

TRADE MARK PULSOMETER STEAM PUMPS

are finding favor amongst contractors, quarries, mines, etc., on account of their simplicity, economy and durability.

Our Special Pulsometer Steam Pump Catalogue tells all about them and illustrates various uses to which they can be put.

Write for it.

SMITH CONCRETE MIXERS

have been used on practically every important concrete contract in Canada. The reason is that they are absolutely up-to-date and on past performances have shown their ability to stand hard, fast and continuous work under all conditions.

NOT ONE SMITH MIXER HAS BEEN
KNOWN TO FAIL

What better recommendation could be desired when there are 3,000 machines in use?
