Committee. To assist the Promotions Chairman in promoting campus activities.

11. Director, Signboard Directorate. To supervise the work of the Signboard Directorate in making signs, posters, and various types of notices. Honorarium.

The Secretary-Treasurer, Students Union

Jones UN Club President

Barry Jones, a graduate student from Wales was elected president of the UN Club at the March 1 meeting in the West Lounge. Mr. Jones was president of this year's Model Assembly.

Other new officers are: vice-presi-

dent, Mike Akpata; re-elected as secretary, Nola Hague; treasurer, Jean Gillis; program convener, Dave Parsons and publicity chairman, Dave Reeves. Past president, Francis Saville, will also serve on the executive.

Sam Baker, delegate to last year's WUS Seminar in Israel, gave an historical report of the Jewish state

with observations from his own experiences there. He showed slides to supplement his talk.

Model Assembly Coordinator, Jim Foster, reported on this year's assembly and led a discussion of suggested improvements for next year. More effective and extensive use of the committee system, previous to the assembly sitting, was recommended.

Careers

WITH CANADIAN CHEMICAL COMPANY, LIMITED

This advertisement will be of most interest to graduates in chemistry, chemical, mechanical and electrical engineering and engineering physics.

What interests you most about a career? *Opportunity* should. Opportunity not only for advancement, but opportunity for professional growth through varied and interesting experience. We firmly believe in diversified experience and, luckily, we can offer it in our fully integrated operation. We find it's best for you (makes life more interesting and provides greater opportunity) and best for us (we end up with senior people who are fully experienced in our business). Now, let's have a crack at answering some of your questions.

What do we do? Canadian Chemical Company produces basic organic chemicals, cellulose acetate flake and acetate yarns, fibres and staple.

Where do we do it? At Edmonton. We have three plants on a 430 acre site. The first produces chemicals—alcohol, ester and ketone solvents, acetic acid, glycols, pentaerythritol, formaldehyde and other organics. The second produces cellulose acetate flake. The third, acetate and Arnel yarns and fibres.

Sales offices are located in Montreal, Toronto and Vancouver.

What is our future? Very bright. (It just happens to be true.) We think of ourselves as a young, progressive, fast-growing Canadian firm with world-wide affiliations. The record bears this out. So does the operation of our Edmonton plant. And the fact that our engineering department is one of the largest and most diversified in Canada.

Our raw materials are basic Canadian natural resources: petroleum by-products from Alberta and cellulose from the forests of British Columbia. Our markets are worldwide, and through our affiliates we have a strong alliance with companies in the textile, chemical and plastics industries.

What would you do? As a qualified chemist or engineer you could be working on *product development, research, process engineering, plant design, construction* or some aspect of production. This is exciting work in many completely new fields. As a chemist or chemical engineer you could choose also a career in *sales or technical service*.

What else should you know about us? Lots more. You can get more information and literature by writing to Department "A" at 1600 Dorchester Blvd. West, Montreal 25, Quebec. Or to the Personnel Department, Canadian Chemical Company, Limited, P.O. Box 99, Edmonton, Alberta.
