

IMPORTED  
**Clydesdales of Quality**

I have now on hand a stock of  
**Clydesdale Stallions and Fillies,  
Percheron Stallions, Shire  
Stallions, Standard-  
bred Stallions, etc.**

Totalling over 90 head. I have more size, more quality, more style and better breeding than was ever seen in any one barn in Canada before. If you want a big, ton stallion, or a high-class show stallion, or a big, well-bred quality filly, let me hear from you.

**T. B. MACAULAY, Prop. ED. WATSON, Manager.**

**QUESTIONS AND ANSWERS.**  
Veterinary.

**ECZEMA.**

Dog has skin disease. The skin is hard and scaly. If washed, the scales come off, but next day the skin is cracked and almost bleeding, and very itchy.

J. A. C.

Ans.—This is eczema. Instead of washing, use the following ointment. Boracic acid and subnitrate of bismuth, of each 2 drams. Mix thoroughly with 2 ounces vaseline, and apply a little twice daily, or if necessary to check itchiness, apply three times daily.

**COW WITH COLD.**

In July, cow took a cold in her head. She got better. In October, she had another attack and recovered. Now she has a third attack. She breathes heavily, and blows her nose frequently. She has eaten well all summer, and is in first-class condition now.

F. S.

Ans.—The symptoms indicate tubercular disease of the glands of the throat. The only means of making a definite diagnosis is by the tuberculin test by a veterinarian. If she is suffering from a cold, the administration of 2 drams chlorate of potash and  $\frac{1}{2}$  dram quinine three times daily, and steaming the nostrils daily, should effect a cure. If tubercular, nothing can be done.

**ILL-SHAPED HOCK.**

1. Filly, now 19 months old, had a peculiarly-shaped hock when foaled. It appeared to be imperfectly developed, and the leg is crooked. Would blistering strengthen it?

F. H. W.

2. Is this what veterinarians call cow-hocked?

Ans.—1. It is seldom that congenital malformation that nature does not correct in very early life, can be improved by treatment later on. It is possible that blistering may tend to strengthen the joint; at all events, it is all that can be done, and is worth a trial.

2. No. When a horse stands with the points of his hocks close together, with the legs deviating outwards to the foot, in fact, stands like a cow, he is said to be "cow-hocked."

V.

**WARTS—PROMOTING GROWTH OF HAIR AND HOOF.**

1. Colt has warts around her mouth.
2. What will encourage the growth of mane and hair on blistered parts?
3. What will hasten growth of hoof?
4. What is the best ointment for scratches and itchy legs?

T.

Ans.—1. Apply butter of antimony once daily with a feather until the warts disappear.

2. Get an ointment made of 1 dram powdered cantharides, mixed with 2 ounces vaseline, and rub a little well in once daily.

3. Get a blister made of 2 drams each of biniodide of mercury and powdered cantharides, mixed with 2 ounces vaseline. Rub well into the coronet. In 2 days apply sweet oil. Oil every day until the scale comes off. Blister this way once every month.

4. In winter, use the oxide-of-zinc ointment.

V.

**Miscellaneous.**

**DOGS AND SHEEP.**

I have had part of my flock of sheep worried by dogs. Saw the dogs at them; shot one, the other running away.

1. Should I receive full value for the ones dead?
2. From what source? There are dog taxes collected in the township.
3. Should the owner of the dog that was killed pay any?
4. If so, how much?
5. Can I collect any pay for the ones that were worried and not killed? Three have died; three more were worried. The township council pays two-thirds the value of the sheep killed?

SUBSCRIBER.

Ontario.  
Ans.—1. Yes.  
2. From the owners or keepers of the dogs.  
3. Yes.  
4. Such proportion of the damages as the judge, or justice of the peace, at the trial, may think fit.  
5. Yes. Where owner or keeper of dog is known, it is not a case where application to the municipal council, for compensation, would be in order.

Warranted to Give Satisfaction.
