MONTHLY ALMANAC

ORIGINAL:

It will be recollected that a fortnight ago we gave a specimen of Mr. WIGHTMAN'S intended work on the Canadas, and as we were prevented from following up the subject last week, we wish to call attention to that which we now present as follows :-

ST. LAWRENCE CANAL. The whole of the improvements in question may be effected at an expense of about eight ons of dollars. This may seem at first view, a very large sum, but let it not be for-gotten that New York and Pensylvania are each expending thirty, and Maryland twenty millions to secure the same objects. Indeed for less than four millions, Quebec will be placed in as good a situation for the trade of the North as either of those cities; and for lour or five millions more, she can compete on nearly equal terms with them for the trade The prospect before her is most brilliant. The exports and imports have in the five years from 1831 to 1835, increased from £3,323,000 to £6,000,000 currency; and from the rapidity with which the upper country is settling, there is good reason for believing that this ratio of increase will not diminish for a long time to come.— Few codatries possess greater facilities for settlement, than that around the lakes, and the time is not for distant when four orthve millions of people will make the St. Lawrence their principal channel of communica-tion with the rest of the world. Nor will the benefits end here; the Fisherman of the

the moment a sea vessel can go to the takes he will find a market opened for the pro-duce of his labour extensive, rapidly in-ereasing, and exactly of the kind best suit-ed to his interests—a direct exchange of the fish of the Gulf for the cheap bread and meat of the West. This will be more advantageous than exchanging in the West Indies or Brazil for gold to be again exchanged for flour at New York. The voyage of a vessel from Cumberland Bay to Toronto or Hamilton in Upper Candada would be, to Quebec 40 days, thence to Lake Outario 4. Lake Ontario 4; having 200 miles of lake navigation for which we may allow 4 days more; making altogether 18 days. Or, it

we wish to go further, another week will suf-ace for the voyage to Detroit, or three weeks to Chicago in the State of Illianois: Allowing 13 days as above stated for the voyage to Toronto and an equal time for detention and return, the expense of a voyage of a vessel of 120 Tons will be nearly as fol-

those important portions of the globe. Much has been said of the "reciprocity" which the Americans tave given for the West India trade. Hitherto this "reciprocity" has operated, as regards us at least, all on one side; with the new States of the

tout, which adjust the profits of their experiments.

The people of several of the States have adopted an admirable plan for raising funds for Rule Roads, and which might be initiated in the class of the Bay Verte Canal. The State borrows money at a long credit—say 50 years—and the lends it to stockholders, taking mortgages upon that and allow upon the road, as security; the profits of the coad to go towards the liquidation of the debt. By this means public works are carried on solely upon the credit of the community, suit the community self colored in the hotel registers, and had been politically conspicuous for several years, "I know the Potawattomies," said he.
