

HEALTH ! GESUNDHEIT !! SANTE !!!

Call it by any name, in any language, it remains the only thing worth striving for. Without it, wealth is a mockery, position a farce, life a burden. Good health is priceless and a joy forever. But how are you going to obtain it? What will place this precious boon in your possession? What will banish your pain, and place you on your feet?—a useful member of society?

As in the past, so in the present, the remedy is at hand, a safe, agreeable efficacious remedy, which cures where more pretentious remedies often fail. Health is

IN YOUR GRASP

if you use Beecham's Pills, the great family remedy, which for sixty years have been a blessing to the ailing in every land. They clear the system of accumulated matter, cleanse the digestive tracts, gently but thoroughly tone the nerves and make them tingle with renewed vigor; renew the blood and make it course with life-giving power. In fact, a new, pain-free existence will be yours

IF YOU USE BEECHAM'S PILLS

SOLD EVERYWHERE

IN BOXES, WITH FULL DIRECTIONS, 10c. and 25c.

INTERNATIONAL INSTITUTE OF AGRICULTURE

The ancient city of Rome which was for so long the center of world-power, and which is still the seat of vast influence in other respects, is the headquarters of an organization which includes nearly all the countries of the world, and is designed to promote the interests of commerce and of peace. This is the International Institute of Agriculture, which was formed at a convention in June, 1905. A second convention was held in December, 1909, at which delegates from forty-six of the forty-eight adhering countries were present, Canada being represented by the Hon. Arthur Boyer and Archibald Blue.

A part of the aims and purposes of the International Institute of Agriculture is to secure greater uniformity

between the agricultural statistical services of the different countries; greater comparability between the information officially reported by the several countries as to agricultural conditions; and more complete and reliable information as to the conditions and yields of crops throughout the world than is now available.

Market prices of products are influenced by information as to crop conditions. At present, many private and commercial agencies collect data in a practical, honest and effective manner, and freely disseminate such information to the public; but, on the other hand, there are agencies which, from lack of complete information, or from a desire to manipulate prices, circulate false reports, which cause violent fluctuations in values.

As a check against the evils of in-

accurate or misleading reporting, it was decided at the 1909 convention of the institute, to establish a statistical service, which was accordingly started January 1st, 1910. This service sends out reports monthly as to area, condition and production of wheat, rye, barley, oats, maize, rice and cotton. Questions are sent out to the different countries the first of each month, and the tabulated answers are published about the 20th of the same month. Information is only to be supplied by governments adhering to the convention, or under their responsibility, or through their intervention. It is desired that answers as to crop conditions or prospects be expressed in percentages of an average crop.—The terms of the metric system are used in published reports, areas being given in hectares (a hectare is about 2½ acres), and yields

in quintals (a quintal equals 220½ pounds).

As yet, the information contained in the monthly reports is very incomplete, but as the countries continue to fall into line, as they are doing, fuller and more valuable reports will be issued. It is intended that statistics regarding other crops than those mentioned, and also those relating to live stock, may be included in later reports. A yearbook, summarizing the information received monthly, will be published at the proper time.

It will come as a surprise to most to know that the forty-eight countries affiliated with the international institute embrace 98 per cent. of the population and 95 per cent. of the area of the world.

CANADIAN AGRICULTURAL MOTORS, LTD.

OFFICES AND DEPOT, SASKATOON, SASK.

SOLE LICENSEES FOR SAUNDERSON PATENT AGRICULTURAL MOTORS

GUARANTEED OF BEST
BRITISH MANUFACTURE

AWARDED 15 GOLD AND SILVER MEDALS

No. 1, designed for large farms; will plow 15 to 20 acres per day; pull three binders, mowers or seeders; haul 12 tons on the road.

Four-cylinder engine, fitted with three speeds—2½, 3½ and 7 miles per hour—forward and reverse. Self-starting magneto ignition; fitted with steel cable for grubbing and road-making; carries fuel and water for one day's work. Extension wheels for soft ground. Made in two sizes, 22 h.-p., and No. 2, 14 h.-p.

No. 4, 2½ h.-p.—Handiest and cheapest machine on the market. Designed for small farms. Will plow two acres per day. Only one man required, who operates his plow from driving seat. Will pull a mower, harrow or disc, etc. Will haul 1½ to 2 tons on the road. Carries a saw bench, grinder or pump, etc., which it operates where required. One air-cooled cylinder, fitted with three speeds: 2½, 3½ and 7 miles per hour; forward and reverse.

No. 3, 6 h.-p.—A larger size of the above, fitted with 2 water-cooled cylinders and three speeds. Has three plows, operated from driver's seat, as in No. 4, and will pull one eight-foot binder and drive a small thresher. Carries fuel and water for a day's work, and drives small machines, same as No. 4.

All our machines are fitted with self-starting magnetoes, and require no batteries, repairs and spares at depot.
