YACHT ENGINES, 1 H.P. to 50 H.P.
Safety Water Tube BOILERS
PROPELLER WHEELS
Stationary Engines and Boilers

WRITE FOR CIRCULARS

The civic authorities of Montreal are making a regular crusade this winter to compel all users of steam boilers to provide smoke-consuming apparatus in connection with their furnaces.

In Montreal, Gordon and Ironsides have asked permission from the City Council to erect a slaughter house. J. Alcide Chausse, architect, is preparing plans for a large school building to be erected at Maisonneuve, Que., a church at Bonfield, Ont., and six dwellings on Nonancourt street for F. X. Lalonde. — Robert Findlay, architect, is calling for tenders for seven houses, corner of Prince Albert street and Chesterfield avenue, for E. Bulmer. — Tenders have been called for tenement houses to be erected at the corner of Guy and St. Antoine streets, for A. F. Gault.

Mr. Albert Bell, of Dunville, who has been engaged in the manufacture of yacht

engines and machinery, is carrying on business again in spite of the recent decision against him. He writes us that he has a new shop almost ready on a lot near the G.T.R. yard and close to the station at Dunville. He has orders on hand already sufficient to keep him busy all winter, constructing marine and stationary engines. The name of the new establishment is the "Albert Bell Engine Works," and Mr. Bell proposes to get his share of the trade in this part of the country.

It is said the Richelieu & Ontario Navigation Company will add to their splendid steamer line a big hotel at the Point in Riviere du Loup. It is to be ready for the summer trade and will accommodate two hundred guests.

Mr. Wm. Williamson proposes to build a wood working factory at Eastern Avenue and Water St. in this city.

(From "Free Press," London, Ont., December 9th, 1896.)

"Number two Committee of the Board of Education met last night. . . . It was decided to put in two No. 25 Heeson Fire Grates in the Collegiate Institute furnaces. One of these Grates is said to have saved four tons of coal at Princess Ave. School last winter."

These Grates, 16 x 26 inches, are supplied by
