London, Sept. 1.—W. W.Ison, editor of the London Year Book and other pub-lications, amplifies the articles which were written by the Spectator on Satur-day last regarding France's attitude to-ward the United States in the late war. He says that not long after the opening of the late war, the French government conceived a plan the object of which was to rescue Spain, to administer a rebuke to American ambition and to assert European supremacy in the complications of the West Indian world.

At this point the first and last check to the scheme was received. The English people, so reasoned the French cabinet, have suffered more from American aggression of late years, than any other mation. Deeply angered by the worst part of the Americans they must have reached the limit to their endurance under the menace of President Cleveland, and here, therefore, is their opporutnity for an easy and overwhelming revenge.

Accordingly the proposition of diplomatic intervention if it should be sufficient, or force of arms if needful, was definitely submitted to Lord Salisbury.

To the unmeasured surprise and grief of the French cabinet a reply was delivered to the effect that if the plan was not directly abandoned, not only would Her Majesty's government refuse to countenance its execution but would join forces with the American government and deedare war upon France and such

Important Developments in the Plans for American Lines.

New York, Sept. 2.—Important develoments in the plans for American cables a maceting the new possessions of the United States in the Pacific with San Francisco, and with branches to Japan and Australia, were decided upon at a meeting of the directors of the Pacific Cable Company last night in the office of J. P. Morgan & Co.

Plans have dready been matured for the laying of a cable, starting at San Francisco and touching at Honolulu, Malan Island in the Caroline group, from which a spur will run to Australia,

extensive and good repairs have been made.

Since coming to Old Point Comfort Captain Higginson, Captain Taylor, Lieutenant Brunson and Chief Engineer Sitvers, comprising the board of survey, have been actively engaged in making a careful examination of all the vessels of the auxiliary fleet, and it is expected they will conclude their work the latter part of the week.

In more than half the vessels examined it is said the machinery has been found to be so badly damaged that new engines and bollers will have to be supplied before they will be in proper condition for the pursuits in which they were formerly engaged while in the merchant service.

It is semi-officially learned that of the ships inspected by the board at Old Point the following will probably be recommended for sale, unless retained in the government service as may vard turs:

The Apache, Eagle, Hawk, Hornet, Leyden, Niagara, Oneida, Osceola, Emporia, Piscataqua, Stranger, Siren, Suwanee, Tecumsch, Vizen, Wasp, Wampatuck and the Yankton.
