ence, and the high credit of a first-class Railroad Bond, with the solidity and safety of a Real Estate Mortgage on Land worth at least twice the amount loaned.

Traffic. As officially reported, the gross earnings of the present Pacific Railroad (Union and Central) for 1871, the second year of through business, (December earnings estimated) reach Seventeen Millions and a Quarter. Of this, 65

per cent, is from Local business, and, it is stated, fully 55 per cent, or nearly Nine and a Huli Millions, are net over operating expenses An equal traffic on the Northern Pacific Road will pay a divid nd of more than 9½ per cent. or its total cost. With its great and unquestioned advantages in distance, grades, climate and trioutary fertile country, the Northern Pacific is assured of a vast and profitable business from the outset, with a large increase for the future.

The Value of Land Grants. The average price The Value of Land Grants. The average price at which the twenty-six leading Land-grant Railroads have thus far sold their lands, is \$7.04 per acre-the highest average of any grant being \$13 98, and the lowest \$3.07. With few exception, the average selling price has steadily increased from year to year. The lands of the Northern Raife Road are admitted, by all who have seen them, to be better and more stalable than those of most other grants, but, sold at the general average of \$7.04 per acre, they will yield more than \$161,009 per mile of road—more than three times the possible cost of construction and equipment; or, at the lowest average of any grant (\$3.07), they will produce more than \$70, Railroad Lands, as shown by actual sales to settlers, show the three-fold security of Northern Parific R. Ilroad Bonds.

Construction. The road is now completed across Minnesota, (255 miles); work is progressing westward through Dakota, and 65 miles are under construction on the Pacific coast. In-cluding purchased lines, the Northern Pacific Company now has under its management 575 miles of finished track. Contracts are let for the

miles of finished track. Contracts are let for the construction of 635 miles more, to be finished before the close of 1872.

The 7-30 Gold Bonds. The first mortgage bonds of this company, which, after full investigation, we strongly recommend as a reliable and unusually profitable investment, and which now stand among the solid and favorite securities of the country, have the following leading features;

1. They are exempt from United States tax: the Principal and Interest are payable in gold—

2. The bonds are a first and only Mertgage which is an advantage, as parties buying from
Agents cannot get Machines properly
rep fired, unless they are sent to
the manufacturer, which
may be at a greatdistance.

2. The bonds are a first and only Mertgage
on the Road, its Equipments and Earnings, and
also on a Land Grant which on the completion
of the Road will average 23,000 acres to each
mile of track,
3. They are at all times receivable at 10 per

cent, premium (1.10), in payment or exchange for the Company's Land at market prices—a provision which practically gives the holder the nower of foreclosure at will. power of foreclosure at will.

4. The proceeds of all sale of Land are required to be devoted by the Trustees of the bondhold rs. (Messrs. Jay Cooke and J. Edgar Tnompsen), as a Sinking Fund to the purchase

and cancellation of the first mortgage bonds, or temporarily to the payments of interest thereon if necessary.
