

in British Columbia." It is not included in the Rev. G. W. Taylor's "Preliminary Catalogue of the Marine Mollusca of the Pacific Coast of Canada, with notes upon their distribution," in the Transactions of the Royal Society of Canada for 1895, though this paper gives a list of the land and fresh water, as well as of the marine shells of British Columbia, and quite recently Dr. Dall writes that he can find no specific record of *Gonidea* from that province in the United States National Museum.

In March, 1906, however, two dead but characteristic and separate valves, of shells that, in the writer's judgment, are clearly referable to this species, were presented to the Museum of the Geological Survey, by Mr. G. E. Winkler, of Penticton, who writes that he had recently found them "in the Okanagan River, near where it leaves Okanagan Lake, at Penticton." And, still more recently, in August last, he has collected and kindly forwarded, four perfect and adult, living but otherwise similar shells, from the same locality. This would seem to be the first definitely Canadian record for this well known California and Idaho species.

*Pisidium Idahoense*, Roper.

In the Museum of the Geological Survey there are two specimens, one perfect one and a single valve, of this species, which were collected at Fort George, "at the confluence of the Fraser and Nechacco rivers, B C.," by Dr. G. M. Dawson in 1875. This is a previously unrecorded locality for this apparently rather rare species.

GASTEROPODA.

*Polygyra ptychophora* (Brown).

*Helix ptychophora*, A. D. Brown, 1870.

In the same museum there are a few good specimens of this species, from the following localities in British Columbia. Elk River, in the Crow's Nest Pass, collected by J. B. Tyrrell in 1883; Sproat, collected by Professor Macoun in 1890; and Trail, collected by W. Spreadborough in 1902.

Dr. Dall writes that similar specimens from Mission Junction (43 miles east of Vancouver, on the main line of the Canadian Pacific Railway) have recently been received at the United States National Museum.
