POOR DOCUMENT

THE DECEMBER SKIES.

Pretty Stellar Picture on the 17th-Full Moon for Christmas -- The Planets and Constellations.

The month of December brings to a close the interesting series of planetary supings which have beautified the even-BILL FOR PROTECTION Saturn will move farther and farther Measure in United States Senate Making Death Penalty for Assassination or Attempt.

Washington, Dec. 4.—Senator Hoar to-day introduced a bill for the protection of the president which provides as fol-

ing sky for so many weeks. Jupiter and Saturn will move farther and farther, away from each other, not to meet again for 20 years. Venus will soon retrace her nister planets. Before, however, they finally separate, the planet Mars, which has been a quiet spectator of recent planetary movements, will join the com-pany. A new series of groups is formed, but so low down in the southwest that only the careful watcher will behold them. Mars, moving rapidly eastward, overtakes Saturn on the 14th and Jupiter on the 17th, passing the former one degree and the latter one-half degree southward. The three planets may be seen from 5 to 5.30 p. m. nearing the southwestern horizon. Mars will be below the other two and will be very much fainter. The crescent moon passes the group on the 13th, its path ly-ing about five degrees farther north. A very pretty stellar picture will be present-ed on that evening and on the two fol-lowing, as the moon hastens toward the brilliant Venus. The planet Uranus, which has been an unobserved member of the planetary slaxy during all these weeks, is the first to leave the evening sky. The sun overtakes it on the 9th and the planet enters the morning sky, rising before the sun. Saturn and Jupiter will soon follow, but the morth closes while they are still in the evening sky lost in the twilight. On the 31st they set about 50 minutes after the sun. Venus is left alone as evening star, and

he twilight. On the 31st they set about No minutes after the sun. Venus is left alone as evening star, and increases in brilliancy as if the light of her rival planets had been added to her swn. As the month advances, she seems nore and more the queen of the heavens, noming to adom the holiday season. As the wondering sages in the Christmas story beheld with joy the sacred star, so this year we may see in the brilliant planet our Star of Bethlehem. In the talescope the planet appears now as a semi-circle like the moon at first quarter. The width of the crescent narrows, but its length increases as the planet gains in brightness. As the month progresses it will be acceedingly brilliant and easily seen in full daylight in the afternoon. Mercury has been very bright in the morning sky in the latter days of Novem-ber, but is disappearing in the twilight preceding suntise. It passes the planet Uranus on the 18th, and on the 24th en-form its nervide of greatest cold, since mid-

on the 18th, and on the 24th en

Whether we reckon the year from the Whether we reckon the year from the sun's apparent distance from the equator in the sky, or from its real distance from the earth, or from Jan. 1st, as our calen-tar aibitrarily decrees, the year 1901 draws to its close, and the second year of the century dawns upon us.-Winslow Upton, in Providence Journal. Rev. Dr. Talmage V. Sir Thomas Lauder Brunton.

principal, although the other party or par-ties to said offense shall not be indicted foys its period of greatest cold, since mid-winter then reigns on the planet, if a planet so exposed to the sun's heat may be said to have a winter. It is hastening toward the sun and will be in the evening dry in Langar or convicted." EX-MAYOR OF NEW

Nuptials at Halifax of R.H. Graham and Miss Maud Johnston.

be said to have a winter. It is hastening toward the sun and will be in the evening sky in January. Meptune celebrates the holiday season by coming into opposition with the sun, that is, riving as the sun sets. This occurs on the 22d and the planet will be throughout the month in its most favorable position for telescopic observation. It is also high in the north, so that northern observers are well situated to view it. But its enor-mous distance from us puts it far beyond our present powers of study, and but little is known of it. In small telescopes it can be distinguished from a star only by its alow motion. It is now retrograding, or moving westward among the stars. On the last its right ascension is 6h. Smin., and its declination N. 22 degrees 15 minutes. It is in the extreme western part of the area occupied by the constellation Gemini. The mon does her part also to beautify the holiday season. In preparation for it alse spends the opening days in compara-tive obscurity, entering the evening sky on the 10th after passing Mercury the pre-ording day and Uranus just before reach-ing the sun. Three days later she joins the planetary group, moving north of Mars, Saturn and Jupiter on the 13th and Venus on the 15th. On the 18th she is at first quarter and from that date illumin-ates brightly the evening sky, mounting Halifax, N. S., Dec. 4-(Special)-St. Halifax, N. S., Dec. 4-(Special)-St. Stephen's chapel was the scene of a quiet, pretty wedding this afternoon, when Maud Johnston, daughter of the late J. B. John-ston, of this city, became the bride of R. H. Graham, B. A., barrister of New Glasgow. The ceremony was performed by Rev. Kenneth Hind in the presence of a large number of relatives and friends of the bride and groom. The former was attended by her sister, Mary E. Johnston, and the groom was surjorted by G. A.

and the groon was supported by G. A. Grant, of New Clasgow. The bride, who is charming and popular, received many bandsome wedding gifts. Mr. Graham is a graduate in arts and law of Dalbousie University. He was twice mayor of New Glasgow and is one of the brightest young men in Pictou county.

. SHOWS A DECLINE. Grain Shipments via Soulanges Canal Much

Mars, Saturn and Jupiter on the 13th and Vanus on the 15th. On the 18th she is at first quarter and from that date illumin-ates brightly the evening sky, mounting higher each evening and reaching the full phase on Christmas Day. With Venus in the west and the full moon in the east the featival is celebrated in the heavens as well as on earth. The winter constellations, proverbially beautiful, are coming into view. The zo-diacal belt, from west to east, includes Aquarus, Pisces, Arics, Taurus and Gem-ini, the last two containing many conspicu-ous stars. In the western half of the sky may be found Cetus south of the zodiac and Aquila, Delphinus, Pegasus, Androm-eda, Lyra, Cygnus, Cassiopeia, Cepheus, Draco and Ursa Major are in the north and east. Later at night rise Carlis Major and Canis Minor. The close of the year is indicated by two imputant astronomical events occur-ting 10 days areart. sailing. The tonnage for the various months was

and Canis Minor. The close of the year is indicated by two imputant astronomical events occur-ring 10 days spart. First comes the win-ter solstice, which falls this year upon the 22nd. At 7 a. m. on that day the sun reaches its farthest point south of the equator, and the shortest day and longest night are experienced in the northern hem-inphere. Three minutes will be added to the day and taken from the night before the calendar year ends. Dec. 22 is really the end of the year as far as those astron-omical events are concerned upon which weather conditions primarily depend. But it will be several weeks yet before the increasing heat of the sun due to the great length of the day will counterbalence the load of the year as far sight. But while the weather seems slow to follow the leading of the sun, the signs in the sky do not fail, and the new year will have begin on the 22d. It is said that the calendar year was made to begin some days after the solstice, because in the first year of its adoption in the time of Julius Caesar the new moon fall on the day to be called Jan. Ist. Pre-viously the months had followed the moon closely, and the reformed calendar pid away with the moon as a time reckoner for civil purposes. This was the last re-cognition of its former function-a graceful farswell, which the new calendar pid to the old one it supplanted. At present the civil year coincides closely with an astron-In connection with the failing off in the grain shipments an official of the can-als department stated that the principal reason was the lack of facilities for ship-ment at Montreal. It has been exceeding-ly difficult during the past season to get enough bottoms into the port of Montreal for the grain shippers. In consequence of this and the lack of facilities for hand-ling the grain shape on the port of the bottoms ling the grain a large quantity has been shipped by way of Portland and other American ports.

Ottawa, Ont., Dec. 3-(Special)-Patrick O'Brien, of St. John, N. B., has been appointed a clerk in the customs office that port.

O'Brien of the Globe. the old one it supplanted. At present the civil year coincides closely with an astron-omical year which is important in the science of astronomy, though it does not affect terrestrial conditions as evidently as the passing of the solstice. The earth is nearest to the sup in its annual path at

It looks reasonable, doesn't it ? And it's successful, too. as the passing of the solstice. The earth is nearest to the sun in its annual path at about Jan. 1st. This year the earth reaches this point one hour after the new calendar year has been ushered in. As-tronomers use this point as the beginning of the year in all discussion of orbit mo-tion. Were our orbit around the sun more elongated than it is, this point would be important to us on the earth. for the When you inhale Vapo-Cresolene your breathing becomes easy, the wheezing ceases, and you drop to sleep. For croup and whoopingcough it's a quick cure.

Vapo-Cresolene is sold by druggists everywhere. The Vaporizer and Lamp, which should last a life-time, and a bottle of Cresolene complete. Stipp: axtra supplies of Cresolene 25 cents and 50 cents. Hiustrated booklet containing physicians' testi-monials free upon request. VAPO-CRESOLENE Co., 180 Fulton St., New York, U.S.A. be important to us on the earth, for the seasons would be determined by the vary-ing distance between earth and sun. But se nearly sircular is our orbit that the

tle against the Midianites; to Nebuchadnezzar, under the figure of a broken image and a hewn down tree, foretelling the overthrow of his power; to Joseph, of the New Testa-ment, announcing the birth of Christ in his own household, and again bidding him fly from Herodic per-secutions; to Pilate's wife, warning him not to become complicated with GLASGOW WEDS. him not to become complicated with the judicial overthrow of Christ.

We all admit that God in ancient times and under Bible dispensation addressed the people through dreams. The question now is, does dreams. The question now is, does God appear in our day and reveal himself through dreams? This is the question everybody asks, and that question I will try to answer. You ask me if I believe in dreams. My answer is, I do, but all I have to say will be under five heads. Remark the First .- The Scriptures are so full of revelation from God that if we get no communication from Him in dreams we ought, nevertheless, to be satisfied. With twenty guidebooks to tell you how to get to New York or Pitts-

burg or London or Glasgow or Man-chester do you want a night vision to tell you how to make the jour-ney? We have in this Scripture full direction in regard to the journey of this life and how to get to the celestial city, and with this grand guidebook, this magnificent directory, we ought to be satisfied. I have more faith in a decision to which I come when I am wide awake Ottawa, Dec. 3—(Special)—The report of traffic on the Soulanges canal for the season just closed shows that there has been a falling off in the grain traffic of 1,331,062 businels, as compared with 1909. The figures are: 1900, 19,427,586 bushels; The total tonnage which passed through the canal from May I to November 22, was 011,327, made up as follows: Grain, 514, 137; coal, 323,665; oil, 14,909; lumber, 12, 572; firewood, 3,856; miscellaneous, 42,189. During the season 2,995 vessels passed through, 1,033 being steamers and 1,962 sailing.

the sky, when ten thousand times it has been demonstrated that earth as follows: May, 80,116; June, 100,412; Aug., 61,526; Sep., 56,892; Oct., 57,378; No such dream needed as that which Aug., 61,526; Sep., 56,892; Oct., 57,373; Nov., 72,608. In connection with the falling off in the amin abimments an official of the can-when we have the records of the county clerk's office. No need of such a dream as was given to Pharach about the seven years of fam-ine, for now the seasons march in regular procession and steamer and rail train carry breadstuffs to every famine struck nation. No need of a dream like that which encouraged Gideon, for all through Christendom it is announced and acknowledged and demonstrated that righteousness sooner or later will get the victory. If there should come about a crisis in your life upon which the Bible does not seem to be sufficiently speific, go to God in prayer, and you will get especial direction. I have more faith ninety-nine times out of a hundred in directions given you with the Bible in your lap and your thoughts uplifted in prayer to God than in all the information you will

get unconscious on your pillow. I can very easily understand why the Babylonians and the Egyptians with no Bible, should put so much stress on dreams, and the Chinese And we presume you are about discouraged. Now what do you think of our idea of breathing in the medicine, bringing it right up to the diseased part? up to the diseased part? God, and that Homer strong Jove, that all dreams came from Jove, and that in ancient times dreams were classified into a science, but why do you and I put so much stress upon dreams when we have a super-nal book of infinite wisdom on all subjects? Why should we harry ourselves with dreams? Why should Eddystone and Barnegat lighthouses

have an important meaning. They prove that the soul is comparative-ly independent of the body. The ayes are Closed, the senses are dull,

and you have no right to keep your digestive organs in struggle when the rest of your body is in somnothe rest of your body is in sommo-lence. The general rule is eat nothing after 6 o'clock at night, re-tire at 10, sleep on your right side, keep the window open five inches for ventilation, 'and other worlds will not disturb³ you much. By physical maltreatment you take the ladder that Jacob saw in his dream, and you lower fi to the nether world, allowing the ascent of the demonia-cal. Dreams are midnight dyspepsia. An unregulated desire for some-thing to eat keeps it ruined. The world during 6,000 years has tried in vain to digest that first apple. The world will not be evangalized until we get rid of a dyspeptic Chris-tlanity. Healthy people do not tianity. Healthy people do not want the cadaverous and sleepy thing that some people call religion. They want a religion that lives regularly ingly surrender indigestibles. Na-poleon's army at Leipsic, Dresden abd Borodino came near being des-troyed through the disturbed gastroyed through the disturbed gas-tric juices of its commander. That is the way you have lost some of your battles. Another remark I make is that our

dreams are apt to be merely the echo of our daytime thoughts. I will give you a recipe for pleasant dreams. Fill your days with eleic. If all day you are gouging and gasping and avaricious, in your dreams you will see gold that you cannot clutch and bargains in which the day you dreams you will see gold that you cannot clutch and bargains in which you were out-Shylocked. If during the day you are irascible and pug-nacious and gunpowdery of disposinacious and gunpowdery of disposi-tion, you will at night have battle with enemies in which they will get the best of you. If you are all day long in a hurry, at night you will dream of rail trains that you want to catch while you cannot move one inch toward the depot. If you are always oversuspicious and If you are always oversuspicious and expectant of assault, you will have at night hallucinations of assassins with durgers down. No see from with daggers drawn. No one won-ders that Richard III., the iniquitous, the night before the battle of Bosworth Field dreamed that all Bosworth Field dreamed that all those whom he had murdered stared at him and that he was torn to pieces by demons from the pit. The scholar's dream is a philosophic echo. The poet's dream is a rhy-thmic echo. Coleridge composed his "Kubla Khan" asleep in a narcotic dream and, waking up, wrote down 300 lines of it. Tartinia, the violin player, composed his most wonderful sonata while asleep in a dream so vivid that, wakasleep in a dream so vivid that, waking, he easily transferred it to pa-Waking thoughts have their echo

in sleeping thoughts. If a man spend his life in trying to make oth-ers happy and is heavenly minded, around his pillow he will see crip-ples who have got over their crutch, and processions of celestial imper-ials, and hear the grand march roll crying, "Come to judgment down from drums of heaven over jas-

per parapets. You are very apt to hear in dreams what you hear when you are wide awake. The Rev. Dr. Bushnell in his mar-

velous book entitled "Nature and the Supernatural" gives the following fact that he got from Captain Yount in California, a fact confirmed by

Fredericton Business College, PREDERICTON, N. E. The only school in the province of affilia-tion with the Business Educator Associa-tion of Canada. Write for Catal, Che. Ad-

W. J. OSBORNE, Principal, Yors Street. eos-dw

to God through a dream: The Rev. John Newton, the fame of whose piety fills all Christendom, while a profligate sailor on shipboard, in his dream thought that a being ap-proached him and gave him a very beautiful ring and put it upon his finger and said to him: "As long as you wear that ring you will be pros-pered. If you lose that ring, you pered. If you lose that ring, you will be ruined." In the same dream another personage appeared and by a strange infatuation persuaded John Newton to throw overboard that ring, and it sank into the sea. Then the mountains in sight were full of fire, and the air was lurid with con-suming wrath. While John Newton was repenting of his folly in having thrown overboard the treasure anthrown overboard the treasure an-other personage came through the dream and told John Newton he would plunge into the sea and bring that ring up if he desired it. He plunged into the sea and brought it up and said to John Newton, "Here is that gem, but I think I will keep it for you lest you lose it again." And John Newton consented, and all the fire went out from the mountains that some people can have regularly want a religion that lives regularly by day and sleeps soundly by night. If through trouble or coming on of old age or exhaustion of Christian service you cannot sleep well, then you may expect from God "songs in the there are no blessed his soul and that the being who per-suaded him to throw it overboard was Satan and that the one who plunged in and restored that gem, keeping it for him, was Christ. And that dream makes one of the most wonderful chapters in the life of that

most wonderful man. Rev. Herbert Mendes was converted to God through a dream of the last judgment, and many of us have had some dream of that great day of judgment, which shall be the winding light for the dream, for the world shall blaze. Enough excitement for the mountains shall fall. Enough water, for the ocean shall rear. Enough astronomical phenomena, for the stars shall go out. Enough pop-ulations, for all the races of all the ages will fall into line of one of two Apollyon on the black charger of eternal defeat. The dream comes on ble voices cry. "Come to judgment!" And the archangel seizes an instrument of music which has never yet been sounded, an instrument of music that was made only for one sound. and, thrusting that mighty trumper through the clouds and turning it this way, he shall put it to his lips and blow the long, loud blast that shall make the solid earth quiver,

Then from this earthly grossness

Attired in stars, we shall forever sit, London's Street Accidents.

The street accidents of Londor amount to about 3,500 a year-nearly ten a day.
