**The GOGGIN HARDWARE STORE, CHATHAM.**

NO PLACE LIKE THE SLUMS.  
London Gamin's Prefer Town Excitement to Rural Peace.  
The children of London's slums think there is no place like home, and never so equid and poverty-stricken, says a recent London paper.  
"They miss the flaming naphtha lamps, the winkle burrows, the hokey-pokey man, and all the other things that have been their life-long companions," said Father Stanton, of St. Alban's, Holborn, when asked how an child of the slums take their summer outings in the country.  
"Then, too, they are afraid of the dark at night, and are lost in the daytime, in the country," continued the kindly-faced, great-hearted friend of thousands of street arabs and gutter-guns.  
"They have all sorts of reasons for preferring the city to the country, and some of them are perfectly inexcusable. One little boy wrote to me after his outing last year and said he didn't like the country because while there a wasy had stung him."  
"Another youngster took a day at Brighton with me in preference to two weeks in the country, and could give no reason for his choice." It was the boy's last, and are really glad to get back to it, their brown cheeks

**About the ... House**  
THE SELECTION OF FISH.  
The average housekeeper knows very little about fish, aside from the "panfish" caught from our small lakes and streams - the sun fish, perch, black and rock bass and pickeral that are the usual victims of a fishing excursion on part of the "men folk." Put her in the fish market and she is confused and uncertain. Her experience has been with fish "from water to pan" and she learns the lesson more readily from the professional fish dealer, willing enough to take advantage of her ignorance.  
To tell a fresh fish says an authority on the subject, see that the flesh is firm, that the scales are bright, the gills are pink, the eyes are clear, and the fish is not too fat. When it answers these tests it is fresh, and in the right season for eating.  
As a general rule, large fish should be boiled; medium-sized ones baked or broiled; small ones fried. The best size for broiling is from four to six inches long, and for baking from five to eight, and for planking from six to ten pounds. Do not boil white fish longer than necessary.  
Whitefish is one of the best of our lake fish, and the best come from Lake Superior or the St. Lawrence. Brook trout is delicious eating, but always high priced. Next in value is the brook trout, and the sportsman enjoys taking on account of its game fish for life and liberty. This fish is always found in clean water.  
The season for fish, especially the lake fish, is from June to September. Generally speaking a frozen fish is a spoiled fish. A frozen fish should always be thawed in cold water. It should not lie in water after they are cleaned. Invert an old plate in a pan, and lay the fish on it. Do not put fish in a refrigerator; butter and milk will taste of it.  
Small fish are better than large fish are apt to get "fish tainted," therefore a boiler, baking pan, etc., should be thoroughly washed with soap and water.

**FOR THE COOK.**  
Grape Marmalade - This is made of the grape pulp with the juice, unless that is not available, the marmalade may be prepared at the same time with jelly. The pulp is strained through a sieve, and a little water and cook till soft. The pulp is then mixed with sugar through the sieve, to remove all skins and seeds. Add to the pulp an equal weight of sugar, and cook slowly with the juice half or three-quarters of an hour. If the fruit is very tart, add a little more sugar. Stir frequently, and when the marmalade is done, it should be poured into jars, and sealed with wax. It is best to use a double boiler, and to cook it in a water bath. It is best to use a double boiler, and to cook it in a water bath. It is best to use a double boiler, and to cook it in a water bath.

**USEFUL HINTS.**  
Iron pieces of manilla paper, then paint them, and you will find you have something quite as good as the real iron. Do not keep ironed clothes on bars in the kitchen any longer than is necessary. Thoroughly drying them, they gather unpleasant odors. They are a nuisance, and they are an excellent way to save fuel. They are a nuisance, and they are an excellent way to save fuel.

**TO DESTROY ANTS.**  
Grease plates with lard, and set them where the insects abound. They prefer lard to anything, and will forsake even sugar for it. Place a few sticks of camphor around the ants to climb up by. Occasional drops of kerosene will kill them, and the ants will fall in with the melting lard. Reset the plates, and the ants will disappear.

**NEW FOOD FOR CATTLE.**  
Molasses Is Said To Be Beneficial For Them.  
Many agriculturalists in Europe have long been convinced that molasses is an admirable food for their cattle, and that it is superior to any other food. It is now stronger than ever, owing to certain experiments which have been recently tried, and which have proved eminently successful. Unfortunately, in some countries farmers have practically been deterred from using molasses in this way, owing to the fact that it is a liquid, and is therefore difficult to handle. But now, in France at least, steps have been taken to overcome this obstacle, and, furthermore, the French Government has publicly declared its intention to aid them in their efforts to do so.

**HIS PRIZE.**  
An amusing story, which may perhaps be entirely true, is told of a short-sighted but energetic member of the Russian secret police. He was walking through a little-frequented street in St. Petersburg one night when he spotted, high up on a lamp-post, a diamond. "Aha!" he said to himself, "scolding mischief on the instant, and alert for action." "That's one of those incendiary notices about the large of the diamond," he thought, "and I must come down at once!" With some difficulty, being of a stout build, he succeeded in climbing the post and dislodging the placard. He bore it to the ground, and there, peering at it by the light of the lamp, he read two Russian words, which he recognized as "diamond" and "prize." The London Parks Committee has \$815 axes under its control, with 800 gardeners.

**HOW TO MAKE A FORTUNE.**  
GREAT PRIZES THAT ARE LOOKING FOR OWNERS.  
\$90,000 Reward for a Navigable Airship - Something for the Peacemaker.  
If Dumont, the young Frenchman who has just invented a steerable dirigible, were a Briton, he would be entitled to a prize of \$90,000. He would have won the "Melton" award and a committee would now be settling up the conditions prior to handing him the money.  
When Melton Payne, the famous amateur aeronaut, died, he left a legacy of \$80,000 in trust for the benefit of a young man who had been a British subject who should invent a practicable navigable airship. The prize has been tried for unsuccessfully by over a dozen men, and a good many thousands spent in the process. The nearest to success was Captain Green's attempt, which ended in failure in the serious accident to the inventor at Exeter, when he and his machine collapsed.

**MARRIED BY NEWSPAPER.**  
Strange Story of Miss Creydt's Wedding in London.  
In October last Miss Helene Creydt who was living at Cologne, inserted an advertisement in the Frankfurter Zeitung, to the effect that she was an orphan possessing some means, and desired to correspond with an honorable gentleman with a view to matrimony.  
Franz Von Berger, alias Dr. Emanuel Egon Borges, who is an Austrian by birth and an American citizen, replied to this in a letter written from an address in Cockspur street, London. He described himself as a professor of Harvard University, with a salary of 60,000 francs.  
Correspondence ensued, and on December 23 the lady came to England and was met at Southampton by Berger, who brought her to London, and after telling her that she came up to all his expectations, and that he would marry her, placed a ring on her finger and asked her to accompany him to a registry office. They then went to a private house, where they went through a form of marriage in the presence of three men; but there was no trace of the marriage in the records of Somerset House.  
Miss Creydt, believing that she had been legally married, handed to him some bank notes and shares to the value of £150, and he asked her to pawn some of the shares on account of her interest under her father's will, and when the cheque came took it away and cashed it.  
On April 1 she received a draft for £2543, and placed it in her desk. This draft Berger is alleged to have stolen, as he cashed it the following day at the Dutch Bank, and was traced to New York, and at Bow street, London, where he was arrested on charge of stealing the £2543 cheque.

**HOW TO GET SLEEP.**  
A System by Which Repose May Be Obtained.  
Firstly, the room must not be too warm; the bed clothes must not be too numerous, and the pillows and blanket must not have castles of air, or be too high. Then, when the sleeper must not have eaten unwholesome or untimely. Then let him lie on his back and stretch to the right, trying to touch the head-board with his feet, and which will bring into use many muscles which have not been actively employed during the day.  
While in this position raise the head half an inch and keep it there, breathing slowly and deeply about half an inch while the feet are raised. This is continued as well as the stretching for the two ends of the bed. When the fatigue of holding up the right foot becomes too great it should be dropped and the left foot raised in the same way. So soon as fatigue compels this, to be dropped the trunk of the body must be raised while the weight is supported on the shoulders and neck.  
So soon as this new position is the cause of too much fatigue turn on the right side and raise the head half an inch. Then, when the muscles of the neck are fatigued, and the head drops down, raise the feet and hold them up as before, and begin all over again.  
In most cases sleep will come before all these movements have been gone through, but if it does not, the sleeper should immediately begin all over again, and by keeping up this system it will not be long before he succeeds in obtaining the desired repose.

**A CHINESE JOKE.**  
An Incident of the Recent Boxer Troubles.  
A strange state of mind evidently prevailed in Pekin during the Boxer outrages outside the walls, outrages which were momentarily expected to be repeated within the city limits. Everybody was preparing for a catastrophe, and nobody could be sure why. It all seemed like a huge practical joke, which could not be taken seriously, and yet it was serious, and everybody knew it was serious. There was apparent peace, with a certainty of coming trouble. The foreigners were gathering in places of safety, and the compounds they had left remained unoccupied.  
One incident curiously shows the combined lightness and frenzy of the public mind. On a certain evening a boy of about sixteen walked down a street, marking a door here and there with a circle of white chalk, before which he bowed solemnly. Presently all the people came to their doors in a great state of excitement, and began to discuss the proceedings and debate as to what it might mean. The marked houses might belong to the friends or foes of the Boxers, the saved or lost. Suddenly a man went up to the boy, seized him by the wrist, and asked him what he meant. The boy, who was amazed at a courage which dared interfere with an enterprise of the Boxers, and the boy himself tried to swagger a little, and braved it out.  
"What were you doing for?" he asked the man. "What or I take you to the police station."  
Then the boy fell on his knees and begged for mercy. The man, who was a joke, to frighten the people. His success had exceeded his hopes.

**GOOD OLD SCOTCHMAN.**  
A Scotchman went to London for a holiday. Walking along one of the streets, he noticed a bald-headed chemist standing at his shop door, and inquired if he had any hair restorer.  
"Yes sir," said the chemist. "Step inside, please. There's an article I can recommend. Testimonials from great men who have used it. It makes the hair grow in twenty-four hours."  
"Awe!" said the Scotchman, "ye can come over in a haik?"  
"I'll look back the morn and see if ye're tellin' the truth."  
The chemist returned the bottle to the shelf and kicked the errand boy for laughing.  
The main wheel of a watch makes 1,400 revolutions a year, the general wheel 8,750, the crown wheel 70,080, the crown wheel 525,600, and the escape-wheel 4,781,800.

**NOT GOING FISHING.**  
A citizen with a fishing rod over his shoulder was going up the street yesterday when he was called out.  
"Have you any fish?"  
"No, sir, but I have a second inquiry."  
"Are they biting now?"  
"At the next corner a third stopped him and asked:  
"What'll you take for a ton of 'em?"  
"A fourth, fifth, sixth, and seventh had their say, and the eighth, bored down upon him with:  
"Look here, old chap, you may have a rod out of a crossing your way, but it brings luck and I can prove it."  
Speaking to me? queried the man with the rod.  
"What do you take me for?"  
"Who said so?"  
"Have you got a fishing rod?"  
"Suppose I have? If I saw you carrying a bar of soap home, would I argue that you were going to do the family washing?"  
"But aren't you going fishing?"  
"No, sir! This rod is to knock the 'parsons' out of the 'parsons' house. There are many people here in this world who are interested in the 'parsons' business."

**PAYING FOR A PLEASANTRY.**  
It was a prisoner of great activity of speech who recently faced the magistrate in the Philadelphia Central Police Court.  
"What is your name?" asked the magistrate.  
"Michael O'Halloran," was the reply.  
"What is your occupation?"  
"Phrat's that?"  
"What is your occupation? What work do you do?"  
"I'm a sailor."  
"The magistrate looked incredulous.  
"I don't believe you ever saw a ship," he said.  
"Didn't O'Halloran?" said the prisoner. "Aye, phrat, do ye see 'tink O' come over in a haik?"  
"The Philadelphia Record says that it went back with Michael O'Halloran after that."

**GOOD OLD SCOTCHMAN.**
