Bowel Troubles of Childhood

It is impossible to exaggerate the value of FRUIT-A-TIVES as a medicine for children. They contain no alcohol—no morphine or cocaine—no dangerous drugs of any kind.

Fruit-a-tives are fruit juices—concentrated and combined with the most valuable tonics and natural antiseptics known to medicine.

Fruit-a-tives are free of calomel, opium, strychnine and the host of violent poisons which are so often found in the bowels. Fruit-a-tives are made from fruit and tonics and are pleasant to take, and so mild in their action that they are always safe.

During the summer, when children are so apt to get indigestion, parents should have a box of Fruit-a-tives always handy.

Porcupines Worse than Moose. To the Editor of the Telegraph:—Sir,—In a lengthy interview with the Star of Sept. 4, Dr. Hay, of Chipman, details his troubles with a voter and a moose. The matter is easily settled. Let Dr. Hay present Mr. Brown with a game license and in a few days the farmer will be in a position to secure a good fat moose. The meat and hide, not to mention the head and horns, will amply repay him for the loss of his six bushels of oats. Speaking of oats reminds me that hundreds of bushels of oats and buckwheat were destroyed every year by the porcupines. In fact, the latter do more damage to grain in New Brunswick than all the other wild animals combined, and by killing one you only pay its satisfaction. Besides, the porcupines in the winter season destroy a vast amount of growing timber.

Yours, FARMER.
