Robertson that the Dominion organization as the Auxiliary of the M. S. C. C. undertook responsibility for all work among women and children in overseas missions and work for children in Indian mission schools in Canada. To carry on these enterprises the Dominion budget was about \$220,000. This year the M. S. C. C. was asking the Women's Auxiliary to undertake the work among women and children of white settlers in Canada and this would involve an additional contribution of \$10,000 from the Dominion organization to the M. Free—A Delightful Test

You Lose Much

If you don't fight film on teeth
Coated teeth are dingy

Do you admire the whiter teeth seen everywhere today? Don't you think they add to beauty and to charm?

Then learn how people get them. Millions now combat the film in a delightful way. Make this test and note the changes which it brings to you.

The chief enemy of teeth

Film is the teeth's great enemy—that viscous film you feel. No ordinary tooth paste effectively combats it. Much of it clings and stays.

Soon the film discolors, forming dingy coats. Then teeth remain unsightly and unclean.

Film also holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay. Germs breed by millions in it. They, with tartar, are the chief cause of pyorrhea.

Very few people escaped such troubles in the old ways of teeth cleaning.

Protect the Enamel
Pepsodent disintegrates the film, then removes it with an agent far softer than enamel. Never use a film combant which contains harsh grit.

The New-Day Dentifrice

Based on modern research. Now advised by leading dentists the world over.

Modern science has discovered two effective film combatants. One disintegrates the film at all stages of formation. One removes it without harmful scouring.

The results have been proved by many careful tests. A new-type tooth paste has been created to apply them daily. The name is Pepsodent.

The use of that tooth paste quickly spread the world over. Careful people of some 50 nations enjoy its benefits today.

Watch it act

This test will bring you quick results which you can see and feel. The book we send tells the reasons for them.

You will find that Pepsodent brings new and desired effects. It multiplies the alkalinity of the saliva, to better digest starch deposits on teeth.

Every use brings these combined effects. You will know at once that they mean much to you and yours.

Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth become whiter as the film-coats disappear.

The test will be a revelation. Cut out coupon now.
