ST. LAWRENCE AND PRODUCE MARKETS

New Year's Activity Was Apparent on All Hands.

Business at the St. Lawrence market yesterday was fairly good all lines of poultry and provisions generally showing an advance. Turkeys sold at around 70c a pound, geese were scarce at all the way from 40c to 50c a pound, the latter for select, ducks 25c to 40c a pound. There was a pretty good clean-up at these prices. A feature of the lower St. Lawrence market, as at Christmas time, was the magnificent display of dressed meats, carcasses and poultry, all kinds by Brown Bros., the well known purveyor.

In the upper market geese were selling at around 90c for the strictly new laid, a change from 75c a fortnight or so ago, when they were selling at 85c. The prevailing price, receipts coming in from the country and with the price of the day, and then any suggestions in the way of improvement which he might recommend.

WE ARE PLEASED TO TELL YOU THAT THE COMPANY HAS ON HAND TODAY (CASH IN THE BANK) AS MUCH MONEY AS WHEN WE LAST MET AT OUR ANNUAL MEETING. OUR STOCK HAS BEEN SOLD SINCE THAT DATE, AND DEPOSITED PAYMENT FROM STOCK SOLD PREVIOUS TO THAT DATE HAS BEEN SUFFICIENT TO CARRY ON THE WORK FROM THAT TIME.

The Argonaut Gold Mining Company has been purchasing power, and owing through Northern Ontario there has been a great dearth of power companies had handicapped other power companies very severely.

Mr. George A. Gray, who had held the position of chief mining engineer of the company since 1912, has been an exceptionally able and energetic manager, and will assume his duties as of January 1st, next.

Mr. Gray brings with him a long experience of many years with one of the largest gold producing companies in the world, and his selection has met with commendation on all sides.

Your Directors and Advisory Board have full confidence in the ability of Mr. Gray to carry out the duties of the position of chief mining engineer of the company, and to bring about a more profitable and successful operation of the company.

On the strength of this report I predicted that the mill would be built by January 1st.

Upon my next visit to the mine, in the month of January, the Engineers' report was that the mill would be built by January 1st.
