The degree of doctors of civil law was conferred upon Mr. Stanley and upon Prof. Godwin, of Harvard University.

ROME, June 26.—There was a heated de bate at a meeting of the Municipal Counci last night in regard to the bill introduced into the Chamber of Deputies by Prim into the Chamber of Deputies by Prime Minister Crispi, to assist in re-organization of financial affairs of the municipality. At the conclusion of the discussion all the members of the Council, except Menoti Garibaldi, resigned as a Protest against the Premier's measure. Signor Garibaldi declared he would retain his seat. His friends cheered him heartily, but others in the audience hissed. The Preparters in attendance interfered on bereporters in attendance interiered on behalf of Signor Garibaldi and an altercation with his opponents in the audience ensued. It was found necessary to call the police to quell the disturbance.

Union member for Barrow-in-Furness, who resigned his seat and is seeking re-election on an anti-compensation platform, is of a character that has caused surprise among all parties. Mr. Caine was foremost among those who seceded from the Liberal party because of their inability to support Mr. Gladstone's home rule scheme, and being one of the ablest of the dissidents he took a leading position in the Unionist party by common consent. Of late he has become restive under the Conservative domination which a number of both sides received black eyes and numerous bruises. The trouble arose from the French wanting to take bait out of the Newfoundlanders' nets. The people of traits of independence incompatible with his position as the whip of his party, and demoralizing to the Tory Unionist coalition, but no one was prepared for the extreme movement he has undertaken. From the tone of his address to his constituents, it is evident that Mr. Caine is paving the way for his return to the Liberal fold, where he will be heartily welcomed. He expressed his conviction that the errors into which the Liberal party were led by their desire to do justice to Ireland have been remedied; that the defective portions of the plan of home rule have been eliminated from the scheme, and that the principles of that programme will be accepted by the people at the next general elections. Nothing stronger than this declaration of Liberal principle could be expected from one of Mr. Gladstone's most treating followers, and this, together with

his consistent opposition to the Govern-ment's compensation scheme, should secure to him the undivided Gladstonian vote in

The Conservatives will nominate a candidate to centest Mr. Caine's seat, and the mionist leaders have decided to support to Tory. It is certain, however, that many is the Unionist electors will adhere to Mr. Dane in spite of the decision of the leaders.

CRITICAL OPERATION. Fracheotomy Successfully Performed on

Detroit, June 25.—A critical operation was successfully performed at the Grace Hospital on June 10 at 6 p.m. by Dr. J. B. Kennedy, assisted by Dr. John Wilson and the house staff of the hospital. Lorenz Hillicker, the 9-year-old son of Mr. James Hillicker, of 533 Twenty-third street, was taken suddenly ill with membranous croup, and though every known treatment was resorted to, he rapidly grew worse, breathing became almost impossible, and as a last resort the parents submitted to the proposition by the physicians to remove the patient to the Grace Hospital for an operation. The ambulance was called, the child hurried to the hospital for an operation. The ambulance was called, the child hurried to the hospital, and tracheotomy immediately performed. The little fellow rallied well from the operation and gave hope to all that the one chance for life he had taken would be successful. A continuous spray of limewater was kept playing over the wound in the throat and the tube in the throat was removed and cleaned every hour. His improvement was noticeable each day, and on June 12, at 10:30 a.m., the stitches were removed and all danger was considered past, though no relaxation was made in the careful nursing. The incision in the throat closed rapidly, and on June 18 he was allowed to leave his room and be wheeled in the corridor, and on June 19, at noon, he was discharged entirely cured.

TOENAILS AND HAIR. A New Orleans Man Voodooed - The

New Orleans, June 26.—The voodooism is not wholly dead in New Orleans is proved by a suit recently brought against John Sandmaker, a railroad man living in this city, who has been in bad luck and bad health lately. A friend induced him to visit a fortune teller, who declared that he had been voodooed by an enemy. The charm was in a certain tree, she said, and until that tree was cut down, or the charm discovered, he (Sandmaker) would continue to suffer. Sandmaker went at once to his home at the corner of Claiborne and Fourth streets and began work on the tree. If was a tall magnolia. In the very heart of the tree, in the center of a mass of wood, the gri-gri charm was discovered—toe nails and hair of the exact color and character of Sandmaker's—these being the materials are susually employed by the voodoos in bringing bad luck on an enemy.

The discovery created great excitement among the neighbors, particularly among the negroes.

Washing at Reciprocity.

Washington, D. C., June 26.—The Evening Star says: "An informal conference has been held by a number of Western Senators and members of the House who are pleased with Mr. Blaine's suggestion for tariff legislation aiming at reciprocity between the United States and the other American republics. The subject was very generally discussed and Mr. Blaine's proposition was unequivocally indorsed. Senators stated that it was rapidly growing in favor in the Senate and expressed confidence that the Hale amendment could be adopted. They seemed to have no doubt about this. There was another proposition in the same connection that they thought was sure to develop great strength in the Senate and would finally prevail. This proposition is to abandon the McKinley Bill and all attempts at a general revision, and to adopt amendments to the present law reducing duties on or admitting free of duty certain products of American nations whenever reciprocal action is taken by the governments of other nations. free of duty certain products of American nations whenever reciprocal action is taken by the governments of other nations. Tamed by Perfumes.

Tamed by Perfumes.

Wild animals are completely fascinated and can be tamed by perfumes. There was a Mrs. Lee in India who had a tame leopard that played in the house with her children, says John G. Wood in the New Book. He was very inquisitive, as all of the cat tribe are, and loved to stand on his hind legs on the window sill and look at the passers-by. When the children wanted the place for themselves they would all take hold of his tail and pull him down by that. He was generally very amiable, but sometimes, his claws being very sharp, the children were scratched. So Mrs. Lee taught Sal to keep his claws sheathed by giving him, when he did so, a little paper tray on which lavender water had been dropped. This would throw him into transports of delight. He would tear the paper into bits and roll over der water nad been droppen. In wohld throw him into transports of delight. He would tear the paper into bits and roll over them on the floor.
