ten cents

march, 1933.

solving the problem . . .

(A) An organizing committee, or bank, to harmonize and manage all transactions

(B) The five factors necessary for the production of basic consumers goods — food clothing and shelter.

(C) The fund of consumers goods manufactured from raw materials, machinery and services paid for in scrip. From this fund are paid not only these three classes of scrip-takers, but also the auxiliary producers of food and shelter who must be taken into any complete scheme.
