Last year the Faculty, with a view to the instruction of Students and Midwives, established a Lying-in Hospital, the expense of which for ten months, amounting to upwards of £130, was borne by themselves. At present they are relieved from this charge by an association of Ladies, to whom the management of the Charity has been transferred.

This year the expenses of the individual members of the Faculty have been particularly heavy. There has been imported glass for the preservation of preparations for the Museum, to the amount of £34. Chemical Apparatus, Specimens of Materia Medica, Wax Preparations, with a complete Apparatus for the illustration of Midwifery; Botanical and Anatomical plates, &c., have been added, to the amount of upwards of £63, besides which most of the Lecturers have been previously put to considerable outlay in the formation of their private cabinets, without which their Lectures could not have been properly illustrated. The Library of the Faculty, now numbering about nine hundred volumes, amongst which are most of the recent standard Medical works, has already cost upwards of £500. The Matriculation and Graduation fees are applied to its use exclusively, and it is annually augmented by the funds arising from these two sources; the amount paid towards it in 1844, being over £78.

The Medical Faculty conceive that the remuneration at present afforded to the Lecturers is very inadequate to their labor. They lecture from the first Monday in November till the 1st May, with the exception of a fortnight's vacation at Christmas, giving, each of them, five lectures in the week; the hour spent in lecturing, itself, frequently an inconvenience and loss to persons engaged in the active duties of Medical practice, is but the smallest part of their labor, since all require, some more than others, much time in preparing for their daily duties.

The objects which the Medical Faculty have, in petitioning the Legislature for an addition to their annual grant, in the first place, to increase the efficiency of their Department, by the establishment of Four additional Chairs, viz:—Botany, Institutes of Medicine, Medical Jurisprudence, and Clinical Medicine and Surgery; in the second, to give to each Lecturer a more remunerative allowance for his laborious duties; and, lastly, to place themselves in a condition to afford to students greater advantages, by increasing the accommodation of their School in every point of view; and thus to approximate it more closely to analogous Institutions in the Mother Country.

To refute a charge of exclusiveness, which has been brought against the Medical Faculty, they have to state that Dr. Bruncan, one of their Lecturers, is a French Canadian, and that overtures to accept Chairs were at different times made to the late Drs. Labrie, Kimber, and Vallée, also to Dr.
