ewes and \$25 for the ram. This represents a capital invested of \$275, which at usual bank interest would yield an income of \$7.25 a year. Mr. McPherson shows that this flock nets him \$143 a year profit, or twenty times as much as his money would bring him from the bank.

The second flock is five dollars per head for the ewes and \$25 for the ram. This represents a capital invested of \$275, which at usual bank interest would yield an income of \$7.25 a year. Mr. McPherson shows that this flock nets him \$143 a year profit, or twenty times as much as his money would bring him from the bank.

tary of state at Lansing. It estimated but another party keeping a restaurant wheat crop of the state at 12,000,000 and on Lake Shore-road.

LIVE STOCK REVIEW.

Receipts have been fairly large especially in the cattle classes. Trade has been fair for cattle, when the quality is considered. In all other classes, the market has been brisk.

Exporters.

The number of export cattle has been small this week, but quite enough of the kind that has been coming forward. Dealers report the British markets as being too low to make money at present prices here, the quality of the cattle not being good enough. Prices range from \$4.25 to \$4.80, and only one load was reported at the latter price.

Butchers.

Prime butchers cattle are scarce.

Choice, well-bred stockers and feeders are as scarce as the good beef animals. It is safe to say that there never has been such a dearth of the right kind of feeders in the last decade as there is just now. Ontario has built up her butter and cheese industry so that she now supplies the British markets with 60 per cent, of all they use, but this has been done at the expense of the beef industry. Never in the history of the Toronto markets with 60 per cent, of all they use, but this has been done at the expense of the beef industry. Never in the history of the Toronto markets with 60 per cent, of all they use, but this has been done at the expense of the beef industry. Never in the history of the Toronto markets.

Trade in milkers and springers has been strong all week, some of the dealers so anxious that they sat up and met each train as it arrived, for next day's market. Seventy dollars each was paid for three top-notchers early in the week. The quality of the bulk was not up to requirements of the trade, especially the last two or three days, and prices have not been quite as strong as at the beginning of the week. Prices ranged from \$25 to \$70, the bulk of the good to choice selling between \$45 and \$55 each Veal Calves.

The market for veal calves has ruled strong all week, some of the dealers so anxious that they sat up and met each train as it arrived, for next day's market. Get the best in breeding, size and quality. Then cull out the ewes. A

The proper selection of breeding ewes is all important work. There ing meal last night.

"In the early seventies." said he,
"I went up Yonge-street and saw how
the land was being impoverished by
the farmers selling the hay and straw,
because of the big prices. They were
actually afraid to turn their colts on
some fields for fear they would break
their legs in some of the cracks in
the soil. Barrenness became evident
and the farms started dairying and and the farms started dairying and as may be, we should go for wool now hog raising. This year I returned that that is picking up so nicely in over the same land, and the crops of hay I saw cut around Richmond Hill be of good young entries into the breeding flocks, for these sheep have to hold their places probably for or four years, hence may produce a number of progeny to make or mar the future flocks. It is better that four-shears—that is, full-mouthed ewes should be culled off, tho they may have bred several twins and aursed American Veterinary Medical Association meeting at New Haven, Conn., the Hill, who is getting into the Canadian as any ewes in the flock and much more blooming, in fact, than many of the younger sheep. Still, they have enter ed on the down-hill path. They will not cut so good a figure this time next year if kept on, and their fleeces will-grow lighter every shear day. The object should be to keep their flock always growing into money, and not to let the meritorious deeds of any old

members lead to retention too long. British Live Stock Imports. The British imports of cattle continue to increase, the total for the last six months having been 276,909, as compared with 266,977 in the first half of 1905, and 264,763 in that of 1904. The increase is due to shipments from Canadian ports, whence was received their growth and the louse has eaten against 48,044 in the corresponding period of 1905. There has been a great being off in sheep, the latest total being only 63,523, as compared with 130,331 for the first half of 1905. Beef, mutton, bacon and hams show in-creases, and the total of dead mea: hams show in-

SPECIAL FARMING & LIVE STOCK EDITION

The many friends of Mr. F. M. Chapman, who for some time acted as assistant editor on our contemporary The. Glengarrian, will learn with pleasure of his appointment as editor of the farmers' supplement of The Toronto World, which is a new feature recently introduced by that progressive journal. Under the able management of Mr. Chapman and the staff of reporters and correspondents, the farmers of Ontario, thru this department of The World, will be supplied with the latest agricultural news as well as the most accurate and up-to-date market reports. During Mr. Chapman's stay in Alexandria, by his affable manner and close attention to business, he

nected with the cold storage of apples grown in this state. Observations are to be made on the keeping quality of different varieties of Iowa apples as related to the age of the tree, the type of soil upon which it is grown, whether it is grown under sod or under clean tillage, the degree of maturity of the fruit, the question of immediate versus delayed storage, of wrapped versus unwrapped fruit, and of a small package versus barrels. The work will be conducted by Mr. H. J. Eustice, expert in fruit storage investigations of the division of pomology, in co-operation with Professor S. A. Beach, of the Iowa experiment station."
