The Danish students have been

criticized by the general public

for the misuse of money for the

financing of studies. It is claimed

that the students spent the money

on alcoholic drinks. Together

with this criticism came the pro-

posal not to pay out money to

younger students but instead to

award them free board and lodg-

ing. In their defence, the students

stated that it was by no means

proven that they drank more than

other sections of the population;

asceticism, however, could not be

demanded of the students. (Stu-
