## Report of The Lady Northcliffe Hospital

Grand Falls, Newfoundland--1914-15.

The Hospital was opened in July, 1910, but a report was not issued until 1911, and that only dealt with that year. Another one was issued in 1912, and also one in 1913.

About the usual number of patients has been admitted each year. A noticeable feature is a diminution in the number of serious accidents. This can be explained by the employees becoming more accustomed to the machinery in the Plant and greater care being observed. In 1913 two thighs and one arm were amputated. The operations still average about 50 per year, or almost one a week. The number of private patients varies widely. It was found necessary to raise the charges for them to \$2.00 per day. This amount covers the gross cost. These patients are admitted from the adjoining towns, and are mostly people who are not employed by the A. N. D. Co. Owing to a smaller number of them in the last two years the total hospital days was lowered. Thus in 1913 one private was in the wards seven months, and again in 1914 there was a patient in for three months.

These two patients made the total average number of hospital days much higher for these two years. About 20 of these private patients are admitted each year.

Total number of patients in wards for year	1913 119	1914 97	1915 93
Total number of patients remaining from previous year	7	3	3
Total number of males in wards	75	63	64
Total number of females in wards	32	30	30
Total number of babies in wards	5	1	4
Total number of deaths	6	5	7
Total number of hospital days	2,097	1,721	1,296
Average number of hospital days, approximate	17	17	13

Expenditure:			
Nurses	\$812.00	\$741.50	\$704.00
Servants	463.00	477.50	470.00
Provisions	1,380.77	1,091.15	1,011.84
Drugs and dressings	497.80	350.58	269.81
Fuel	431.75	405.25	349.00
Laundry		277.77	195.45
Insurance	51.83	54.00	51.82
Light, electric heater and water	92.82	92.52	107.38
Cartage, telegrams and telephones	49.60	40.97	59.95
Repairs	423.57	2.28	1.21
Sundries, including freight, etc.	25.17	234.66	47.65
Real Estate charge	120.00	384.00	385.40
Total	\$4,348.10	\$4,151.19	\$3,653.51

These figures are for the calendar year and not the Country's fiscal year, which extends from September 1st. to August 31st.

The repair bill was large in 1913, because the large ward was covered with felt and also papered. During the last two years the Orderly has made all repairs, and painted the inside of the building with three coats.

The sundry account of 1914 is large owing to some expensive renewals in equipment. From now on, each year will see a demand for replacing worn out material.

The real estate charge was added in 1913 but only charged four months. The full amount is charged in the last two years.

Some economies have been effected. It has been found possible to dispense with the charwoman.

The fuel cost is still very high, as a fire is needed nearly every month, except August. The advisability of installing an electric radiator in the big ward and operating rooms is being considered.

**Terra Nova is Fast Making a "Home Run" for Financial Ruin**

It's time for the people to shake off their Rip Van Winkle slumbers and face facts as they are. Never was better advice given or more timely admonition tendered to this pitiable country of ours. Never was a country in a more unenviable position than ours at the present time, and we feel it more because of the righteous duties facing us before which we are helpless. I refer to the financial calls of the Mother Country. It is true we live under the freedom of the Union Jack—"Britannia rules the waves"—and all that, but at the same time we are bound hand and foot by a system of slavery that has become intolerable. We are not free. We are at the mercy of a set of unscrupulous politicians and Water Street grabbals. Look at New Zealand and Australia. These possibilities are not a great deal greater than ours, but what a different picture they present to the world at this period. Theirs, especially New Zealand, is a government of the people, for the people and by the people, and the people will not allow any other course to be pursued. No ruinous combines, petty politicians or conscienceless grabbals are allowed to pollute the financial atmosphere. There the government has a grasp of the countries' resources and turns these into dollars for the people. Petty sighs and sighs.

**Causes of Death.**

1914	1915
Accident	Abscess of Lung
Endocarditis	Accident
Meningitis	Shoot. Accds (2)
Septicæmia	Eclampsia
Peritonitis	Meningitis
	Pneumonia
	Three of the accident cases died within four hours of admission.
	H. B. CHAMBERLAIN, M.D.
	Grand Falls,
	August 1st., 1916.

## Accuse Japanese Firms of Sharp Trading in India

WASHINGTON, Oct. 12.—Confidential reports reaching Washington from official sources tell of widespread distrust of Japanese trade methods that war conditions emphasized. The English press of Japan, according to the reports has been engaged for some time in vigorously attacking the alleged unfair practices of the Japanese to further their national trade interests.

A specific instance with which these confidential reports deal is the extension of Japanese trade in India. As a result of war conditions and the inability of German and British manufacturers, who had previously supplied the Indian market, to fill their orders, representatives of Japanese exporters have had great success in pushing their products. Particularly important gains have been made in such lines as hosiery, piece goods, silks, glassware, rubber, matches, and umbrella fittings. Japanese exporters, it is explained, have studied the Indian market carefully, and appear to be very successful in meeting the Indian population's standards of tests and expenditure. Moreover, it is asserted in the reports, they have the advantage of direct lines of subsidized steamers and of low freight rates.

One report states that in view of these Japanese successes, it is surprising to note that the native importing houses of India are looking forward to the end of the war, when they can again turn to the manufacturers of the nations with which they dealt formerly. The cause of this, it is stated, lies in extreme dissatisfaction with certain practices which the Japanese exporting houses are alleged to have employed.

The chief cause of complaint against the Japanese, the reports say, is the practice of filling orders with goods not up to sample. Indian importers say that this practice is extremely common and that great losses have been suffered in consequence of it. The reports, that Japanese merchants submit samples of far better quality than can be manufactured for the prices quoted.

Other complaints arise from the alleged fact that big orders are accepted by concerns of very limited resources, which throw them over when they find it impossible to fill them. Payment is generally requested by letter of credit or demand draft, and the purchaser, it is asserted by those who are complaining, rarely sees the goods before he parts with his money. Another complaint is based on the acceptance of orders from outside parties when an exclusive agency has been granted.

One report says: "The direct cause of the trouble is perhaps the attempt of the Japanese to handle direct a large and very rapidly growing trade with insufficient capital and experience and with methods of manufacture which do not insure a uniform product." For a long time the Japanese press defended its exporters vigorously and made counter-charges of bad faith against the Indian importers. One report says that these defenses were somewhat broken when it became known that similar complaints had been coming from markets as widely separated as Russia and Australia.

## Big Railway Strike in Canada May be Result

WINNIPEG, Man., Oct. 11.—There is a very lively impression in railroad and labor circles that a strike involving the great brotherhoods on Canadian lines is imminent. The basis is similar to that which very recently caused a strike in the States recently.

Vice President Grant Hall, of the Canadian Pacific Railway has given out a statement saying the brotherhoods distinctly promised not to force a strike during the war. The brotherhood representatives assert they made no such promise that they do not want to strike during the war, but that Canadian lines are as able to pay as much as American railways for the same labor and improve conditions. The C. N. R. and G. T. P. will be forced to follow what ever action the C. P. R. may take as they are too weak nationally to resist the brotherhood's demands. Brotherhoods are now voting on the proposition to strike, in fact railway circles are preparing for trouble in the west.

## Newspaper's War Bet is Accepted

(St. John Evening Times) News was received in St. John today from Havana that the offer of La Luchía, a Spanish newspaper, that had signified its willingness to bet \$10,000 that the Allies would win the war, had been accepted by Mrs. Agnes Newman, wife of a wealthy Philadelphia lawyer, and sister of Sir Roger Casement. Mrs. Newman, who is said to have made known her intention to accept the bet while in Atlantic City, communicated with the New York representatives of La Luchía and said that she would post the money at once. It is understood that the \$20,000 is now placed in a stakeholder's hands in New York. There is no mention of time limit in the bet.

### Serious For One.

Patient—But—er-r—the operation won't be serious will it?  
Young M. D.—Only for me! I never tried it before.
