The wheelchair lift produced by Adaptive Engineering Ltd. is designed for use with rail cars, buses, aircraft, ferries or any situation where a portable device is required for wheelchair access.

Products/Services

Public transit mobile wheelchair lift

Current Export Markets

U.S.A.

Company Summary

Established in 1974, Adaptive Engineering Ltd. provides specialty design and custom manufacturing services, and, more recently, products for the disabled. The company's patent-pending mobile platform wheelchair lift is the result of six years of research and development, working in collaboration with Via Rail Canada Inc. and Amtrak in the United States. The lightweight, manually-operated lift is adaptable for use with railway cars, buses, aircraft, ferries or any other situation where a portable device is required for wheelchair access. The lift weighs about 100 kilogram (220 pounds) with a rated capacity of 250 kilograms (550 pounds) or two persons and one wheelchair.

Products/Services

Infectious disease detection kits

Company Summary

ADI Diagnostics Inc. (previously aligned with Allelix Inc.) was established in 1988 to manufacture and distribute proprietary diagnostic kits worldwide. The company operates from a fully-integrated modern 2,700-square-metre (30,000-square-foot) manufacturing facility employing about 90 people. ADI is committed to developing in vitro diagnostics for infectious diseases, particularly sexually transmitted diseases. In various phases of clinical trials, and scheduled for release in 1989, are ADI-developed microwell-based tests for chlamydia, gonorrhoea and syphilis.

Needleless insulin injector

Current Export Markets

U.S.A., Middle East

Company Summary

Advanced Medical Technologies (1988) Inc. was established to design, manufacture and market devices for home care diabetic use. Utilizing jet injection technology, the company's Preci-Jet 50, a needleless insulin injector, was introduced in 1985 after a six-year development program in collaboration with medical professionals. Designed for persons with diabetes mellitus, the device is currently marketed worldwide through distributors. Advanced Medical, which employs 40 people in a modern 1,800-square-metre (20,000-square-foot) manufacturing facility, is now directing its expertise and capabilities towards expanding operations in the aerospace industry.
