We are sorry to record the death of Mr. and Mrs. Bert Talbot's two weeks' old baby girl. The little one passed away on Tuesday. The cause of death was pneumonia. All sympathize with the parents in their bereavement.

Frederick Steel, of Steel & Co., Winnipeg, photographers, is in Cardston. Mr. Steel will probably open up a gallery here. He has taken a number of views of the town. By the way, Mr. Steel was the Record's first subscriber, and we hope to see him establish a business in Cardston.

Owing to some inadvertence the name of Alexander Campbell was omitted from mention in the criticism of the participants in the play recently presented by the Cardston Dramatic Company. Mr. Campbell took the part of Vermont, and performed it in good taste showing appreciation of the requirements of the role. As this was Mr. Campbell's first appearance on the stage he may be relied upon to make good progress if further opportunity presents itself.

The Macleod Gazette, after quoting our article on "Mail Service," which was published in The Record of Apr. 21st., says: "The present unsatisfactory service via Lethbridge will in any event be continued, but will be less direct in the future than in the past, settlements having formed which will make the present route less direct, longer and slower. Direct service we must have; but, while moving for the mail, the Cardston-Macleod stage project should be kept very much alive."

Nice weather. Scavenger, wake up! Small-pox is having an innings over the line.

Mrs. Attena Williams is visiting Mrs. Hyrum Taylor at Spring Coulee.

Mr. Kearn informs us it is probable that a stage will be run from this point to Macleod.

Spring coats at the Cardston Co. for one week 20 per cent off.\*

In case the quarantine of Montana continues for any length of time, it will interfere seriously with overland immigration from Utah to Southern Alberta. It will not affect settlers coming by rail.

Mr. and Mrs. Ephraim Harker's little two weeks old baby died on Saturday night. The many friends of the parents deeply sympathize with them in their sad loss.

All our Spring capes and coats at a twenty per cent discount. Our room is limited and it is impossible for us to carry any over at the Cardston Co. Ltd.\*

Thirty-eight cases of diphtheria originated in the Winnipeg general hospital during the past six months. So far, five deaths have resulted from that infectious disease.

The Board of Trustees for the Cardston School District will sit to-day as a Court of Revision. Probably there will be some interesting proceedings at the sitting.

It is all very well,—it sounds all very nicely to tell people who know nothing of the state of affairs that we Canadians are free from taxation; but, "oh, what a difference in the morning!"

The Cardston Drug Co. have their premises nicely fitted up and are now ready for business. H. W. Brant, M. D. and Dr. James T. Brown are the proprietors.

Canadian emigration as well as Canadian immigration is having a boom. Twenty thousand Quebec people have crossed the line this season. The exodus of Canadians to New England this spring is the heaviest for many years.

The rumors of the prevalence of small-pox in north-eastern Montana need not deter any immigrants from coming to Cardston. The affected districts are Forts Benton and Assiniboia, each being from 60 to 100 miles distant from the main route of travel to this locality. There is no quarantine raised on any parties coming by railroad to Canada from the states, and settlers continue to arrive here everyday.

A 16-year-old girl imagines that she is an angel, and never gets over it. After a woman gets old she thinks of how she was admired and complimented in her youth and feels that some great wrong was done her because she did not remain as pretty as she was at 16. If she is married, she is apt to lay the blame on the brutality of her husband; if she is an old maid, she lays it on her father, who was poor, and thus forced her to work, which resulted in a stooping figure and harsh features. A man never has this experience. He is at his worst at 16 and does not reach his best until he is 26 to 30. By that time he has acquired a little sense and never mistakes a compliment for the truth.—Ex.

Several teams went in to Mott, Son & Co. of Macleod, for lumber this week. That enterprising firm is getting all of Cardston's trade, which is no surprise to those who have compared their prices with the prices of their competitors.

Everybody is signing the petition praying for the continuation of the present mail route from Lethbridge to Cardston. The petition is alright in all but one respect.—It does not ask for a tri-weekly service in place of the present very unsatisfactory semi-weekly. Had such a request been inserted in the petition nothing would have been lacking to make it entirely satisfactory to everybody concerned.

After the foregoing was set up we learned that a request for a tri-weekly service had been inserted in the petition.

What do you think of the people who go to Lethbridge to buy their goods? We think they should be taken in hand by some small school boy and taught a lesson in "self help." People ought to patronize our home merchants, our home bank, and our home newspaper. Don't go to Lethbridge, or any other place, and get your wedding cards printed, for, you know, your home paper cannot give you a nice, long "write-up" when you do such things, for, of course, newspaper men are, after all, but human, and, you know, or should know, "self preservation is the first law of nature;" "money makes the mare go," etc., etc.

Advertising will enable a small manufacturer to compete successfully with a big one whose goods are known best to the trade perhaps, but not so well to the general public.

The reputation of being "the heaviest advertiser in town" is now very generally accepted by the public as indicating the possession of large capital. This may not always be the case, but in estimating the financial condition of a man the fact of his doing considerable advertising, and, necessarily, a considerable business, are universally regarded as points in his favor. This is only one of the many usually unconsidered trifles that go to make liberal, well-planned advertising a profitable investment.—Press

When Cardston was organized into a village, the majority of the townspeople believed such action compulsory; the supposition, however, was erroneous.

Government organs contain advertisements calling for tenders for Indian supplies, says the Calgary Herald. Yes, the Govt. organs always get the advertising, while the independent newspaper, which is the best kind of paper, receives,—nothing.

Evans & Rose, contractors and builders, have their card in to-day's Record. Both James Evans and W. T. Rose have shown to the people hereabouts that they are first class mechanics, and the fact of their having about twenty houses to build this summer is proof of the confidence the people place in them.
