TO DISCUSS THE

CONTRACTOR OF THE CONTRACTOR O MR. CLERGUE.

Minister and Capitalist Banqueted at Owen Sound.

Stirring Event -- Mr. Tarte Compliments Mr. R. L. Borden.

Racial Good Feeling-Mr. Clergue on the Development of Transportation and the Ship-Building

Industry.

[Special Dispatch to The Globe.] Owen Sound, June 10 .- On Friday evening a banquet was given in the town hall to the Hon. Mr. Tarte and Mr. F. H. Clergue by the citizens of Owen Sound. The hall was tastefully decorated with flags, and on the four walls of the room were banners bearing the mottoes: "Canada, Vast in Area and Resources," "Canadian Development by Land and Water," "Owen Sound, the Liverpool of Ontario, Wel-comes Her Visitors," "The Aim of Every True Canadian is the Prosperity of His Country." The chair was oc-cupied by Mr. Aaron Read, mayor of Owen Sound, who had on his right, Hon. Mr. Tarte, and on his left, Mr. Other prominent men F. H. Clergue.

had seats at the guest table. Letters of regret at inability to be present were read, among others from Wilfrid Laurier, Sir Richard Cartright, Hon. Mr. Fielding, Hon. Wim. Paterson, Mr. R. L. Borden, Hon. Geo. Ross, Hon. F. R. Latchford, Mr. J. Whitney, Sir Charles Rivers-Wilson

and Mr. D. P. McNicholl, C. P. R. The teast of Hon. J. I. Tarte was proposed by Vice-Chairman C. Eaton, president of the board of trade, who ario to visit Quebec oftener, confident that more frequent intercourse would be advantageous to both peoples.

HON. J. I. TARTE. Mr. Tarte, on rising to respond, received an ovation. In well-chosen words he expressed his appreciation of the warm welcome accorded him. He referred to his former visit in 1897, when he saw a village. Today he saw a town, and almost a city. He assured the people of Owen Sound that Dr. Horsey had represented to him over and over again that perhaps a decent public building would be acceptable to Owen Sound. Dr. Horsey had also stated that the dry dock is far too short and too narrow, and had bothered him a good deal in connection with the requirements of Owen Sound. The minister of finance, Mr. Tarte said, is always afraid when he got away from Ottawa, and if his little trip to Owen upon this occasion cost the country a few thousand dollars it vould be Mr. Fielding's fault for not being present; but he would say without any hesitation whatever that the postoffice he had seen today is not the right thing for this bright town

(Cheers.) Of course, he would not make any promises. (Laughter.) CONFIDENCE IN GEORGIAN BAY. how when he came into office he found and prejudice, and he took the first op-the department had imported dredges, portunity he had of speaking in Ontario A Noteworthy Instance of Animal Pluck anp but with his confidence in Canada and Why Should it Be Proper for the Boy But Not for the Girl?

A man may remark on his intention to marry at some indefinite future time, when prudence or other considerations may make it possible, or advisable, without having, as a rule, to run the gauntlet of a chorus of impertinent and stupid would-be witty remarks. But should a girl be bold enough, or rather, natural and simple enough, to say the same thing, what for the Canadians," he believed that, although a simple newspaper man, he could build dredges in this country. He started improving the shipyard at Sorel, and his opposition friends went for him very strongly for doing so, because they said he was simply throwing money in a hole. built in Sorel dreages better than any imported dredges, and cheaper. (Cheers.) Mr. Tarte asked if we should not build Canadian bottoms on the. great lakes. Mr. Tarte said that if Clergue started a shipyard, he uld be prepared to give him a contract for a big suction dredge in that would be the result? Why, everyone knows that she would be promptly sneered out of countenance. And why? Is it immodest for a woman to express a determination to enter into a state which we are being continually reminded is a natural and honorable state, while it is modest and proper for a man to do so? Such a state which was save a bunch of soapweed releved the monotony of its level.

About 50 yards away toward the ravine lay an object, almost the color of the prairie itself, which at first I thought was a stone, but which on a second look I discovered to be a jack rabbit. He was squatting down, his long ears folded back along his body, motionless. The mystery of the eagle's queer movements was revealed—it intended to dine or rabbit meat. shipyard. Dreages are needed in Ontario. If they put their heads together it will not be long before there will be on the great lakes a shipyard that will supply Canadian bottoms to carry Can-

adian trade through Canadian chan-The transportation question is the most important question Canadians have to grapple with. and the building of ships is bound up with it. The Georgian Bay is the natural reservoir for the immens trade of the great lakes. Forty million tons of trade originates on them, but we have not carried much of it, although we have the shortest route; but we are short of Canadian bottoms, having, perhaps, one to forty Ameri-

tinually reminded is a natural and honorable state, while it is modest and proper for a man to do so? Such a distinction would never be drawn except for the "cheapness" to which reference has been made. If a man wants to marry, he can marry; if the first woman he asks refuses him, he has only to ask a second, or perhaps a third or fourth. It would be safe to guarantee that within a month any man of fairly respectable life and position and appearance, who cared to make the experiment, could marry in his own class, could marry probably a woman much superior to himself. But wha: about the girl who intends to marry "some day?" Is she not in a very different position from the man? Here is a girl of good character—much better than the man's, probably—average intelligence, average good looks. Theoretically, she is free to marry whom she will; but is she? If she receives one distinct offer of marriage the has had more than her share, according to the probable average. The fact that by an unwritten law average is that the probable average. The fact that by an unwritten law average is the law an unwritten law average is the law an unwritten law average. The fact that by an unwritten law average is the law an unwritten law average. The fact that by an unwritten law average is a natural and hardly come to a stop when the eagle apparently oblivious of my presence, swooped fiercely down upon its prey. The rabbit passively awaited the onslaught. Straight as a falling shell the great bird swooped down. It was almost on the rabbit and seemed to seize him, when suddenly the long ears unfolded and a streak of gray flashed upward through the air. It was a tremendous leaver and so correctly timed that the huge bulk of the eagle swept on beneath him, and he dropped back unharmed. The rabbit instantly darted at full speed toward the ravine. He ran 25 or 30 yards before the eagle was able to turn and renew his attack.

As the eagle swept downward for the second time I saw that it would pass far enough above the rabbit to seize him sho GOODWILL BETWEEN TWO RACES Mr. Tarte expressed his pleasure at meeting the people of Ontario, and his ada for the purpose of developing the desire that the people of Ontario and rich resources of the country—a greater Quebec could meet more frequently. He heritage than those of any other coun-pointed out the necessity for harmony try—(cheers)—Mr. Clergue said that between the two races, and spoke of the pride which he and his race had in | with the difficulty that the ministers in their British citizenship and the freedom they enjoy under it, and at the country's resources, and he ventured same time their pride in their French the assertion that there was not a Mr. Tarte, "are a loyal race, most anxi- possessed the knowledge relative to the the eagle's purpose, and this time merely flattening himself against the earth the bird passed above him; again the rabbit ous to live and work in harmony with resources of the northern part of Oii-

CATARRH Colds, Coughs, Influenza, Bronchitis, Asthma and all Diseases and Lungs.

It reaches the sore spots—heals the raw places—goes to the seat of disease—acts as a baim and tonic to the whole system—\$1.00 at druggists or by mail. Munyon, New York and Philadelphia.

After all, the question of race is a ques-tion of accident. My father and mother were of French origin. Well, I cannot be a boy of English origin. Your fathers | tinent had imported from Italy. But where is the difference? We aft we are bound to remain here. I have said it often, but I cannot repeat it too often, we have no intention of leaving the country, we cannot quit, we are here to stay; you are about three millions, and you have no intention of getting out, I am sure."

BOTH HERE TO STAY. "In other words, we are here to stay, to live together, and there is no reason under the sun why we should not live in harmony like brothers and (Cheers.) Mr. Eaton has alluded to the fact that at certain elec-tions prejudices have been raised. I been in public life for 30 years, and find that all elections are alike. Public sentiment, however, is just like water, it will always find its level. is so much common sense in this Canadian nation that I never fear the future. There may be some little difficulty, some little trouble. Well, in the best families there is trouble. last, the whole question is settled in a short time.

WITH NATIONS AS WITH FAMI- tries. LIES.

"Well, it is the same thing in the life of a nation; there may be some little difficulty and trouble; but it does not and cannot last." (Cheers.) referred to his visit to the Paris Exhibition, at which 42 nations were represented, and said that he came back to Canada prouder of his country than he had ever been before, because he found out without much trouble that we had more resources than most nations represented there and that our institutions are better. Is there any other country more free than this Canada of ours? he asked. We call ourselves that anyway. We are a free nation. There are nations in the world that call themselves free that do not enjoy onehalf the liberties that we enjoy here. He heartily appreciated the motto — "Canadian Development by Land and Water"—and assured the people of Ontario that the people of Quebec are in cordial sympathy with it.

CONGRATULATES OPPOSITION

LEADER. Mr. Tarte regretted that Mr. R. L. Borden was not present, and paid a tri- try, and the manufacturers of older Cn-He had always had great confidence in which he had led the opposition their supplies. in the Georgian Bay. Mr. Eaton had during the last session. Mr. Borden pronounced the word "shipyard." Mr. had, he said, manfully and patriotical said Mr. Clergue, if he will settle on it, had been when he word and told by repudiated the appeals to passion and all that his company are getting is to pay public homage to that gentlein pursuance of his policy of "Canada | man and to offer him his public sympathy in the course he had followed. In conclusion Mr. Tarte paid a tribute

to the enterprise and ability of Mr. Clergue, who, he said, is on American, but who thoroughly deserves to be a Canadian, and in whom, they had a great "builder," a man of genius. Dr. Horsey, in eloquent terms, proposed the health of Mr. F. H. Clergue, who, he said, was so fully and so eloquently able to speak for himself that e need say but little of the great work that gentleman is doing in the development of Northern Ontario. Dr. Horsey referred to the marvelous development which he had witnessed in China, Japan and Java, but he had been forced to return to Canada, to his own native province, to witness the most marvelous development that it had ever been his privilege to observe, and the inspiring genius of it all was Mr. Clergue.

MR. F. H. CLERGUE. Mr. F. H. Clergue was accorded an ovation when he arose to reply. expressed his appreciation at made a joint guest with one of the greatest statesmen of the present day. He returned his most hearty thanks for the generosity of Owen Sound in inviting him to come not only to be a joint guest with Mr. Tarte, but also for the purpose of showinf him how to become a millionaire by establishing a shipyard at Owen Sund. Referring to the difficulties in the way of a stranger coming to Canwhen he first came to Canada he met power had no great confidence in the "The French-Canadians," said public man in either government who

would put on a pair of rubber boots and go with him into the bush he would covince them of the existence of large areas of tillable soil and rich deposits of ore and minerals, the existence of which was not credited. A STORY OF DEVELOPMENT.

Referring to the development at Sault Ste. Marie, Mr. Clergue said that having learned that water power is senerating For Internal and External Control of Radway's Ready Relief. the cheapest way of generating motive power, and having found the great natural power furnished by the large volume of water tumbing down-hill at Sault Ste. Marie, he had associated some friends with him, and before developing the power he sought to ascertain whether employment for the power, if utilized, would be forth-coming. He found rich raw material in large quantities, which could be obtained at small cost. The first resource he found was the large forests of spruce furnishing the raw material for me-chanical pulp. Having gone as far as possible in this direction, he erected a sulphite pulp mill, necessitating sulphur which all the other mills on the conand your mothers were of Scotch or found that necessary chemical constit-English or Irish origin; you cannot be uent in the nickel ore at Sudbury, and of French, nor I of English, Irish or from that source obtained the sulphur Scotch origin; it is too late in the day. necessary. This led on to the producnecessary. This led on to the produc-tion of nickel. Investments were made belong to the same Canadian nation, in nickel lands at Sudbury, and in a few months the works at Marie will be turning out 100 tons of nickel steel a day. (Cheers.) ONE STEP LEADS TO ANOTHER.

The nature of the demand made it more profitable to adulterate the nickel with common iron ore, so search was made for iron, and the result was the discovery of the Helen mine, which is the highest exposure of iron ore known. Having an abundance of iron to spare, the next most natural step was to embark upon the manufacture of steel rails in order to utilize it, and he made a contract with the government, which had variously been reported by gentlemen of various political beiters - (laughter)-but the contract he made was good for himself as well as for the country. This year they are expending \$2,000,000 for the erection of a steel plant, which will be the most improved the world, and he took pleasure in anthe honeymoon is past there is apt to nouncing that since that contract had be some little trouble, but it does not been made the shareholders of his canpany had paid in \$20,000,000 in cash to be expended in developing the indus-

OWEN SOUND'S FIELD. Owen Sound has not the iron deposits and forest wealth which exist at Sault Ste. Marie, but it has the best harbor on the Georgian Bay, and through that it can have a large share of the bene fits to be derived from handling the products of the works at Sault Ste Marie and of the country tributary to At present it can only avail itself of that trade for eight months in the year, but he hoped that before the end of two years, by the completion of the Manitoulin and North Shore Railway, Owen Sound would become a twelve-

months town, and be open for trade whole year. (Cheers.) governments both at Ottawa and Toronto had at last recognized the necessities of Sault Ste. Marie and had assisted to provide the necessary means of transportation. He justified the action of the government in giving land grants to encourage capital to develop the country. He denied that he is a world that will cure Fever and Ague railway promoter, but insisted that he and all other Malarious, Billous and is an industrial manufacturer, and that it is necessary to have a railway to get into the country and develop the coun-

tario must have a railway to send in Any man can have 160 acres of land, 160 acres for every man they put into turing industries. The railway is now being constructed at two points, and before fall will be at four points.

WILL ENCOURAGE SHIPBUILD-ING.

The next industry on his mind was that of steel shipbuilding. There are great opportunities for the ports on the Georgian Bay, and he assured those contemplating the establishment of such an industry that before months the works at Sault Ste. Marie would be turning out all the materia necessary for the construction of ships. If a shipbuilding plant is established here, with capacity to tourn out 500-foot vessels similar to those on Lake Erie. age it to the extent of a couple of hundred thousand dollars. In conclusion, he counseled the citizens of Owen Sound, Collingwood and other Georgian Bay ports to work in harmony and mutually support each other, assuring them that no one of them could handle all the trade, and that there would be suf-

The Asthmatic's Agony. Wakeful night, suffocating sensations, difficult breathing. Who can describe it? This disease, partly nervous, partly congestive, partly the result of microbic irritation, is no longer treated by nauseous stomach destroying drugs, but by Catarrhozone, that destroys the microbe, relieves congestion, and relaxes the nervous irritability, that renders breathing so difirritability that renders breathing so dif ficult. The medication is carried by the air you breathe to the very seat of the disease, and removes at once the cause. The great discovery is known at Catarrhozone. Its influence upon Asthma is simply marvelous. Catarrhozone prevents as well as cures, and is the only remedy guaranteed to cure. Your money back if it falls. Two sizes, at all dealers, 25c and \$1.

The recent census shows that Naples is still the largest city in Italy. It has with its suburbs, about 700,000 inhabitants. Milan comes next with 490,000. Rome has 462,000, Turin 335,000, Genoa 235,000. Venice ranks as the ninth city

with 151,000.

A SOUND STOMACH MEANS A CLEAR HEAD.—The high pressure of a nervous life which business men of the present day are constrained to live makes draughts upon their vitality highly detrimental to their health. It is only by the most careful treatment that they are able to keep themselves alert and active in their various callings; many of them know the value of Parmelee's Vegetable Pills in regulating the stomach and consequently keeping the head clear.

Livernool is not a healthy city. In Liverpool is not a healthy city. In

some respects it is like our American city of Baltimore, which has frequently been called the Liverpool of America, inasmuch as it has many natural advantages akin to that of the great

J. A. NELLES, Agent, 422 Richmond street,

ways with the result that the rabbit kept unharmed, and gradually approached the ravine. At last, with one final dash, he sprang over the precipitous side of the avine and disappeared. The great bird, balked of its prey, hung disappointed over the ravine for a moment, and then circled majestically skyan hour. During that time had the rab-bit once yielded to panic, or had he in one instance failed to foresee the eagle's method of attack, he would have paid the penalty with his life. POPULATION OF EDINBURGH. The census returns which have just been made up for Edinburgh show that the capital of Scotland has now a population of 316,540 people. Ten years ago, on the occasion of the last census, the numbers were 272,978, thus giving an increase of 43,562. The growth of the population of Edinburgh, which is a non-manufacturing center, nas been in many respects remarkable during the last century. Until the middle of the eighteenth century Edinburgh had aimost remained stationery for 200 years. In the beginning of the last century the population of the city was just over 100,-000, so that during the century the ing the day, or does not sleep well at number of its inhabitants has been night, try what Lactated Food will do more than trebled, while the town has for the little one. A week's trial will thoroughly convince all mothers that Lactated Food is the best form of nourishment for the baby. All druggists in 1851, 193,303.—Chicago Record-Hersell Lactated Food.

If we were to tell you what Powley's Liquified Ozone would do for diphtheria, coughs, colds and all bronchial affections-how quickly and surely it cures them--you would say : "Another patent medicine fake." Will you let us send you a list of the names of disinterested people who will tell you what Powley's Liquided Ozone has done for them? Drop us a card.

Powley's Liquified Ozone stimulates the membranes, cuts the phiegm and produces a healthy condition of the system in which disease germs cannot live. It is genuine condensed oxygen and not a patent medicine.
