Arbitrate. SYDNEY, N. S., Nov. 10.-Officials of the Dominion Coal Company issued a statement at noon today giving their version of the difficulty between them and the Dominion Iron and Steel Co.
The statement says in part: The Steel
Co. has notified the Dominion Coal Co.
that it positively refuses to accept the
run of mine from the Phelan seam delivered by the company, pursuant to its contract. This position is a direct repudiation of the Steel Company's ob-ligation to the Coal Company, and it has notified the Steel Company that the contract is at an end. The action of the Steel Company in closing down the furnaces without mention of the fact that thousands of tons of coal are standing on its sidings, was intended standing on its sidings, was intended evidently to lead to the conclusion that the Coal Company was to blame for stopping a great industry on some mere pretext. Submission to the claims of the Steel Company would spell ruin to the Coal Company. The money spent by the Coal Company to give coal to the Steel Company has been misspent, and in future they will know how to fulfil their obligations. It how to fulfil their obligations. means that bankruptcy stares the Coal Company in the face if the position of the Steel Company is sustained. It suggests that the question whether the coal shipped the Steel Company does not fill the requirements of the contract be submitted to a jury of three or four mine managers of Nova Scotia.
